PHELPS MARQUIS

Curriculum Reform in the European Schools Routledge

In recent decades physical education has moved from the margins, redefining itself as an academic subject. An important component of this transformation has been the introduction of high-stakes examinations at key points in a student's school career and the emergence of 'examination physical education' as the dominant paradigm in many educational systems around the world. This book is the first to explore the growing international literature on examination physical education and draw on research to extend the political, academic and professional debates around the subject to explore its limitations and possibilities. Addressing key topics such as curriculum development, assessment methods, and teacher education, it seeks to assess how our existing knowledge of examination physical education can be best translated into pedagogical practice in the classroom. Complementing other texts in the Routledge Studies in Physical Education and Youth Sport Series, it makes an original and informed contribution to current

discussions of physical education. Examination Physical Education: Policy, Practice and Possibilities is important reading for any student, researcher or teacher educator with an interest in physical education, sports pedagogy and education policy.

Working with Students in Schools Springer

This impressive book brings together two major tenets of modern healthcare: person-centred care and interprofessional working, in order to utilise different perspectives on practice to identify the best treatment for the individual. In a three-part structure covering theory, ethics and practice, The Challenge of Person-Centred Care provides: jargon-free explanations of the role of person-centred care for each professional group clear advice to prepare students for practice numerous case studies and scenarios to illustrate how theory can be applied As a text that engages readers in ethical and moral debates, The Challenge of Person-Centred Care is an essential resource for health and social care students and practitioners. By inspiring critical thinking and reflection on the varied practice roles, it contributes towards improving patient experience in the future.

Examination Physical Education Routledge

In this study of student nurses at Duke University, Professor Simpson challenges earlier research

by demonstrating that a professional school does socialise its students. In addition, by constructing a model that brings together competing theories of socialisation, she finds that socialisation is not necessarily cumulative or unidirectional. Conceptualisations that focus on individual students, such as those emphasising role modelling, student values or peer relations, obscure the most significant socialisation and this structure, not its students, should be blamed for failures and praised for success.

Integrating Differentiated Instruction & Understanding by Design ASCD

Continuing its calling to define the field and where it is going, the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide, providing a panoramic view of the state of curriculum studies globally. Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide. Changes in the Second Edition: Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally. Countries absent

in the First Edition are represented: Chile, Colombia, Cypress, Ethiopia, Germany, Iran, Luxembourg, Nigeria, Peru, Poland, Portugal, Singapore, South Africa, Spain, and Switzerland. 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America. This handbook is an indispensable resource for prospective and practicing teachers, for curriculum studies scholars, and for education students around the world.

Towards a 21st Century Vision IGI Global

Australian education policy for the past 40 years has been heading in the wrong direction and is entirely unsuitable for preparing young people for the 21st century. Exaggeration? Sadly not. For a teacher, there is nothing more exhilarating than encouraging young people to realise the power of learning. But in our schools today, teachers spend so much time preparing their students for high-stakes tests, gathering data and filling in forms, that many of them feel like the life has been squeezed out of their role. Schooling has been turned into a market, and school leaders are forced to spend precious time and resources competing with other schools. Their professional experience is disregarded as policy makers turn to the corporate world and self-appointed commentators to determine curriculum and school funding. The outcome? Our schooling system is becoming more segregated; children from poorer backgrounds are falling behind; public schools are starved of funds; and good teachers are leaving. One of the most highly regarded educational leaders in Australia, Alan Reid, argues it's time to reconsider the purposes of education, the capacities we need for the future, and the strategies that will get us there. He outlines a new narrative for Australian schooling that is futures-focused and prizes flexibility, adaptability, collaboration and agility, with students, teachers and school communities at centre-stage. 'A provocative and persuasive argument for the necessity of a new narrative for Australian schooling so as to meet better the demonstrable demands of the twenty-first century...' - Emeritus Professor Bob Lingard, The University of Queensland 'At the heart of the book is a penetrating critique of neoliberalism and the damaging effects it is having on education and society. It should be essential reading for policy makers, educators, parents, and anyone interested in the current state of Australian education.' - Professor Barry Down, Murdoch University

We Are Crew UCL Press

Contributors from around the world tackle the factors that have the greatest impact on creating quality learning opportunities for students: namely policy, school leadership and teaching/teachers' lives. Drawing on a range of critical conceptual and empirical perspectives, the contributions illustrate the extent to which experience can be similar around the world. The book sheds much-needed light on the effects of mandated change upon school leaders and teachers, both nationally and internationally. It also demonstrates how teachers have coped or flourished, both because and in spite of the changing circumstances they work under.

