### End of History and the Last Man Chronicle Books

From 1820 to 1990 the share of world income going to today's wealthy nations soared from 20% to 70%. That share has recently plummeted. Richard Baldwin shows how the combination of high tech with low wages propelled industrialization in developing nations, deindustrialization in developed nations, and a commodity supercycle that is petering out.

### The Rise of Disaster Capitalism Oxford University Press

Two teenagers are killed in a tragic vehicular homicide one night in Texas. Should the 19-year-old drunk driver plead guilty? If so, how long a prison sentence would await him? This nonfiction narrative follows his painful journey, as well as those of his victims' families. Is it possible for victims of violent crime to confront criminals face-to-face? Eventually, the young prisoner becomes involved in some of the first victim-offender dialogues in the country

and discovers restorative justice. This true story, both sobering and hopeful, will touch teenagers, teachers, parents, counselors, and professionals in the field. There is a Balm in Huntsville gives hope to all who are confronted by misfortune.

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures

have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

#1 NEW YORK TIMES BESTSELLER • A dramatic expansion of a groundbreaking work of journalism, *The 1619 Project: A New Origin Story* offers a profoundly revealing vision of the American past and present. ONE OF THE BEST BOOKS OF THE YEAR: *The Washington Post*, *NPR*, *Esquire*, *Marie Claire*, *Electric Lit*, *Ms. magazine*, *Kirkus Reviews*, *Booklist* In late August 1619, a ship arrived in the British colony of Virginia bearing a cargo of twenty to thirty enslaved people from Africa. Their arrival led to the barbaric and unprecedented system of American chattel slavery that would last for the next 250 years. This is sometimes referred to as the country's original sin, but it is more than that: It

is the source of so much that still defines the United States. The New York Times Magazine's award-winning "1619 Project" issue reframed our understanding of American history by placing slavery and its continuing legacy at the center of our national narrative. This new book substantially expands on that work, weaving together eighteen essays that explore the legacy of slavery in present-day America with thirty-six poems and works of fiction that illuminate key moments of oppression, struggle, and resistance. The essays show how the inheritance of 1619 reaches into every part of contemporary American society, from politics, music, diet, traffic, and citizenship to capitalism, religion, and our democracy itself. This is a book that speaks directly to our current moment, contextualizing the systems of race and caste within which we operate today. It reveals long-glossed-over truths around our nation's founding and construction—and the way that the legacy of slavery did not end with emancipation, but continues to shape contemporary American

life. A New Origin Story

Harvard University Press

In the mid 1700s, around the age of eleven, Olaudah Equiano and his sister were kidnapped from their village in equatorial Africa and sold to slavers. Within a year he was aboard a European slave ship on his way to the Caribbean. The Interesting Narrative of the Life of Olaudah Equiano, or Gustavus Vassa, the African was published by the author in 1789 and is part adventure story, part treatise on the corrupting power of slavery, and part tract about the transformative powers of Christianity. Equiano's story takes him from Africa to the Americas, back across the Atlantic to England, into the Mediterranean, and even north to the ice packs, on a mission to discover the North-East passage. He fights the French in the Seven Year's War, is a mate and merchant in the West Indies, and eventually becomes a freedman based in London. The Interesting Narrative of the Life of Olaudah Equiano was one of the first popular slave narratives and was reprinted eight times in the author's lifetime. While modern scholars value this account as an

important source on the life of the eighteenth-century slave and the transition from slavery to freedom, it remains an important literary work in its own right. As a valuable part of the African and African-American canons, it is still frequently taught in both English and History university courses. The publication of the King James version of the Bible, translated between 1603 and 1611, coincided

with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

"A friend in history," Henry David Thoreau once wrote, "looks like some premature soul." And in the history of friendship in early America, Caleb Crain sees the soul of the nation's literature. In a sensitive analysis that weaves together literary criticism and historical narrative, Crain describes the strong friendships between men that supported and inspired some of America's greatest writing--the Gothic novels of Charles Brockden Brown, the essays of

Ralph Waldo Emerson, and the novels of Herman Melville. He traces the genealogy of these friendships through a series of stories. A dapper English spy inspires a Quaker boy to run away from home. Three Philadelphia gentlemen conduct a romance through diaries and letters in the 1780s. Flighty teenager Charles Brockden Brown metamorphoses into a horror novelist by treating his friends as his literary guinea pigs. Emerson exchanges glances with a Harvard classmate but sacrifices his crush on the altar of literature--a decision Margaret Fuller invites him to reconsider two decades later.

Throughout this engaging book, Crain demonstrates the many ways in which the struggle to commit feelings to paper informed the shape and texture of American literature. *Growth and Poverty in Sub-Saharan Africa* Beacon Press

The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether

covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent

culmination of a radical economic project that has been incubating for fifty years.

Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the

margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and "forgotten" peoples.  The award-winning author of *Before You Suffocate Your Own Fool Self* brings her signature voice and insight to the subjects of race, grief, apology, and American history. Danielle Evans is widely acclaimed for her blisteringly smart voice and X-ray insights into complex human relationships. With *The Office of Historical Corrections*, Evans zooms in on particular moments and relationships in her characters' lives in a way that allows them to speak to larger issues of race, culture, and history. She introduces us to Black and multiracial characters who are experiencing the universal confusions of lust and love, and getting walloped by grief—all while exploring how history haunts us, personally and collectively. Ultimately, she provokes us to think about the truths of American history—about who gets to tell them, and

the cost of setting the record straight. In "Boys Go to Jupiter," a white college student tries to reinvent herself after a photo of her in a Confederate-flag bikini goes viral. In "Richard of York Gave Battle in Vain," a photojournalist is forced to confront her own losses while attending an old friend's unexpectedly dramatic wedding. And in the eye-opening title novella, a black scholar from Washington, DC, is drawn into a complex historical mystery that spans generations and puts her job, her love life, and her oldest friendship at risk.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is *The 9/11 Commission Report*, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the

National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

Qian is just seven when she moves to America, the 'Beautiful Country', where she and her parents find that the roads of New York City are not paved with gold, but crushing fear and scarcity. Unable to speak English at first, Qian and her parents must work wherever they can to survive, all while she battles hunger and loneliness at school. Thus begins an extraordinary story that describes, in

vivid colours, days labouring in sweatshops and sushi factories, nights scavenging the streets for furniture, and the terrifying moment when the family emerges from the shadows to seek emergency medical treatment for Qian's mother. In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in

delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

While the economic growth renaissance in sub-Saharan Africa is widely recognized, much less is known about progress in living conditions. This book comprehensively evaluates trends in living conditions in 16 major sub-Saharan African countries, corresponding to nearly 75% of the total population. It shows how some countries have seen little economic growth and progress for the poor whilst others have made impressive progress in key non-monetary indicators of wellbeing.
