Guía Práctica de Enfermería Médico-Quirúrgica Sourcebooks, Inc.
 To help you plan patient-focused care, these authors and contributors have assembled only the needed information found in large medical-surgical textbooks and other more cumbersome manuals. With more than 145 health alterations focusing on NANDA-approved nursing diagnoses that are specific to each disorder and Nursing Intervention Classification (NIC), this manual provides a quick but important review of pathophysiology, physical assessment, diagnostic testing, collaborative management, and patient/family teaching and discharge planning data.

A compact, readable and highly-authoritative source of critical neurosurgical information, Neurosurgery has been produced with the participation of some of the world's leading neurosurgeons and neuroclinicians and is based on the curriculum of British, European and North American neurosurgical training programs. The book is extensively illustrated with hundreds of figures demonstrating the imaging features of all major neurosurgical pathologies, including diagrams explaining key anatomical and surgical concepts, and images showing the features of common brain tumours. There are key references at the end of each chapter and critical commentary of neurosurgical literature is also included. The handbook concisely covers all aspects of adult and paediatric neurosurgery. It is systematically and clearly broken down into easy-to-follow sections such as introductory basic concepts, definitions, epidemiology, pathology, clinical and neuroradiological characteristics, clinical management and decision making. Additional sections on operative treatment include the key critical surgical anatomy, and clear, step-by-step descriptions of common surgical techniques. Widely accepted practice guidelines, major classification schemes and common scales are clearly presented and explained.

Step Into Mesopotamia Routledge

This book distills thirty years of research on the impacts of jail and prison environments. The research program began with evaluations of new jails that were created by the US Bureau of Prisons, which had a novel design intended to provide a non-traditional and safe environment for pre-trial inmates and documented the stunning success of these jails in reducing tension and violence. This book uses assessments of this new model as a basis for considering the nature of environment and behavior in correctional settings and more broadly in all human settings. It provides a critical review of research on jail environments and of specific issues critical to the way they are experienced and places them in historical and theoretical context. It presents a contextual model for the way environment influences the chance of violence.

Research on Technology Enhanced Learning (TEL) investigates how information and communication technologies can be designed in order to support pedagogical activities. The workshop proceedings collect contributions concerning evidence based TEL systems, like their design following EBD principles as well as studies or best practices that educators, education stakeholders or psychologists used to diagnose or improve their students' learning skills, including students with specific difficulties. The international ebTEL'12 workshop wants to be a forum in which TEL researchers and practitioners alike can discuss ideas, projects, and lessons related to ebTEL. The workshop takes place in Salamanca, Spain, on March 28th-30th 2012.

THERE ARE MANY SECRETS FOR SUCCESS, AND THIS ONE IS THE MOST EFFECTIVE Imagine creating a habit that builds the ideal life and that, at the same time, is the origin of all the good habits you wish for yourself. This book, based on the experiences of the author, reveals the Superpower that gave him everything in life. The author explains how discipline became his sole secret weapon to achieve his goals. Additionally, he explains anecdotally and provides a vision that will change your mentality and behavior. Such a simple habit, available to everyone, and so easy that its power to change any life and take it to the yearned ideal is surprising. This intense reading will inspire you to: Pass to immediate action Live from meaning Develop habits to be unstoppable Defeat internal resistance Enter a state of Flow Create automatic habits The author shares real examples of how the Superpower of discipline led him to achieve, in autopilot, his personal and professional goals. Say "Enough!" to procrastination and pass to action. THIS BOOK HOLDS THE KEY TO ACHIEVING YOUR GOALS

Bosquejos de Sermones de Toda la Biblia Oxford University Press

Gain a better understanding of the complex issues that will decide the future of health care! This is the first book of its kind in the rapidly growing field of complementary and alternative medicine. It addresses quality-of-care concerns and also focuses on the goals of many practitioners: to secure a firm place for their practice in health care systems and to establish levels of integration. Professionalism and Ethics in Complementary and Alternative Medicine is a unique textbook, but is also an essential resource for practitioners of complementary, alternative, and conventional medicine as well as the general public. This volume is divided into three parts. The first looks at a range of current concerns over complementary and alternative medicine, many of which raise ethical issues relating to quality of care. The next section, focusing on professionalism, indicates how practitioners must respond to the public's concerns, especially in light of the public's rising expectations of standards of care among all practitioners. The third part is comprised of case histories plus commentaries suitable for private study or classroom discussion. In this valuable book you will find: an examination of current issues in complementary/alternative medicine and bioethics explorations of other approaches to ethical dilemmas including "bottom-up" ethics such as consequentialism and social utilitarianism plus feminist ethics, virtue ethics, and more informed discussion of public expectations of professional roles and responsibilities case histories that illustrate ethical issues explanations of the Hippocratic Oath and complementary and alternative medicine codes an examination of the power structure within health care systems and much, much more! Growing from a course on ethics and law at the Homeopathic College of Canada in Toronto, Professionalism and Ethics in Complementary and Alternative Medicine will benefit everyone who is concerned with quality care and integrated medicine.
