Refreshes the parts other history books can't reach... A bit ropy on the Renaissance? In the dark about the Enlightenment? Or, in fact, do you need a revision course on the entire history of the world and want to read a witty, irreverent, definitely not boring romp through everything that has ever happened on planet earth - from 15 billion years BC to the present day? Good. A Less Boring History of the World tells you

everything you need to know from the Big Bang to Barack Obama, taking in the Byzantines, the Black Death, Bin Laden and the fall of bankers along the way, all boiled down to bite size chunks so that you can finally piece together all the different bits of history - and see how on earth we ended up in the mess we are today. A Less Boring History refreshes your memory and broadens your mind. And, if that's not enough, it will also make you laugh. A lot.

*These Truths: A History of the United States* Hachette UK

From the dawn of civilization to the modern dilemmas of nation building in Africa and the Middle East, THE ESSENTIAL WORLD HISTORY offers you a fascinating look at the common challenges and experiences that unite the human past and inform the future. Authors Duiker and Spielvogel use colorful visuals, maps, dramatic first-hand historical accounts and even reviews of popular movies to give you an insightful perspective on the human experience over time. The easy-to-read narrative is organized around seven major themes (Science

and Technology, Art and Ideas, Family and Society, Politics and Government, Earth and the Environment, Religion and Philosophy and Interaction and Exchange). Important to all cultures from all time periods, these themes help you understand the course of world history, make connections across chapters and see today's world in a meaningful context. World history has expanded dramatically in recent years, primarily as a teaching field, and increasingly as a research field. Growing numbers of teachers and Ph.Ds in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course.

Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also

requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. In this book, Patrick Manning provides the first comprehensive overview of the academic field of world history. He reviews patterns of research and debate, and proposes guidelines for study by teachers and by researchers in world history.

The Great Lakes are the largest collection of fresh surface water on earth, and more than 40 million Americans and Canadians live in their basin. Will we divert water from the Great Lakes, causing them to end up like Central Asia's Aral Sea, which has lost 90 percent of its surface area and 75 percent of its volume since 1960? Or will we come to see that unregulated water withdrawals are ultimately catastrophic? Peter Annin writes a fast-paced account of the people and stories behind these upcoming battles. Destined to be the definitive story for the general public as well as policymakers, *The Great Lakes Water Wars* is a

balanced, comprehensive look behind the scenes at the conflicts and compromises that are the past-and future-of this unique resource.

NEW YORK TIMES BESTSELLER NEW YORK TIMES • 10 BEST BOOKS OF THE YEAR NATIONAL BESTSELLER *The Atlantic*: 10 Best Books of 2022 Best Books of the Year: Washington Post, New Yorker, Salon, Foreign Affairs, New Statesman, Chicago Public Library, Vroman's "[L]ike reading a great tragicomic Irish novel." —James Wood, *The New Yorker* "Masterful . . . astonishing." —Cullen Murphy, *The Atlantic* "A landmark history . . . Leavened by the brilliance of O'Toole's insights and wit." —Claire Messud, *Harper's Winner* • 2021 An Post Irish Book Award — Nonfiction Book of the Year • from the judges: "The most remarkable Irish nonfiction book I've read in the last 10 years"; "[A] book for the ages." A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world.

Fintan O’Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don’t Know Ourselves*, O’Toole, one of the Anglophone world’s most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary “backwater” to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O’Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland’s main export was beef and it was still not unknown for herds of cattle to clatter down

Dublin’s streets. Yet the Westerns were a sign of what was to come. O’Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern Ireland, which led most Irish to reject violent nationalism. In O’Toole’s telling, America became a lodestar, from John F. Kennedy’s 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O’Toole in coruscating prose captures the peculiar Irish habit of “deliberate unknowing,” which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don’t Know Ourselves* is a landmark work, a memoir and a national history that

ultimately reveals how the two modes are entwined for all of us.

There are hundreds of travel guides that tell you all the good things about a place and gloss over the not so good. This guide acts as an antidote to that and tells you what you really want to know. What are the chances of leaving the place alive? Will the food kill you, or will it be the water? How friendly or violent are the locals? Most of the time you don’t get to know this until you’re actually there – but by then it’s too late. ‘101 Places Not to Visit’ takes you through a selection of cities and countries that any wise traveller should give a miss. Its tongue-in-cheek, laugh-out-loud humour outlines every not-so-attractive element of each place. A star rating of boredom, likelihood of fatal visit, friendliness of people and ease of travelling is included at the start of each entry to give the reader a taster. This is followed by an historical outline, its culture – or lack of it – and what culinary delights you can hope to endure. All the well-researched facts are sure to put off any foolish potential visitor. Well, at

least they have been warned! Arranged by continent, the chapters are in alphabetical order for easy reference and concentrate on each nation's cities. History, climate and visas are all discussed with extra box text as appropriate.

