### Danish Informational Cinema 1935-1965 Beowulf

Explorer Troop 301 tries to save an exploding planet from a fluffy bunny and a devious alien in the first book of this funny, highly illustrated chapter book series based on the award-winning kids' podcast! Eight-year-old Finn is the first kid born in space and he spends his days looking for a new planet to call him with his three best friends and his robot, Foggy. He's used to wild, galaxy hopping adventures. But when Explorer Troop 301 gets stuck on a planet that's about to explode, Finn and his friends will have to face giant aliens, a leader with mind control powers, and one evil, fluffy bunny rabbit in order to save the planet . . . and themselves. Blast off into a brand-new adventure inspired by the popular award-winning kids' podcast! Like the podcast, the books are sort of like Scooby-Doo meets Buffy the Vampire Slayer in space. The story centers on Finn Caspian, an 8-year-old boy aboard The Famous Marlowe 280 Interplanetary Exploratory Space Station. He and his friends Abigail, Elias, and Vale are Explorers Troop 301, taking off from the Marlowe to explore uncharted planets, help the occasional alien, and solve a mystery that threatens to destroy the Marlowe. The books in this series are for kids ages 7 to 12 looking for a funny, illustrated story to tear through. They contain no violence, a little bit of suspense, and some aliens who are real chuckleheads...

### *Sleep Disorders and Sleep Deprivation* Penguin

Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of

research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. *Sleep Disorders and Sleep Deprivation* presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

### **Ever Rest** Lippincott Williams & Wilkins

For three decades, state-sponsored short filmmaking educated Danish citizens, promoted Denmark to the world, and shaped the careers of renowned directors like Carl Th. Dreyer. The first book-length study in English of a national corpus of state-sponsored informational film, this book traces how Danish shorts on topics including social welfare, industry, art and architecture were commissioned, funded, produced and reviewed from the inter-war period to the 1960s. Examining the life cycle of a representative selection of films, and discussing their preservation and mediation in the digital age, this book presents a detailed case study of how informational cinema is shaped by, and indeed shapes, its cultural, political and technological contexts.

### Vanity Fair Watkins Media Limited

A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called *East of Eden* "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, *East of Eden* is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, *East of Eden* has remained vitally present in American culture for over half a century.
