Child Protective Services BoD - Books on Demand

Despite vast efforts to build the state, profound political order in rural Afghanistan is maintained by self-governing, customary organizations. *Informal Order and the State in Afghanistan* explores the rules governing these organizations to explain why they can provide public goods. Instead of withering during decades of conflict, customary authority adapted to become more responsive and deliberative. Drawing on hundreds of interviews and observations from dozens of villages across Afghanistan, and statistical analysis of nationally representative surveys, Jennifer Murtazashvili demonstrates that such authority enhances citizen support for democracy, enabling the rule of law by providing citizens with a bulwark of defence against predatory state officials. Contrary to conventional wisdom, it shows that 'traditional' order does not impede the development of the state because even the most independent minded communities see a need for a central government - but question its effectiveness when it attempts to rule them directly and without

substantive consultation.

C.J. the Americas Springer

Since it was first published in 1991, *The Ethics Challenge in Public Service* has become a classic text used by public managers and in public management programs across the country. This second edition is filled with practical tools and techniques for making ethical choices in the ambiguous, pressured world of public service. It explores the day-to-day ethical dilemmas managers face in their work, including what to do when rules recommend one action and compassion another, and whether it is ethical to dissent from agency policy. This essential text explores managers' accountability to different stakeholders and how to balance the often competing responsibilities. Equity and Social Justice in School Counseling Routledge

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one

to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Threat Assessment ReadHowYouWant.com

Offers insight into the causes of the mental and physical stresses of post traumatic stress disorder and provides techniques and exercises to regulate and heal the body and mind and promote recovery.

Hacking School Discipline Nursing Knowledge

Replace traditional school discipline with a proven system, founded on restorative justice. In this Washington Post Bestseller and blueprint for school discipline, national presenters and school leaders Nathan Maynard and Brad Weinstein demonstrate how to eliminate punishment and build a culture of responsible students and independent learners.

Hospital and Healthcare Security Quest Books

The UNDP Crisis Prevention and Recovery Report 2008 titled Post-Conflict Economic Recovery: Enabling Local Ingenuity, is a comprehensive analysis focusing on three critical factors: the importance of local ingenuity to guide recovery, the state's role in promoting this ingenuity, and the policies needed to rebuild battered economies and reduce the risk of conflict recurrence. The study cites examples of countries that have succeeded in rekindling post-conflict economies and those that continue to flounder, discussing the foundations that are so vital to foster post-conflict economic recovery.

A Guide for Caseworkers Cambridge University Press

"This volume analyzes the impediments that local conditions pose to successful outcomes of nation-building interventions in conflict-affected areas. Previous RAND studies of nation-building focused on external interveners' activities. This volume shifts the focus to internal circumstances, first identifying the conditions that gave rise to conflicts or threatened to perpetuate them, and then determining how external and local actors were able to modify or work around them to promote enduring peace. It examines in depth six varied societies: Cambodia, El Salvador, Bosnia and Herzegovina, East Timor, Sierra Leone, and the Democratic Republic of the Congo. It then analyzes a larger set of 20 major post-Cold War nation-building interventions. The authors assess the risk of renewed conflict at the onset of the interventions and subsequent progress along five dimensions: security, democratization, government effectiveness, economic growth, and human development. They find that transformation of many of the specific conditions that gave rise to or fueled conflict often is not feasible in the time frame of nation-building operations but that such transformation has not proven essential to achieving the primary goal of nation-building -- establishing peace. Most interventions in the past 25 years have led to enduring peace, as well as some degree of improvement in the other dimensions assessed. The findings suggest the importance of setting realistic expectations -- neither expecting nation-building operations to quickly lift countries out of poverty and create liberal democracies, nor being swayed by a negative stereotype of nation-building that does not recognize its signal achievements in the great majority of cases."--Page 4 of cover.

Local Factors in Nation-Building John Wiley & Sons

This invaluable guide provides short scenarios of typical international involvement in peace missions, natural disasters, and stability operations, as well as an introduction to the organizations that will be present when the international community responds to a crisis.