Becoming a Student-Ready College National Academies Press

Curriculum and Students in Classrooms: Everyday Urban Education in an Era of Standardization is a timely and thought-provoking work that attends to often-neglected aspects of schooling: the everyday interactions between curriculum, teachers, and students. Walter S. Gershon addresses the bridge between the curriculum and the students, the teachers, and their everyday pedagogical decisions. In doing so, this book explores the students' perspectives of their teachers, the language arts curriculum at an urban elementary school, and how the particular combination of curriculum and teaching work in tandem to narrow students' academic and social possibilities and reproduce racial, class, and gender inequities as normal. Recommended for scholars of education and curriculum studies.

Curriculum Studies in China BRILL

Around the world, more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families, higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture and costing of public higher education abound from student activists, academics, parents, civil society and policy-makers. We know, from macro research, that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people, six years after they began their university studies. It traces how going to university influences not only their employment options, but also nurtures the agency needed to

chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good, and it provides significant conclusions pertinent to anyone who works in – and cares about – universities.

A Banner Education for Teachers Springer Science & Business Media

A complete guide to successful learning using Moodle.

Research in Mathematics Education in Australasia 2008-2011 Routledge

Designed from the ground up with a constructivist framework, BUILDING TEACHERS: A CONSTRUCTIVIST APPROACH TO INTRODUCING EDUCATION, 2nd Edition helps future teachers create their own understanding of education. As the authors address the key topics generally covered in an introductory book, they encourage readers to develop their own understandings by connecting their prior knowledge, experiences, and biases with new experiences to which they will be exposed during the course. Highlights of the new edition include stronger standards integration and expanded material on diversity and technology. By interacting with the materials presented, rather than merely memorizing the book's content, readers learn what teaching is all about in an exploratory, inquiring, constructivist-based manner. In turn, they can help the children in their classrooms learn meaningfully. Available with InfoTrac Student Collections <http://goengage.com/infotrac>. The Secondary School Curriculum: Content and Structure CUP Archive

To reach the highest standards of instrumental performance, several years of sustained and focused learning are required. This requires perseverance, commitment and opportunities to learn and practise, often in a collective musical environment. This book brings together a wide range of enlightening current psychological and educational research to offer deeper insights into the mosaic of factors and related experiences that combine to nurture (and sometimes hinder) advanced musical performance. Each of the book's four sections focus on one aspect of music performance and learning: musics in higher education and beyond; musical journeys and educational reflections; performance learning; and developing expertise and professionalism. Although each chapter within its home section offers a particular focus, there is an underlying conception across all the book's contents of the achievability of advanced musical performance and of the important nurturing role that higher education can play, particularly if policy and practice are evidence-based and draw on the latest international research findings. The narrative offers an insight into the world of advanced musicians, detailing their learning journeys and the processes involved in their quest for the development of expertise and professionalism. It is the first book of its kind to consider performance learning in higher education across a variety of musical genres, including classical, jazz, popular and folk musics. The editors have invited an international community of leading scholars and performance practitioners to contribute to this publication, which draws on meticulous research and critical practice. This collection is an essential resource for all musicians, educators, researchers and policy makers who share our interest in promoting the development of advanced performance skills and professionalism.

The Course Reflection Project Prentice Hall

Folklife Center NewsA Connected Curriculum for Higher EducationUCL Press

Science Education as a Pathway to Teaching Language Literacy Lexington Books

A complementary volume to Dilly Fung's A Connected Curriculum for Higher Education (2017), this book explores 'research-based education' as applied in practice within the higher education sector. A collection of 15 chapters followed by illustrative vignettes, it showcases approaches to engaging students actively with research and enquiry across disciplines. It begins with one institution's creative approach to research-based education – UCL's Connected Curriculum, a conceptual framework for integrating research-based education into all taught programmes of study – and branches out to show how aspects of the framework can apply to practice across a variety of institutions in a range of national settings. The 15 chapters are provided by a diverse range of authors who all explore research-based education in their own way. Some chapters are firmly based in a subject-discipline – including art history, biochemistry, education, engineering, fashion and design, healthcare, and veterinary sciences – while others reach across geopolitical regions, such as Australia, Canada, China, England, Scotland and South Africa. The final chapter offers 12 short vignettes of practice to highlight how engaging students with research and enquiry can enrich their learning experiences, preparing them not only for more advanced academic learning, but also for professional roles in complex, rapidly changing social contexts.

The Nordic Education Model Springer Science & Business Media

Shows how to combine two effective frameworks to provide a comprehensive approach to ensure all students are learning at maximum levels.

