Principi di farmacologia. Le basi fisiopatologiche della terapia FrancoAngeli
 This volume contains refereed manuscripts prepared from presentations made at the 21h annual meeting of the International Society on Oxygen Transport to Tissue (ISOTT). The meeting was held in Hanover, NH, USA, at Dartmouth Medical School, the 3rd oldest medical school in the USA. ISOTT attempts to produce high quality pUblications on cutting edge topics relating to oxygen in living systems. The goal is to allow contributors to contribute original data, as with a main-stream journal article, but also to voice individual opinions and ideas in a more relaxed scientific forum. The meeting brought together an international group of scientists who share a common interest in the measurement and role of oxygen in living systems. The organizers of ISOTT99 made a special effort to bring together people from industry, medicine, and basic sciences in order to improve the links in the chain of discovery through to application. As a result, this volume contains publications on a range of subjects. There are contributions from companies on modifiers of oxygen carrying capacity (allosteric modifiers of hemoglobin and infusible oxygen carriers or blood substitutes); technical reports on oxygen measurement devices including advances in near-infrared spectroscopy and imaging, oxygen electrodes, magnetic resonance spectroscopy and imaging, and fluorecence based measurements. There are medically related sections on modifying and measuring tumor

oxygenation in order to improve therapy, assessment and interpretation of oxygenation in the central nervous system, and general issues relating oxygen to pathological conditions.

Terapia precoce sinergica della Covid-19. Basi farmacologiche e osservazioni cliniche CRC Press

The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACVC) of the ESC. Cardiovascular diseases (CVDs) are a major cause of premature death worldwide and a cause of loss of disability-adjusted life years. For most types of CVD early diagnosis and intervention are independent drivers of patient outcome. Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients. This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care, not only cardiologists but also critical care specialists, emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues, cooperation among professionals, and interaction with other specialities in medicine. SECTION 1 focusses on the definition, structure, organisation and function of ICCU's, ethical issues and quality of care. SECTION 2 addresses the pre-hospital and immediate in-hospital (ED) emergency cardiac care. SECTIONS 3-5 discuss patient monitoring, diagnosis and specific procedures. Acute coronary syndromes (ACS), acute decompensated heart failure (ADHF), and serious arrhythmias form SECTIONS 6-8. The main other cardiovascular acute conditions are grouped in SECTION 9. Finally SECTION 10 is dedicated to the many concomitant

acute non-cardiovascular conditions that contribute to the patients' case mix in ICCU. This edition includes new chapters such as low cardiac output states and cardiogenic shock, and pacemaker and ICDs: troubleshooting and chapters have been extensively revised. Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures, tables, and videos to better illustrate diagnostic and therapeutic techniques and procedures in IACC. The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and improved quality of care across the field.

Frutto di oltre trenta anni di studio, riflessione e approfondimento, il presente volume non vuole essere una guida semplicistica su come vivere a lungo né tantomeno un libro atto a rivelare una miracolosa panacea in grado di guarire ogni malattia, bensì un viaggio dove esperienza personale e ricerca si fondono per dare al lettore una visione che pone al centro l'essere umano e il suo bene più prezioso: la propria salute.

Opie's Cardiovascular Drugs: A Companion to Braunwald's Heart Disease E-Book Edizioni Mediterranee

A new addition to the Gynecology in Practice series, Chronic Pelvic Pain provides a practical guide to diagnosing and treating chronic pelvic pain in women. Emphasizing diagnosis, management and psychological aspects, the book assists gynecologists to better care for their patients suffering from this condition. As a part of the series, various feature boxes are highlighted throughout. "Tips and Tricks" give suggestions on how to improve outcomes through practical technique or patient questioning. In addition, "Caution" warning boxes supply helpful advice on how to avoid problems and "Science Revisited" boxes offer quick reminders of the basic science principles necessary for understanding the presented concepts.

È con vivo piacere che presento quest'ultima opera del Prof. Carlo Gaudio, Direttore del Dipartimento Cuore e Grossi Vasi "A. Reale" e Professore di Malattie dell'Apparato Cardiovascolare nella prima Facoltà di Medicina dell'Università "La Sapienza" di Roma, non nuovo ad impegni editoriali, che si aggiungono ad una vasta produzione di articoli scientifici originali, pubblicati sulle migliori riviste italiane ed internazionali di Cardiologia. (...) Il risultato è un'opera estremamente completa, accurata, aggiornata ed allo stesso tempo omogenea, perchè adeguatamente coordinata. L'auspicio è che sia fruibile con profitto sia dagli studenti del Corso di Laurea di Medicina e Chirurgia, sia dagli specializzandi della Scuola di Cardiologia, sia, inÿne, dagli studiosi del settore. (Dalla presentazione del Professor Luigi Frati)

This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well. New chapters in this edition include hyperthermia and hypothermia syndromes; infection control in the ICU; and severe airflow obstruction. Sections have been reorganized and consolidated when appropriate to reinforce concepts.

During the past two decades, fish endocrinology has witnessed exciting developments due to our increased knowledge at all levels of biological organizations, including molecular biology, cell biology, physiology and behavior. New insights into development, neurobiology, immunology and molecular genetics closely correlated with classical aspects of endocrinology and represent important contributions to our knowledge on regulatory processes of vertebrates, including fish. The purpose of this book is to overview major advances in numerous research areas of fish endocrinology. Most of the chapters not only review and discuss the state-of-the-art in the respective field, but also show perspectives of future research. The book will be of interest to scientists involved in basic fish research, comparative endocrinology, fisheries and aquaculture as well as for students of fish biology.
