The cultures and politics of nations around the world may be understood (or misunderstood) in any number of ways. For the Arab world, language is the crucial link for a better understanding of both. Classical Arabic is the official language of all Arab states although it is not spoken as a mother tongue by any group of Arabs. As the language of the Qur'an, it is also considered to be sacred. For more than a century and a half, writers and institutions have been engaged in struggles to modernize Classical Arabic in order to render it into a language of contemporary life. What have been the achievements and failures of such attempts? Can Classical Arabic be sacred and contemporary at one and the same time? This book attempts to answer such questions through an interpretation of the role that language plays in shaping the relations between culture, politics, and religion in Egypt.

The Ju/'hoan San, or Ju/'hoansi, of Namibia and Botswana are perhaps the most fully described indigenous people in all of anthropology. This is the story of how this group of former hunter-gatherers, speaking an exotic click language, formed a grassroots movement that led them to become a dynamic part of the new nation that grew from the ashes of apartheid South West Africa. While coverage of this group in the writings of Richard Lee, Lorna Marshall, Elizabeth Marshall Thomas, and films by John Marshall includes extensive information on their traditional ways of life, this book continues the story as it has unfolded since 1990. Peopled with accounts of and from contemporary Ju>'hoan people, the book gives newly-literate Ju/'hoansi the chance to address the world with their own voices. In doing so, the images and myths of the Ju/'hoan and other San (previously called "Bushmen") as either noble savages or helpless victims are discredited. This important book demonstrates the responsiveness of current anthropological advocacy to the aspirations of one of the best-known indigenous societies.

#### **Invitation to Social and Cultural Anthropology** Cambridge University Press

Over the past decade, conducting empirical research in linguistics has become increasingly popular. The first of its kind, this book provides an engaging and practical introduction to this exciting versatile field, providing a comprehensive overview of research aspects in general, and covering a broad range of subdiscipline-specific methodological approaches. Subfields covered include language documentation and descriptive linguistics, language typology, corpus linguistics, sociolinguistics and anthropological linguistics, cognitive linguistics and psycholinguistics, and neurolinguistics. The book reflects on the strengths and weaknesses of each single approach and on how they interact with one-another across the study of language in its many diverse facets. It also includes exercises, example student projects and recommendations for further reading, along with additional online teaching materials. Providing hands-on experience, and written in an engaging and accessible style, this unique and comprehensive guide will give students the inspiration they need to develop their own research projects in empirical linguistics.

THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. If you want to know what anthropology is, look at what anthropologists do. This Very Short Introduction to Social and Cultural Anthropology combines an accessible account of some of the disciplines guiding principles and methodology with abundant examples and illustrations of anthropologists at work. Peter Just and John Monaghan begin by discussing anthropologys most important contributions to modern thought: its investigation of culture as a distinctively human characteristic, its doctrine of cultural relativism, and its methodology of fieldwork and ethnography. They then examine specific ways in which social and cultural anthropology have advanced our understanding of human society and culture, drawing on examples from their own fieldwork. The book ends with an assessment of anthropologys present position, and a look forward to its likely future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Routledge Handbook of Linguistic Anthropology is a broad survey of linguistic anthropology, featuring contributions from prominent scholars in the field. Each chapter presents a brief historical summary of research in the field and discusses topics and issues of current concern to people doing research in linguistic anthropology. The handbook is organized into four parts - Language and Cultural Productions; Language Ideologies and Practices of Learning; Language and the Communication of Identities; and Language and Local/Global Power - and covers current topics of interest at the intersection of the two fields, while also contextualizing them within discussions of fieldwork practice. Featuring 30 contributions from leading scholars in the field, The Routledge Handbook of Linguistic Anthropology is an essential overview for students and researchers interested in understanding core concepts and key issues in linguistic anthropology.

**Language, Culture, and Communication** Prentice Hall

Cultural Anthropology introduces students to the concepts and methods that anthropologists bring to the study of cross-cultural diversity, while encouraging students to see what is going on in the world and how it affects cultures. By presenting extended examples from a variety of cultures and incorporating the voices of these peoples, best-selling author Nancy Bonvillain brings the study of cultural anthropology to life, so that students may come to understand the global processes that affect us all. This is the only book that integrates the important issues of globalization and culture change in every chapter, and the new Canadian edition includes an eclectic mix of Canadian content, cultural anthropology, art and urban anthropology. With a unique character and a theoretically neutral standpoint, and incorporating numerous examples, Cultural Anthropology presents a dynamic view of living cultures for today's students.

Evaluators have always worked in diverse communities, and the programs they evaluate are designed to address often intractable socio-political and economic issues. Evaluations that explicitly aim to be more responsive to culture and cultural context are,

however, a more recent phenomenon. In this book, Jill Anne Chouinard and Fiona Cram utilize a conceptual framework that foregrounds culture in social inquiry, and then uses that framework to analyze empirical studies across three distinct cultural domains of evaluation practice (Western, Indigenous and international development). Culturally Responsive Approaches to Evaluation provide a comparative analysis of these studies and discuss lessons drawn from them in order to help evaluators extend their current thinking and practice. They conclude with an agenda for future research.

This synthesis of modern economic anthropology goes to the heart of a thriving subdiscipline and identifies the fundamental practical and theoretical problems that give economic anthropology its unique strengths and vision. More than any other anthropological subdiscipline, economic anthropology constantly questions and debates the practical motives of people as they go about their daily lives. Tracing the history of the dialogue between anthropology and economics, the authors move economic anthropology beyond the narrow concerns of earlier debates and place the field directly at the centre of current issues in the social sciences. They focus on the unique strengths of economic anthropology as a meeting place for symbolic and materialist approaches and for understanding human beings as both practical and cultural. In so doing, the authors argue for the wider relevance of economic anthropology to applied anthropology and identify other avenues for interaction with economics, sociology, and other social and behavioural sciences. The second edition of *Economies and Cultures* contains an entirely new chapter on gifts and exchange that critically approaches the new literature in this area, as well as a thoroughly updated bibliography and guide for students for finding case studies in economic anthropology.
