**Nursing Programs - 2010** Turner Publishing Company

The prior three editions of this book were extremely well received  
for use in undergraduate and graduate courses in long-term care

administration, and they were also popular as fundamental resources with practitioners as well as for an array of other long-term care practitioners and professions, including housing managers, board members, teachers, students, administrators, owners, and health care professionals who are seeking new directions in the field. This, the fourth edition, has been extensively revised. There is, for example, the fundamental updating throughout to reflect structural and regulatory changes that have been occurring in the field as well as the introduction of recent research findings, evolving ideas, and new practices. In addition, there are new perspectives introduced by nine new chapter authors plus three entirely new chapters: monitoring clinical outcomes, spiritual care, and using information technology. The book is divided into six sections: The Evolution of Long-Term Care; Developing the Organization; Human Resource Management; Optimizing Health Care Outcomes; Creating a Supportive Living Environment; and Creating a Better Future. This new edition also has an additional author, Dr. Leslie Grant, whose seasoned scholarship and visionary leadership will provide important, additional insight for the reader. The ideas presented are intended to provide a better understanding of the long-term care environment and to suggest ways of applying interdisciplinary knowledge for the administrator in this setting.

*Nurses as Leaders* Cengage AU

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

My writing of this book has evolved over the past thirty-six years of professional nursing practice. These were my first efforts as an author, which were published in 2013: *Promoting a Culture of Safety: Preventing Central Line Infections in Weill Cornell Medical Center*, which used a performance improvement process to lower the rate at which critically ill patients in cardiac care developed central line infections, and *Factors Influencing Critical Nurses' Perception of their Overall Job Satisfaction: An Empirical Study*, which used a correctional approach and was statistically analyzed to determine the perception of critical-care nurses of their manager's leadership style and its effect on their job satisfaction. Having been on the receiving end of leadership behaviors gave me a firsthand opportunity to observe these diverse nurse leaders at both extremes of the spectrum from laissez-faire leadership style to dictatorial leadership style and everything in between. Each encounter has enriched my life immeasurably. My personal and professional experiences, as well as the knowledge I gained from completing my dissertation, all compelled me to write this book to share with novice managers and those aspiring for a leadership role an awareness and provide them with some valuable information needed as they forge their career paths into a leadership role, knowing that one of the keys to effective leadership is the ability to stay intellectually curious and committed to learning with the understanding that new knowledge can come from variety of sources and to make it a point of duty to be always on a lookout for new knowledge.
