FASB ASC 718 and 505-50 in 2004, valuing stock-based compensation ("cheap stock") has been a significant challenge for private companies. This New Guide has been designed to mitigate those challenges. It brings you practical guidance and illustrations related to accounting, disclosures and valuation of privately held company equity securities issued as compensation. This guide includes: Evaluating private and secondary market transactions — What should companies

do when transaction activity doesn't match their estimates of value? Adjustments for control and marketability — How should companies think about the value of the enterprise for the purpose of valuing minority securities? When is it appropriate to apply a discount for lack of marketability, and how should the estimated discount be supported? Highly leveraged entities — How should companies incorporate the fair value of debt in the valuation of equity securities? What is

the impact of leverage on the expected volatility of various securities? The relevance of ASC 820 (SFAS 157) to cheap stock issues Updated guidance and illustrations regarding the valuation of, and disclosures related to, privately held company equity securities issued as compensation This Guide also provides expanded and more robust valuation material to reflect advances in the theory and practice of valuation since 2004. This edition includes guidance from FASB ASC 718, 505-50,

820-10 and SSVS 1 which were all issued since the last AICPA guidance dedicated to this issue.

FAIR VALUE MEASUREMENT Practical Guidance and Implementation "Writing Fair Value Measurement was a monumental task fraught with controversy not only in the U.S., but also abroad. Having coauthored a book with Mark as well as written one myself, I was even more impressed that Mark was able to navigate these fair value minefields and produce a work that will be a tremendous help to accountants and non-

accountants alike. If you are looking for a 'one-stop' book on fair value measurement, this is it!" Neil J. Beaton, CPA/ABV, CFA, ASA, Managing Director, Valuation Services, Alvarez & Marsal "In recent years, the FASB and the IASB have added many requirements for various assets and liabilities to be measured at fair value. In this book, Zyla clearly describes how to implement fair value measurement and how investors and creditors should interpret it. The crisp writing and

illuminating analysis will help readers to grasp the essence of fair value accounting and to apply it wisely." J. Edward Ketz, Associate Professor of Accounting, Pennsylvania State University "The focus of the book is on fair value measurement based on level 3 inputs. This is a critical area of valuations for financial reporting due to a false comfort given by routine application of evaluating models and assumptions without real possibilities of calibration. Mark Zyla offers an extraordinary

help in understanding the reliability of the inputs and the outputs of the different methodologies and the inherent biases in each of them. The book is a precious support for better valuation both in U.S. GAAP and in IFRS fair value reporting." Mauro Bini, Full Professor of Corporate Finance, Bocconi University; Chairman, Management Board OIV (Organismo Italiano di Valutazione) Essential guidance on the fair value measurement process Now in a second edition, Fair Value
