*Fritz and the Beautiful Horses* Orbit Books  
 For leaders at work, at home, and in our communities—an essential guide to nature-based leadership inspired by the wisdom of indigenous teachings and horses. Is there a common element to the challenges and crises of our modern age? If so, it must be disconnection—from each other, our planet, and the sense that our lives have purpose and meaning. Where can we turn for answers? In *Flying Lead Change*, leadership teacher Kelly Wendorf offers a new approach to leading and living inspired by two profound sources of ancient wisdom: original peoples and Equus (the horse), grounded in evidence-based principles of neuroscience. In her groundbreaking EQUUS training program, Wendorf teaches a way of leadership modeled on a 56 million-year-old system of the horse herd—a path that has allowed humans and horses alike to survive the kinds of global and

societal threats we now face, such as climate change and mass extinction. Here she takes you step by step through this powerful approach, including:
 

- Listening—the starting point for all leadership, in which we suspend our biases and preferences
- Care—explore the ancient, indigenous understanding of care that is reciprocal, empathic, and beneficial to all
- Presence—meeting the here and now with vulnerability, openness, and a stable foundation
- Safety—how a masterful leader creates a sense of group resilience and strength by “leading from behind” for the welfare of all
- Connection—ways to move away from coercion and force to promote genuine communication and belonging
- Peace—creating group harmony right now through the surprising concepts of “congruence” and “tempo”
- Freedom—returning to our wild nature that is inherently free, unbridled, and unbroken
- Joy—moving beyond temporary happiness to a state of wholehearted engagement of life, whatever the circumstances

 In horsemanship, a “flying lead change” allows a running horse to respond with breathtaking grace to changing conditions. “Collectively, we need a similar physics-defying maneuver,”

Wendorf writes. "This book is for the called—thought leaders, visionaries, parents, creatives, and all those who sense we are being asked to participate in humanity's 'flying change' through the way we live, love, and lead."

But when her father gets a job on Sable Island, she must say farewell to her beloved home and her mother's final resting place. Not even the idea of seeing the wild horses that roam the island can ease her pain of leaving. And after arriving on the sandy, windswept crescent of land, Ellie feels adrift and alone ... until one afternoon when she awakens on a dune to find herself looking into the curious eyes of a wild stallion. Little by little, as the days pass, Ellie gets closer to the beautiful chocolate-colored horse. Yet she soon discovers something that could take him away from his home, his herd, and her. Ellie has lost too much already. Will she lose her island horse, too?"--P. [2] of cover.

As a technology pioneer at MIT and as the leader of three successful start-ups, Kevin Ashton experienced firsthand the all-consuming challenge of creating something new. Now, in a tour-de-force narrative twenty years in the making, Ashton leads us on a journey through humanity's greatest creations to uncover the surprising truth behind who creates and how they do it. From the crystallographer's laboratory where the secrets of DNA were first revealed by a long forgotten woman, to the electromagnetic chamber where the stealth bomber was born on a twenty-five-cent bet, to the Ohio bicycle shop where the Wright brothers set out to "fly a horse," Ashton showcases the seemingly unremarkable individuals, gradual steps, multiple failures, and countless ordinary and usually uncredited acts that lead to our most astounding breakthroughs. Creators, he shows, apply in particular ways the everyday, ordinary thinking of which we are all capable, taking thousands of small steps and working in an endless loop of problem and solution. He examines why innovators meet resistance and how they overcome it, why most organizations stifle creative people, and how the most creative organizations work. Drawing on examples from art, science, business, and invention, from Mozart to the Muppets, Archimedes to Apple, Kandinsky to a can of Coke, *How to Fly a Horse* is a passionate and immensely rewarding exploration of how "new" comes to be.