A Longitudinal Study of Socialization Cengage Learning

Rutgers University's Douglass Residential College is the only college for women that is nested within a major public research university in the United States. Although the number of women's colleges has plummeted from a high of 268 in 1960 to 38 in 2016, Douglass is flourishing as it approaches its centennial in 2018. To explore its rich history, Kayo Denda, Mary Hawkesworth, Fernanda H. Perrone examine the strategic transformation of Douglass over the past century in relation to continuing debates about women's higher education. The Douglass Century celebrates the college's longevity and diversity as distinctive accomplishments, and analyzes the contributions of Douglass administrators, alumnae, and students to its survival, while also investigating multiple challenges that threatened its existence. This book demonstrates how changing historical circumstances altered the possibilities for women and the content of higher education, comparing the Jazz Age, American the Great Depression, the Second World War, the post-war Civil Rights era, and the resurgence of feminism in the 1970s and 1980s. Concluding in the present day, the authors highlight the college's ongoing commitment to Mabel Smith Douglass' founding vision, "to bring about an intellectual quickening, a cultural broadening in connection with specific training so that women may go out into the world fitted...for leadership...in the economic, political, and intellectual life of this nation." In addition to providing a comprehensive history of the college, the book brings its subjects to life with eighty full-color images from the Special Collections and University Archives, Rutgers University Libraries.

Routledge

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Moodle E-Learning Course Development Rutgers University Press

Scholars from three continents collaborate to create a truly global understanding of curriculum in the world's most populous country. This book discusses major topics in curriculum studies in China and shows how Chinese scholars understand their field's history, circumstances, and place in a globalized world.

Research-Based Education in Practice Packt Publishing Ltd

Boost student success by reversing your perspective on college readiness The national conversation asking "Are students college-ready?" concentrates on numerous factors that are beyond higher education's control. Becoming a Student-Ready College flips the college readiness conversation to provide a new perspective on creating institutional value and facilitating student success. Instead of focusing on student preparedness for college (or lack thereof), this book asks the more pragmatic question of what are colleges and universities doing to prepare for the students who are entering their institutions? What must change in an institution's policies, practices, and culture in order to be student-ready? Clear and concise, this book is packed with insightful discussion and practical strategies for achieving your ambitious student success goals. These ideas for redesigning practices and policies provide more than food for thought—they offer a real-world framework for real institutional change. You'll learn: How educators can acknowledge their own biases and assumptions about underserved students in order to allow for change New ways to advance student learning and success How to develop and value student assets and social capital Strategies and approaches for creating a new student-focused culture of leadership at every level To truly become student-ready, educators must make difficult decisions, face the pressures of accountability, and address their preconceived notions about student success head-

on. Becoming a Student-Ready College provides a reality check based on today's higher education environment.

International Handbook of Curriculum Research Psychology Press

Moodle is the leading open source e-learning management system. Using Moodle, teachers and professors can easily construct richly-textured web-based courses. A course can consist of a number of lessons, with each lesson including reading materials; activities such as quizzes, tests, surveys, and projects; and social elements that encourage interaction and group work between students. Packed with clear step-by-step instructions, plenty of screenshots, and thorough explanations, this book guides you through the many features and options that you have to choose from when using Moodle 2.8. Throughout this book, you will follow an example course that will help

you to explore the sort of decisions, design considerations, and thought processes that goes into developing a successful course. This book will show you how to use every feature of Moodle to meet your course goals. Moodle is relatively easy to install and use, but the real challenge is to develop a learning process that leverages its power and maps effectively onto the content-established learning situation. This book guides you through meeting that challenge.

Curriculum and Students in Classrooms John Wiley & Sons

Elinor Miller, a long-time classroom teacher and curriculum specialist, provides her insights into educating students with diverse backgrounds and learning abilities. This book, a sequel to *A Banner Experience*, describes her educational experiences before she moved to Frederick, MD, and

explains why and how she established The Banner School there in 1982. Elinor is a teacher's teacher for sure! Not only does she understand the many obligations teachers have, she is also a grammarian of the first order, providing detailed direction on this subject. Her understanding of the benefits of challenging students to master difficult work and memorize poetry will motivate many teachers. Her award-winning methods and high level of experience with organizing interdisciplinary science and social studies topics will encourage others to immerse their students in any of ten science topics and sixteen cultures of both the Old and New World. This book is worth more than its price just for its extensive resources, including *Word Web Vocabulary*, *101 Ways to Attack a Writing Assignment* and *CommuniCards*, the latter a must for every classroom as it pinpoints the confusion many students exhibit with specific mathematical and language concepts.
