Climate Change and  
Human Health Scenario in  
South and Southeast Asia  
Cambridge University  
Press

This book restores water,  
both fresh and salt, to its  
central position in human  
endeavour, ecology and

environment. Water  
access and the  
environmental and social  
problems of development  
are major issues of  
concern in this century.  
Drawing on water's many  
formations in debating  
human relationship with a  
major source of life and a  
major factor in  
contemporary politics,  
this book covers oceans  
and rivers to lagoons,

billabongs and estuaries  
in Asia, Oceania and the  
West Pacific. In an  
interdisciplinary and  
cross-disciplinary analysis  
of the water problem, the  
contributors address the  
physical descriptors of  
water and water flow, and  
they interrogate the  
politicised administrations  
of water in closely  
corresponding regions.  
Water, Sovereignty and

Borders in Asia and Oceania identifies new discursive possibilities for thinking about water in theory and in practice. It presents those discourses that seem most useful in addressing the multiple crises the region is facing and thus should be of interest to scholars of Asian Studies, Geography, Environmental and Cultural Studies. *Routledge Handbook of the Environment in Southeast Asia* University of Hawaii Press  
This book offers an innovative approach to

the analysis of the current crisis in the South China Sea. Moving beyond the spirit of the UN Convention on the Law of the Sea (UNCLOS), the mechanisms of which are limited to physical geography, it demonstrates how epistemological insights from the field of critical realist philosophy can reveal the importance of cultural and structural conditioning processes in social interactions, processes which shape the conditions for the emergence of crisis points

along a spectrum of conflict and cooperation. The potential for conflict resolution and the emergence of new regions in Pacific Asia much depends on the nature of such interactions at many levels (political-economic, semiotic and cultural) based on perceptions of what constitutes the "common" versus a Sinicised version of "Lebensraum".

This book contributes to a better understanding of the relationship between

migration, vulnerability, resilience and social justice associated with flooding across diverse environmental, social and policy contexts in Southeast Asia. It challenges simple analyses of flooding as a singular driver of migration, and instead considers the ways in which floods figure in migration-based livelihoods and amongst already mobile populations. The book develops a conceptual framework based on a 'mobile political ecology'

in which particular attention is paid to the multidimensionality, temporalities and geographies of vulnerability. Rather than simply emphasising the capacities (or lack thereof) of individuals and households, the focus is on identifying factors that instigate, manage and perpetuate vulnerable populations and places: these include the sociopolitical dynamics of floods, flood hazards and risky environments, migration and migrant-based livelihoods and the

policy environments through which all of these take shape. The book is organised around a series of eight empirical urban and rural case studies from countries in Southeast Asia, where lives are marked by mobility and by floods associated with the region's monsoonal climate. The concluding chapter synthesises the insights of the case studies, and suggests future policy directions. Together, the chapters highlight critical policy questions around the

governance of migration, institutionalised disaster response strategies and broader development agendas.

Glencoe World Geography Routledge

Straddling the equator, Southeast Asia comprises Myanmar, Thailand, Malaysia, Indonesia,

Vietnam, Singapore, and the Philippines, as well as Laos, Cambodia, Brunei, and East Timor. Despite its extraordinary diversity of ethnicities, religions, and political systems, Southeast Asia plays a keyrole in global economies and geopolitics, especially in light of its strategic position bordering China and India. This Very Short Introduction explores the contemporary character of Southeast Asia's national societies through the lens of their historical evolution, from the eras of

indigenoukingdoms and colonies under Western rule to the present's independent nation states. Deftly combining historical analysis and geopolitical insights, the book paints a bird's eye view of contemporary Southeast Asia as a community of diverse societies and traditions as well as a politicaltheater-of-action nested between India and China and tangled in global economic traffic patterns, balance of powers, and environmental forces.As James R. Rush explains,

archaic structures, such as religious and ethnic rivalries, tenacious feudal hierarchies, and age-old trade and migration patterns, remain rooted in today's Southeast Asia beneath the surface of modern national governments. The book draws on a wide range of examples from the major nations, including the ethno-religious violence in Myanmar, the Muslim-led rebellion in the southern Philippines, the Thai-Cambodian territorial rivalries, the Confucian-inspired governance in

Singapore, the military rule and democratization in Indonesia, the environmental consequences of agribusiness, mining, and unchecked urbanization, and the big-power alignments and tensions involving the United States, China, and Japan. By delving into the cultural, political, and geographical background of Southeast Asia, Rush shows that Southeast Asia is unquestionably modern, but it is modern in distinctively Southeast Asian ways.

Based upon 40 years of research of Southeast

Asian geography and culture, and 40 years of residence in the region, Professor Ron Hill has provided a comprehensive contemporary overview of the region's geography, particularly emphasising its substantial economic transformation over the last several decades. The author's standpoint is that geographical patterns cannot be understood without an understanding of the social and economic processes that produce those patterns. At the same time, he points to many aspects of

the region have changed rather little, and not only in terms of physical attributes. Continuity and change are major themes of the book. Since change has proceeded at varying rates in different parts of the region, the result has been, and continues to be, a major increase in the diversity of an already colourful region - in landscapes, language, religion, politics and a host of other cultural characteristics. The book will be accessible to the reader who knows little of the geography of

Southeast Asia, but remains informative and satisfyingly comprehensive to those with prior knowledge.

