Eye-tracking is quickly becoming a valuable tool in applied linguistics research as it provides a 'real-time', direct measure of cognitive processing effort. This book provides a straightforward introduction to the technology and how it might be used in language research. With a strong focus on the practicalities of designing eye-tracking studies that achieve the standard of other well-established experimental techniques, it provides valuable information about building and

designing studies, touching on common challenges and problems, as well as solutions. Importantly, the book looks at the use of eye-tracking in a wide variety of applied contexts including reading, listening and multi-modal input, writing, testing, corpus linguistics, translation, stylistics, and computer-mediated communication. Each chapter finishes with a simple checklist to help researchers use eye-tracking in a wide variety of language studies. Discussion is grounded in concrete examples, which will allow users coming to the technology for the first time to gain the knowledge and confidence to use it to produce high quality research.

This book explores an
area that has been
somewhat overlooked
in the literature to date
- the current status

and future trends of
English education in
Oman. It offers a
variety of theoretical
and methodological
approaches to the
subject and explores
areas of English
education in Oman that
have, until now, been
little investigated. It
explores these issues
from a variety of
perspectives: the
professionalization of
English teachers in the
country; the
implementation of
novel teaching
methodologies,
curricula, and
assessment
approaches, into what
are, in many ways, still
very traditional
education settings; the
integration of learner
identity into English
language instruction;
country- and culture-
specific concerns with
conducting research

with Omani participants; the strategic demands of building stronger links between education and workforce needs; and developing learner autonomy and motivation.

This book investigates the issue of cloze- validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability

and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on cloze as measures of readability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze

tests, criterion reading tests, and other cloze and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.

Barrons Educational Series

Designed for pre-service teachers and teachers new to the field of ELT, Volume II and its companion are companion textbook, Volume I, are volumes organized around the key question: What do teachers need to know and be able to do in order for their students to learn English? Volume I covers the characteristics of the context in which teachers work, how English works and how it is learned, and the teacher's role in the larger professional sphere of English language education. Volume II covers the three main facets of teaching: planning, instructing, and assessing. The focus throughout is on

outcomes, that is, student learning. The texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education), and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes).

This book provides essential practice for serious students who are determined to achieve a high IELTS

band score in the IELTS Reading paper.

Achieving a high IELTS band in Reading is not easy! Ignore books that tell you otherwise.

Books on reading techniques and tips are fine but they are not adequate preparation for this important exam. There are no easy roads to success. It is a difficult job to read demanding texts in a short time span.

You need to have already been exposed to different types of texts, have acquired a wide range of vocabulary and be very familiar with the types of questions that will occur in your exam.

 Do you sometimes
 wonder how your teen
 is ever going to survive
 on his or her own as an
 adult? Does your high
 school junior seem
 oblivious to the
 challenges that lie
 ahead? Does your
 academically
 successful nineteen-
 year-old still expect
 you to “just take care

 basic life tasks?
 Welcome to the
 stunted world of the
 Endless Adolescence.
 Recent studies show
 that today’s teenagers
 are more anxious and
 stressed and less
 independent and
 motivated to grow up
 than ever before.
 Twenty-five is rapidly
 becoming the new

fifteen for a generation suffering from a debilitating “failure to launch.” Now two preeminent clinical psychologists tell us why and chart a groundbreaking escape route for teens and parents. Drawing on their extensive research and practice, Joseph Allen and Claudia Worrell Allen show that most teen problems are not hardwired into teens’ brains and hormones but grow instead out of a “Nurture Paradox” in which our efforts to support our teens by shielding them from the growth-spurring rigors and rewards of the adult world have backfired badly. With compelling examples and practical and profound suggestions, the authors outline a novel approach for

producing dramatic leaps forward in teen maturity, including • Turn Consumers into Contributors Help teens experience adult maturity—its bumps and its joys—through the right kind of employment or volunteer activity. • Feed Them with Feedback Let teens see and hear how the larger world perceives them. Shielding them from criticism—constructive or otherwise—will only leave them unequipped to deal with it when they get to the “real world.” • Provide Adult Connections Even though they’ll deny it, teens desperately need to interact with adults (including parents) on a more mature level—and such interaction will help

them blossom! •
 Stretch the Teen
 Envelope Do fewer
 things for teens that
 they can do for
 themselves, and give
 them tasks just beyond
 their current level of
 competence and
 comfort. Today's teens
 are starved for the lost
 fundamentals they
 need to really grow:
 adult connections and

 these will help them
 unlearn their
 adolescent
 helplessness and grow
 into adults who can
 make you—and
 themselves—proud.

 What goes on in
 human beings when
 they make or listen to
 music? What is it about

music, what gives it
 such peculiar power
 over us, power
 delectable and
 beneficent for the most
 part, but also capable
 of uncontrollable and
 sometimes destructive
 force? Music has no
 concepts, it lacks
 images; it has no
 power of
 representation, it has
 no relation to the
 world. And yet it is
 evident in all of us—we
 tap our feet, we keep
 time, hum, sing,
 conduct music, mirror
 the melodic contours
 and feelings of what
 we hear in our
 movements and
 expressions. In this
 book, Oliver Sacks
 explores the power
 music wields over us—a
 power that sometimes
 we control and at other
 times don't. He
 explores, in his
 inimitable fashion, how

it can provide access to otherwise unreachable emotional states, how it can revivify neurological avenues that have been frozen, evoke memories of earlier, lost events or states or bring those with neurological disorders back to a time when the world was much richer. This is a book that explores, like no other, the myriad dimensions of our experience of and with music.

Second language assessment is

ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the

purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented

assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.
