Presented in a colorful new format, Math 4 Student Worktext (3rd. Edition) develops problem solving skills and teaches students to work out math problems accurately. Each math concept is demonstrated in clear examples before students attempt the exercise problems. Students will gain mastery of multiplication, division, fractions, and geometry. Each chapter concludes with a chapter review and cumulative review to help students retain these math concepts. Highlights: * Daily Reviews for reinforcement and retention of previously learned skills * Chapter Reviews to evaluate student progress and serve as a study guide for the test * Cumulative Reviews including skills from earlier chapters, enabling the teacher to identify areas in need of review * Career Links featuring different careers and the math skills involved * Exploring Ideas featuring math topics, such as recipes or "Numbers in the Bible," intended to further develop the student's thinking skills * Bible Truths drawing parallels between math principles and God's Word * To the Parent feature on

the first page of each chapter, explaining concepts and suggesting parent-child math activities * A Handbook of math terms, definitions, explanations, and illustrations at the end of the worktext * Problem Solving woven throughout with extended application challenges.

Teach math lessons through the creative means of a life story Provide 36 weeks of instruction based on skill levels rather than grade levels Guide students by the use of inexpensive manipulatives, including index cards, dried beans, and construction paper! We often tend to compartmentalize when teaching children. In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring, just to name a few. In driving a car, you see and read road signs, read maps, and count miles. So why do we say to children, "This is math, this is language, this is about science and nature, and this is history"? The most natural and effective means to teach children is through life examples. Content, story, and the ability to show math in real life make a living math book!

Go Math! Carson-Dellosa Publishing Following up her' best-selling book, Number Sense Routines: Building

Numerical Literacy Every Day in Grades K-3, Jessica Shumway turns her focus to upper elementary classrooms. Number Sense Routines: Developing Mathematical Understanding Every Day in Grades 3-5 is about tapping into every child's innate number sense and providing daily, connected experiences that are responsive to children's learning needs. Consistent, Daily Routines Work:' Adaptable to any curriculum, Shumway's 5, 10, or 15 minute warm-up routines are an easy and effective way to build and solidify students' number sense foundations as a supplement to any program Planning and Facilitating Your Classroom:' No matter how familiar the routine, Shumway provides insight on how to keep daily warm-ups fresh. She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms Assessment Strategies:' As students engage in the process, each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking Identify Big Ideas: Not only will

these math routines help develop students' mathematical understanding as they move towards using standard algorithms, but teachers will learn to better recognize the big ideas that emerge in discussions, how to encourage important strategies based in number sense, and how to facilitate conversations on key mathematical concepts. 'These routines may appear in other places, [but] I have never seen them written in such detail and with so many variations... Although she makes what she does sound easy, we all know that teaching math well is anything but easy. It is challenging and complex. Unpacking what students are saying, helping them make connections not only to the math but to each other's ideas, while simultaneously recording their ideas using mathematical models, visuals, or equations is no easy task. Jessica provides wonderful visuals, examples of student work, and so much more to help educators develop the tools they need to improve their practice and in so doing improve student learning. '.....