Southeast Asia: A Region in Transition, first published in 1991, is a contemporary human geography of the 'market' economies of the region usually defined by membership of the Association of Southeast

Asian Nations (ASEAN). Organized thematically, the chapters deal with the environment and development, plural societies, agrarian change and urbanization. This thematic approach provides a comprehensive picture of the ASEAN countries and gives a depth of coverage often lacking in other regional geographies. With a detailed introduction dealing with the physical environment and history of the region, this work will be of great value to students studying the

human geography of Southeast Asia, as well as those with a more general interest in the issues and developments affecting the ASEAN region.

This book is the first to present a regional analysis of climate change and human health, focusing on geographically and socio-economically distinct countries of South and Southeast Asia. It has a major focus on India, Indonesia, Bangladesh,

Malaysia, Thailand, Nepal and Taiwan. Climate change is a significant and emerging threat to human health. It represents a range of environmental hazards and will affect populations in both the developed and developing countries. In particular, it affects the regions where the current burden of climate-sensitive diseases are high, which is the case in South and Southeast Asian countries.

"This timely survey of the asian continent offers systematic studies of its complex physical, cultural, and political patterns, followed by its regional divisions. Discussion is focused on the contemporary scene that highlights the physical environments, historical settings, population problems, mineral and industrial resources, urbanization, ethnic distributions, and regional components of its vast and diverse landscapes. The book, in fact, reflects more than

three decades of experience as a traveler, a researcher, and a teacher in asian geography. It includes latest tables and carefully crafted maps illustrating the material presented in the text. Intended primarily for the general, all-purpose beginning course on asian geography, the book would prove of value to the students and lay persons alike." of East Asia, covering the culture region as a whole rather than individual countries. The volume emphasizes the region's people and their various ways of life, considering how they have adapted to, used, and changed the natural environments in which they live. Like other titles in the 10-volume Modern World Cultures set, East Asia, Second Edition explores the geographical features, climate, and ecosystems; population, settlement, and culture; and the history and economy of

the region at hand. Also covered are the region's diversity, challenges, and prospects. Illustrated with full-color maps and photographs, and accompanied by a chronology, glossary, and further readings, these accessible titles offer an ideal starting point for research on the culture regions of the world. [Locating Southeast Asia](#) University Press of America This will be the first comprehensive and detailed volume on the physical environment of

Southeast Asia and will be essential reading for geographers, ecologists, and environmental managers. As the definitive reference work on the region it will cover all aspects of the biophysical environment and its current environmental problems and management practices. The topics discussed range from a regional view of landforms and vegetation to specific cases including urban environments, coral reefs, volcanic hazards, and the Mekong River Basin. The

contributors are distinguished, scholarly, and have a long association with Southeast Asia. This is the fourth volume to be published in the Oxford Regional Environment series. [Encyclopedia of World Geography](#) Macmillan "Questions about the identity of Southeast Asia are implicitly questions about whether Southeast Asia is or can be a nation writ large. For people who live in the region, the answer is 'no.' The concept of Southeast Asia

evolved from the need of Europe, America and Japan to deal collectively with a set of territories and peoples that felt no particular identification with one another."-- Locating Southeast Asia. Early South East Asia Oxford University Press In The Geography of Southeast Asia, Rumney discusses an area that has long been of interest to geographers and other academics. As interest in Southeast Asia has grown, particularly over the past forty years, the volume and variety of scholarly publications on the varied

geographical aspects of the region have also increased. This collection is an attempt to identify, organize, and present as many of these works as possible. The region as a whole, and each individual country of the area, are covered in individual chapters. Each chapter is further systematically organized by topic, including general works, cultural-social geography, economic geography, historical geography, physical geography, political geography, and urban

geography. This book presents a myriad of sources, such as atlases, books, chapters, articles, dissertations, and theses are included, as well as works written in English, French, German, and other languages, providing the reader with a thorough view of Southeast Asian geography.

### **Figures of Southeast Asian Modernity**

Cavendish Square Publishing

We live in a world populated not just by individuals but by figures, those larger-than-life people who in some way express and challenge our conventional understandings of social types. This innovative and

collaborative work takes up the wide range of figures that populate the social and cultural imaginaries of contemporary Southeast Asia—some familiar only in specific places, others recognizable across the region and even globally. It puts forward a series of ethnographic portraits of figures that represent and give voice to something larger than themselves, offering a view into social life that is at once highly particular and general. They include the Muslim Television Preacher in

Indonesia, Miss Beer Lao, the Rural DJ in Thailand, the Korean Soap Opera Junkie in Burma, the Filipino Seaman, and the Photo Retoucher in Vietnam. Figures of Southeast Asian Modernity brings together the fieldwork of over eighty scholars and covers the nine major countries of the region: Burma (Myanmar), Cambodia, Indonesia, Laos, Malaysia, the Philippines, Singapore,

Thailand, and Vietnam. An introduction outlines important social transformations in Southeast Asia and key theoretical and methodological innovations that result from ethnographic attention to the study of key figures. Each section begins with an introduction by a country editor followed by short essays offering vivid and intimate portraits set against the background of

contemporary Southeast Asia. The result is a volume that combines scholarly rigor with a meaningful, up-to-date portrayal of a region of the world undergoing rapid change. A reference bibliography offers suggestions for further reading. Figures of Southeast Asia Modernity is an ideal teaching tool for introductory classes to Southeast Asia studies, anthropology, and geography.