De-Escalating Violence in Healthcare Lulu.com

A practical guide for health professionals and trainers, offering evidence-based low arousal approaches to defusing and managing aggressive behaviours in a variety of health care settings. Provides both an academic background and practical advice on how to manage and minimize confrontation. Illustrates low arousal approaches and offers clear advice on physical restraint and the reduction of these methods. Describes the evidence base for recommended approaches. Includes a wide range of valuable case examples from a variety of care settings.

An Approach to Prevent Targeted Violence US Institute of Peace Press

Many people have the need to take notes: interpreters, attorneys, health care providers, and students, among others. Some try to learn short-hand, a complex system which requires several months (even years) of practice to master. There is a widely unknown but simple alternative to take notes more clearly and efficiently. Jean Francois Rozan and Andrew Gillies, two pioneer conference interpreters, provide techniques to significantly streamline note-taking. Although originally created for interpreters, these practical guidelines are extremely helpful to anyone who takes notes. The Note-Taking Manual will help you master note-taking symbols as well as Rozan and Gillies' techniques. You will acquire up to 40 new symbols through dictations (available as audio files at www.interpretrain.com). Each exercise offers a sample of notes to compare with your own and discover additional tips. These educational tools will help you become the best interpreter and/or note-taker you can be.

Parenting Matters Guilford Publications

Leaders want to see changes in behavior as a result of what people have learned and may expect

these new behaviors to deliver results for the business. With the third edition of this book, readers have an opportunity to update their understanding of this classic evaluation framework and to learn from the case studies about how to effectively apply the framework to a variety of learning programs. Readers are presented with the tools and the know-how to tell their own story of value creation.--Foreword by Merrill C. Anderson, Ph.D, Chief Executive Officer, MetrixGlobal, LLC
Note-Taking Manual Lulu.com

Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers--"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Basic Concepts of Psychiatric-mental Health Nursing Basic Concepts of Psychiatric-mental Health Nursing

"This report evaluates patterns of arrest and detention conditions in the West Bank and Gaza Strip, 25 years after the Oslo Accords granted Palestinians a degree of self-rule over these areas and more than a decade after Hamas seized effective control over the Gaza Strip. Human Rights Watch detailed more than two dozen cases of people detained for no clear reason beyond writing a critical article or Facebook post or belonging to the wrong student group or political movement."--Publisher website.

NT Cengage Learning

"This book is a comprehensive guidebook of therapeutic de-escalation techniques for nurses and other healthcare professionals to improve safety in healthcare facilities. Readers will explore the concepts of aggression (including risk factors), de-escalation, and therapeutic communication. They will also learn how to perform mental status assessments, manage and even prevent aggressive behavior, and practice conflict resolution, and--when faced with individuals with depressive disorders, suicidal ideation, and/or self-injurious behavior (SIB)--engage in crisis intervention. Specific therapeutic interventions for difficult behavioral issues associated with schizophrenia, dementia, bipolar disorder, cognitive impairment, anxiety and panic disorders are also covered, as are stress-management techniques to help patients cope, tips for creating a caring and healing environment to stop violence before it starts, and a framework for building a healthcare violence prevention program. Nursing students and healthcare professionals of all educational levels will find this book to be immensely valuable. De-escalation is one of the most valuable skills a healthcare worker can possess. Indeed, all healthcare workers need this vital skill to help ensure their safety in the healthcare environment. It's not uncommon for healthcare professionals to encounter an agitated or aggressive person. How that healthcare worker responds will dictate whether the situation is defused or escalated--perhaps even resulting in physical violence. The goal of this book is to ensure the result is the former--to prevent healthcare violence, and to foster a safe healthcare workplace that benefits all and promotes peace and safety for everyone"--

