<https://rowman.com/ISBN/9780759112421> Research Methods in Anthropology is the standard textbook for methods classes in anthropology programs. Over the past dozen years, it has launched tens of thousands of students into the field with its combination of rigorous methodology, wry humor, commonsense advice, and numerous examples from actual field projects. Now the fourth edition of this classic textbook is ready, written in Russ Bernard's unmistakable conversational style. It contains all the useful methodological advice of previous editions and more: additional material on text analysis, an expanded section on sampling in field settings, the use of computers for fieldwork and analysis, the pros and cons of rapid assessment techniques in anthropology, dozens of new examples, and an expanded bibliography. 'Methods belong to all of us' is the watchphrase of this book. Whether you are coming from a scientific, interpretive, or applied anthropological tradition, your students should learn field methods from the best guide around.

A Global Perspective Wiley-Blackwell

This second edition of Catherine J. Allen's distinctive ethnography of the Quechua-speaking people of the Andes brings their story into the present. She has added an extensive afterword based on her visits to Sonqo in 1995 and 2000 and has updated and revised parts of the original text. The book focuses on the very real problem of cultural continuity in a changing world, and Allen finds that the hold life has in 2002 is not the same as it was in 1985.

An Experiential Introduction to Anthropology JHU Press

Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice. The more we know how health and disease are managed in different cultures, the more we can recognize what is "culture bound" in our own medical belief and practice. The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology. No other single reference work comes close to marching the depth and breadth of information on the varying cultural background of health and illness around the world. More than 100 experts - anthropologists and other social scientists - have contributed their firsthand experience of medical cultures from around the world.

Dancing Skeletons Routledge

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of

doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Anthropology Anthropology

Anthropology is a discipline very conscious of its history, and Alan Barnard has written a clear, balanced and judicious textbook that surveys the historical contexts of the great debates and traces the genealogies of theories and schools of thought. It also considers the problems involved in assessing these theories. The book covers the precursors of anthropology; evolutionism in all its guises; diffusionism and culture area theories, functionalism and structural-functionalism; action-centred theories; processual and Marxist perspectives; the many faces of relativism, structuralism and post-structuralism; and recent interpretive and postmodernist viewpoints.

Physical Anthropology and Archaeology Prentice Hall

Now with SAGE Publishing! Cultural Anthropology: A Global Perspective by Raymond R. Scupin delves into both classic and current research in the field, reflecting a commitment to anthropology's holistic and integrative approach. This text illuminates how the four core subfields of anthropology—biological anthropology, archaeology, linguistics, and cultural anthropology—together yield a comprehensive understanding of humanity. In examining anthropological research, this text often refers to research conducted in other fields, sparking the critical imagination that brings the learning process to life.

An Experiential Introduction to Anthropology Springer Science & Business Media

Designed for the two-field course covering physical anthropology and archaeology, this clearly written, comprehensive and engaging text has risen to become a market leader. Its balanced coverage of physical anthropology and archaeology helps students understand what humans are and were like, and how they got to be that way. The new fourth edition has been updated with all-new Canadian and international research. A visual revitalization has been accomplished with more photos, new Dorling Kindersley maps, and a handy skeleton diagram inside the cover for quick reference. This popular text will bring a unique perspective to the study of physical anthropology.

Unfinished Rowman Altamira

The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

Immigration is a topic that is as important among anthropologists as it is the general public. Almost every culture has experienced adaptation and assimilation when immigrating to a new country and culture; usually leaving for what is perceived as a "better life". Not only does this diaspora change the country of adoption, but also the country of origin. Many large nations in the world have absorbed, and continue to absorb, large numbers of immigrants. The foreseeable future will see a continuation of large-scale immigration, as many countries experience civil war and secessionist pressures. Currently, there is no reference work that describes the impact upon the immigrants and the immigrant societies relevant to the world's cultures and provides an overview of important topics in the world's diasporas. The encyclopedia consists of two volumes covering three main sections: Diaspora Overviews covers over 20 ethnic groups that have experienced voluntary or forced immigration. These essays discuss the history behind the social, economic, and political reasons for leaving the original countries, and the cultures in the new places; Topics discusses the impact and assimilation that the immigrant cultures experience in their adopted cultures, including the arts they bring, the struggles they face, and some of the cities that are in the forefront of receiving immigrant cultures; Diaspora Communities include over 60 portraits of specific diaspora communities. Each portrait follows a standard outline to facilitate comparisons. The Encyclopedia of Diasporas can be used both to gain a general understanding of immigration and immigrants, and to find out about particular cultures, topics and communities. It will prove of great value to researchers and students, curriculum developers, teachers, and government officials. It brings together the disciplines of anthropology, social studies, political studies, international studies, and immigrant and immigration studies.

The Natural History of Humankind Pearson College Division

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This

personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, *Dancing Skeletons* presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.

Jungle Jingle is the textbook for Dr. Cools Systematic Herbalism and Magipuncture courses. From this book, you will gain a new perspective of many common illnesses and diseases both acute and chronic. This unique curriculum combines traditional Chinese medicine, biblical principles, and Dr. Cools innovative theory to create a new paradigm for understanding and treating the human body. With Systematic Herbalism, you will be taught a system for classifying herbs, correlating them to a particular organ and/or function, and combining them in a tailor-made formula specifically suited for the individual being treated. Magnetic Intrinsic Acupuncture, also called Magipuncture, is a noninvasive treatment with a myriad of health benefits. This textbook will educate you on, not only the proper method, but also the highly researched molecular mechanism behind the favorable results of Magipuncture. Systematic Herbalism works in conjunction with Magipuncture to improve and maintain wellness within the human body, and through proper application of this curriculum, you will be able to treat yourself, patients, friends, and family.

Investigating Culture Prentice Hall

Investigating Culture offers an innovative approach to understanding culture as a constructed phenomenon open to investigation of its implicit premises and explicit forms. Provides a refreshing alternative to traditional textbooks by challenging students to think in new ways and to apply these ideas to their own lives. Focuses on the ways that humans orient themselves, e.g., in space and time, according to language, food, the body, and the symbols provided by public myth and ritual. Each chapter includes: an introduction framing the central issues, examples from a range of cultures, a selected reading or two, additional suggested readings, and exercises.

Now with SAGE Publishing! Using state-of-the-art research, *Anthropology: A Global Perspective* introduces students to the four core subfields of anthropology and applied anthropology. Integrating material from each subfield, this comprehensive text is founded on four essential themes: the diversity of human societies; the similarities that tie all humans together; the interconnections between the sciences and humanities; and a new theme addressing psychological essentialism. Authors Raymond Scupin and Christopher R. DeCorse demonstrate how anthropologists use research techniques and methods to help solve practical problems and show readers how anthropology is relevant to improving human societies.

Smithsonian Institution

HUMANITY: AN INTRODUCTION TO CULTURAL ANTHROPOLOGY, Eleventh Edition, offers a solid framework centered on globalization and culture change. The text's engaging narrative provides new ways of looking at many of the challenges facing the world in this century, as students examine ethnic conflicts, globalization of culture and language, recent debates about gay marriage, increasing inequalities, population growth, hunger, and the survival of indigenous cultures. Throughout this highly acclaimed work, Peoples and Bailey explore the diversity of humanity and clearly demonstrate why an appreciation and tolerance of cultural differences is critical today.