This *Fleeting World* is the smallest book of big history, telling the story of the universe and history of humanity in less than one hundred pages. Prize-winning historian David Christian covers it all in this compact, accessible, and inspiring guide to the history of everything, from stars and empires to cities, the World Wide Web, capitalism, and globalization. David Christian's approach to human history and big history is a call to action, based on a profound and fresh understanding of our place in the universe. This book is essential reading for our time. David Christian asks big questions. Will contemporary challenges will lead to the emergence of a new global system capable of ecological, economic, and political stability? Or is the accelerating pace of change a prelude to a sudden, sharp collapse

that will drive many parts of the world back to the productivity levels of the early agrarian era? He presents our origin story and the history of women and men across the entire world, within the framework of the universe explaining, for example, that the chemicals we are made of come from supernovae. He tells the human story as a story of changes: changes in the ways we produce and distribute food, move from place to place, organize ourselves into communities, explore and populate our environment, and both create and respond to crises. He gives us maps of time, history on different temporal-spatial scales, and even offers paths to locate evidence that might challenge his big story. Big history leads to strategies for building a more sustainable world, and Berkshire Publishing is proud to offer this new edition of a big history for our common future. The 2018 edition has been expanded and updated for the general reader; there is also an earlier edition designed for use with AP World History and other courses, which included a teachers' guide.

In the first book to argue for the benefits of boredom, Peter Toohey dispels the myth that it's simply a childish emotion or an existential malaise like Jean-Paul Sartre's nausea. He shows how boredom is, in fact, one of our most common and constructive emotions and is an essential part of the human experience. This informative and entertaining investigation of boredom--what it is and what it isn't, its uses and its dangers--spans more than 3,000 years of history and takes readers through fascinating neurological and psychological theories of emotion, as well as recent scientific investigations, to illustrate its role in our lives. There are Australian aboriginals and bored Romans, Jeffrey Archer and caged cockatoos,

Camus and the early Christians, Durer and Degas. Toohey also explores the important role that boredom plays in popular and highbrow culture and how over the centuries it has proven to be a stimulus for art and literature. Toohey shows that boredom is a universal emotion experienced by humans throughout history and he explains its place, and value, in today's world. "Boredom: A Lively History" is vital reading for anyone interested in what goes on when supposedly nothing happens.

A superb history of the world's people during the last four million years, beginning before the human race moved out of Africa to explore and settle the other continents. Mr. Blainey explores the development of technology and skills, the rise of major religions, and the role of geography, considering both the larger patterns and the individual nature of history. A delightful read, gracefully written, and full of odd and interesting pieces of information as well as

thoughtful comparisons that span both time and space. —William L. O'Neill

"Should be in the hands of every history teacher in the country." — Howard Zinn  
James Loewen has revised Teaching What Really Happened, the bestselling, go-to resource for social studies and history teachers wishing to break away from standard textbook retellings of the past. In addition to updating the scholarship and anecdotes throughout, the second edition features a timely new chapter entitled "Truth" that addresses how traditional and social media can distort current events and the historical record. Helping students understand what really happened in the past will empower them to use history as a tool to argue for better policies in the present. Our society needs engaged citizens now more than ever, and this book offers teachers concrete ideas for getting students excited about history while also

teaching them to read critically. It will specifically help teachers and students tackle important content areas, including Eurocentrism, the American Indian experience, and slavery. Book Features: An up-to-date assessment of the potential and pitfalls of U.S. and world history education. Information to help teachers expect, and get, good performance from students of all racial, ethnic, and socioeconomic backgrounds. Strategies for incorporating project-oriented self-learning, having students conduct online historical research, and teaching historiography. Ideas from teachers across the country who are empowering students by teaching what really happened. Specific chapters dedicated to five content topics usually taught poorly in today's schools.

Discover the world records that define our history and jump headfirst into the past using scientific data that reveals accurate and insightful answers to life's biggest questions. What was history's biggest empire? Or the tallest building of the ancient world? What

was the plumbing like in medieval Byzantium? The average wage in the Mughal Empire? Where did scientific writing first emerge? What was the bloodiest ever ritual human sacrifice? We are used to thinking about history in terms of stories. Yet we understand our own world through data: cast arrays of statistics that reveal the workings of our societies. In *Figuring Out the Past*, radical historians Peter Turchin and Dan Hoyer dive into the numbers that reveal the true shape of the past, drawing on their own Seshat project, a staggeringly ambitious attempt to log every data point that can be gathered for every society that has ever existed. This book does more than tell the story of humanity: it shows you the big picture, by the numbers.