The Health Service Journal Child & Family Press

This book provides a comprehensive overview of the methods used in the Criminal Justice system in the United States to counsel and treat offenders. It is aimed at advanced undergraduate and early graduate-level students for courses in Correctional Treatment or Rehabilitation, or Community Corrections more broadly. The sections in the book provide: - Aims and Scope of Correctional Counseling and Treatment - Tools that Corrections Workers Use (including counseling and case management) - Behavioral Modification Treatments: Examples and Applications - Cognitive Therapies: Examples and Applications Throughout the text, there is an emphasis on the big picture: the interaction of the correctional component of the justice system with other components, particularly courts (including special courts like family courts, drug courts, veterans courts and other programs). Chapters in this book address the diverse population of correctional facilities, including juvenile offenders; those with mental illness, addiction and substance abuse problems, physical and mental disabilities; and homeless populations. The author also provides analysis of how legislation influences the corrections process. This work is also enhanced by providing comparative analysis of the criminal and juvenile justice systems: their goals, objectives, and how these can affect counseling and treatment available within these two systems. This pedagogical features of this engaging text include: excerpted interviews with correctional practitioners about the problems and challenges they encounter, discussion questions, classification instruments and real-world examples of specific treatments programs, and case studies that give students the chance to select the appropriate interviewing, counseling or treatment approach to deal with the problem/ issues of the case. This work provides students with an overview of the methods used for Correctional Treatment and Counseling, and the tools to begin to think critically about how and when to apply these methods.

Informal Order and the State in Afghanistan Verso Books

Banksy, the Yes Men, Gandhi, Starhawk: the accumulated wisdom of decades of creative protest is now in the hands of the next generation of change-makers, thanks to Beautiful Trouble. Sophisticated enough for veteran activists, accessible enough for newbies, this compact pocket edition of the bestselling Beautiful Trouble is a book that's both handy and inexpensive. Showcasing the synergies between artistic imagination and shrewd political strategy, this generously illustrated volume can easily be slipped into your pocket as you head out to the streets. This is for everyone who longs for a more beautiful, more just, more livable world -- and wants to know how to get there. Includes a new introduction by the editors. Contributors include: Celia Alario • Andy Bichbaum • Nadine Bloch • L. M. Bogad • Mike Bonnano • Andrew Boyd • Kevin Buckland • Doyle Canning • Samantha Corbin • Stephen Duncombe • Simon Enoch • Janice Fine • Lisa Fithian • Arun Gupta • Sarah Jaffe • John Jordan • Stephen Lerner • Zack Malitz • Nancy L. The Zones of Regulation Rand Corporation

This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.

Overcoming Obstacles to Peace OR Books

Interrupting Racism provides school counselors with a brief overview of racial equity in schools and practical ideas that a school-level practitioner can put into action. The book walks readers through the current state of achievement gap and racial equity in schools and looks at issues around intention, action, white privilege, and implicit bias. Later chapters include interrupting racism case studies and stories from school counselors about incorporating stakeholders into the work of racial equity. Activities, lessons, and action plans promote self-reflection, staff-reflection, and student-reflection and encourage school counselors to drive systemic change for students through advocacy, collaboration, and leadership.

Creating Change for Complex Children and their Families Jessica Kingsley Publishers

It is clearly recognized that medical errors represent a significant source of preventable healthcare-related morbidity and mortality. Furthermore, evidence shows that such complications are often the result of a series of smaller errors, missed opportunities, poor communication, breakdowns in established guidelines or protocols, or system-based deficiencies. While such events often start with the misadventures of an individual, it is how such events are managed that can determine outcomes and hopefully prevent future adverse events. The goal of Vignettes in

Patient Safety is to illustrate and discuss, in a clinically relevant format, examples in which evidence-based approaches to patient care, using established methodologies to develop highly functional multidisciplinary teams, can help foster an institutional culture of patient safety and high-quality care delivery.

Crisis Services are a continuum of services that are provided to individuals experiencing a psychiatric emergency. The primary goal of these services is to stabilize and improve psychological symptoms of distress and to engage individuals in an appropriate treatment service to address the problem that led to the crisis. Core crisis services include: 23-hour crisis stabilization/observation beds, short term crisis residential services and crisis stabilization, mobile crisis services, 24/7 crisis

hotlines, warm lines, psychiatric advance directive statements, and peer crisis services. The research base on the effectiveness of crisis services is growing. There is evidence that crisis stabilization, community-based residential crisis care, and mobile crisis services can divert individuals from unnecessary hospitalizations and ensure the least restrictive treatment option is available to people experiencing behavioral health crises.
