Popular Science For

George Orwell's Nineteen
Eighty-Four is
unquestionably the most
famous dystopian novel of
all times. Written in the
year of 1948, the author
swapped the last two
digits while describing a

future totalitarian society
where the minds,
attitudes and actions of
the subjects are
thoroughly scrutinized by
the "Thought Police",
suspected dissidents
tracked down and where
the worship of the
mythical party leader Big
Brother is forced upon the
masses. The low-ranking
party member Winston
Smith begins secretly to
question the whole

system and initiates a
forbidden love affair with
another party member.

A PopSugar Must-Read for
October! In this finger-
licking good rom-com, two
is the perfect number of
cooks in the kitchen. Nikki
DiMarco knew life
wouldn't be all sunshine
and coconuts when she
quit her dream job to help

her mom serve up mouthwatering Filipino dishes to hungry beach goers, but she didn't expect the Maui food truck scene to be so eat-or-be-eaten—or the competition to be so smoking hot. But Tiva's Filipina Kusina has faced bigger road bumps than the arrival of Callum James. Nikki doesn't care how delectable the British food truck owner is—he rudely set up shop next to her coveted beach parking spot. He's stealing her customers and fanning the flames of

a public feud that makes her see sparks. The solution? Let the upcoming Maui Food Festival decide their fate. Winner keeps the spot. Loser pounds sand. But the longer their rivalry simmers, the more Nikki starts to see a different side of Callum...a sweet, protective side. Is she brave enough to call a truce? Or will trusting Callum with her heart mean jumping from the frying pan into the fire? Fundamentals of Medium/Heavy Duty Diesel Engines

Now in dynamic full color, **SI ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING**, 5e helps students develop the

strong problem-solving skills and solid foundation in fundamental principles they will need to become analytical, detail-oriented, and creative engineers. The book opens with an overview of what engineers do, an inside glimpse of the various areas of specialization, and a straightforward look at what it takes to succeed. It then covers the basic physical concepts and laws that students will encounter on the job. Professional Profiles throughout the text highlight the work of

practicing engineers from around the globe, tying in the fundamental principles and applying them to professional engineering. Using a flexible, modular format, the book demonstrates how engineers apply physical and chemical laws and principles, as well as mathematics, to design, test, and supervise the production of millions of parts, products, and services that people use every day. Go Fire Truck! No Starch Press

Mira Michaels finally calls her old life quits. She moves out of her psychic sister's house and is on the road to her new life. Her trip to Pennsylvania starts simply, even if her cat, Arnold, can't stop backseat driving. She refuses to accept that she can hear his kitty voice, until the radio refuses to work. At a rest stop she witnesses a catnapping of the sweet kitty that Arnold has a crush on. Mira promises to chase

the catnapper across the northeast and find the cat's owner all before she must meet her realtor at her new house. Antics ensue.
