Human Rights, Free Competition and the Future of the Internet World Bank Publications

"During the past decade, diverse developing countries have introduced radical reforms in their collection of taxes. In more than 15 countries, traditional tax departments have been granted the status of semiautonomous revenue authorities (ARAs), which are designed with a number of autonomy-enhancing features, including self-financing mechanisms, boards of directors with high-ranking public and private sector representatives, and sui generis personnel systems. Taliercio addresses gaps in the public management and tax administration literatures by closely examining ARA reforms in Kenya, Mexico, Peru, South Africa, Uganda, and Venezuela from their inception to the early 2000s. Using the comparative case study method, he tackles three questions. First, what has motivated the wave of ARA reforms over the past decade? The author argues that from a public management perspective, reformers intended to use autonomy to enhance bureaucratic performance in low-capacity public sectors. Second, is there a connection between autonomy and performance? Focusing on revenue collection, compliance management, taxpayer services, human resource management, and administrative costs, the author suggests that autonomy is associated with higher levels of performance. He also makes the case that higher levels of autonomy are associated with higher levels of performance. Third, if there is a connection between autonomy and performance, which specific design features matter most and why? In spite of the popularity of the ARA reform, there is no consensus on best practice in organizational design. The author offers hypotheses based on the cases about why certain designs work better than others, and makes specific recommendations for the next generation of ARA reforms. This paper is a product of the Poverty Reduction and Economic Management Sector Department, East Asia and Pacific Region, part of a larger effort in the Bank to understand under what conditions public sector performance improves"--World Bank web site. index show.

Plastic and Orbital Surgery Saunders

The telephone looms large in our lives, as ever present in modern societies as cars and television. Claude Fischer presents the first social history of this vital but little-studied technology—how we encountered, tested, and ultimately embraced it with enthusiasm. Using telephone ads, oral histories, telephone industry correspondence, and statistical data, Fischer's work is a colorful exploration of how, when, and why Americans started communicating in this radically new manner. Studying three California communities, Fischer uncovers how the telephone became integrated into the private worlds and community activities of average Americans in the first decades of this century. Women were especially avid in their use, a phenomenon which the industry first vigorously discouraged and then later wholeheartedly promoted. Again and again Fischer finds that the telephone supported a wide-ranging network of social relations and played a crucial role in community life, especially for women, from organizing children's relationships and church activities

to alleviating the loneliness and boredom of rural life. Deftly written and meticulously researched, *America Calling* adds an important new chapter to the social history of our nation and illuminates a fundamental aspect of cultural modernism that is integral to contemporary life.

Cat and Fish Purich Publishing

The 1993 publication of Marianne A. Ferber and Julie A. Nelson's *Beyond Economic Man* was a landmark in both feminist scholarship and the discipline of economics, and it quickly became a handbook for those seeking to explore the emerging connections between the two. A decade later, this book looks back at the progress of feminist economics and forward to its future, offering both a thorough overview of feminist economic thought and a collection of new, high-quality work from the field's leading scholars.

Managing for Development Results Amer Federation of Arts

The educational use of television, film, and related media has increased significantly in recent years, but our fundamental understanding of how media communicate information and which instructional purposes they best serve has grown very little. In this book, the author advances an empirically based theory relating media's most basic mode of presentation -- their symbol systems -- to common thought processes and to learning. Drawing on research in semiotics, cognition and cognitive development, psycholinguistics, and mass communication, the author offers a number of propositions concerning the particular kinds of mental processes required by, and the specific mental skills enhanced by, different symbol systems. He then describes a series of controlled experiments and field and cross-cultural studies designed to test these propositions. Based primarily on the symbol system elements of television and film, these studies illustrate under what circumstances and with what types of learners certain kinds of learning and mental skill development occur. These findings are incorporated into a general scheme of reciprocal interactions among symbol systems, learners' cognitions, and their mental activities; and the implications of these relationships for the design and use of instructional materials are explored.

The Diabetic Pregnancy Temple University Press

In this book emphasis will be put in the relevance of Plant Biotechnology for producing compounds of pharmaceutical and industrial relevance specifically the contribution of in vitro plant cell cultures for producing recombinant proteins (molecular farming) and compounds produced by plants useful for human and animal health (secondary metabolites) will be discussed. Also the description of some process held by whole plants will be included. The aim will be to provide relevant theoretical frameworks and the latest empirical research findings for professionals and researchers working in the field of Plant Biotechnology, molecular farming and biochemical engineering.

Offers a look at the sizeable population of women who are domestic workers in Latin America and the Caribbean.

Report on the Sanitary Conditions of the Labouring Population of Great Britain OECD

This textbook covers the whole of ophthalmic plastic and reconstructive surgery, i.e., eyelid,

lacrimal, orbital, and socket surgery, at a basic level. It is aimed at ophthalmologists worldwide. It covers what any fully trained ophthalmologist should know about the subject, to enable him/her to practise with competence and confidence.

Informe sobre las migraciones en el mundo 2011 Springer

E-Government is more about government than about "e". This study explores the reasons for implementing e-government, the barriers to implementation, and how to implement.

Household Workers in Latin America and the Caribbean Waveland Press

That precursors of adult coronary artery disease, hypertension, and type II diabetes begin in childhood have been clearly established by the Bogalusa Heart Study. This unique research program has been able to follow a biracial (black/white) population over 35 years from childhood through mid-adulthood to provide perspectives on the natural history of adult heart diseases. Not only do these observations describe trajectories of cardio-metabolic risk variables leading to these diseases but provide a rationale for the need to begin prevention beginning in childhood. The trajectories of the burden of cardio-metabolic risk variables in the context of their fetal origin and chromosome telomere dynamics provide some insight into the metabolic imprinting in utero and aging process. The observed racial contrasts on cardio-metabolic risk variables implicate various biologic pathways interacting with environment contributing to the high morbidity and mortality from related diseases in our population. To address the seriousness of the onset of cardiovascular disease in youth, approaches to primordial prevention are described focussing on childhood health education as an important aspect of Preventive Cardiology.

A Supplementary Report on the Results of a Special Inquiry Into the Practice of Interment in Towns. Made at the Request of Her Majesty's Principal Secretary of State for the Home Department Inst for International Economics

Information and communications technology (ICT) has become a key driver of economic growth in recent years, particularly with developments in the internet, of mobile telephony and of broadband networks. Using available OECD data, this report considers measures of e-commerce and ICT diffusion, the role and impact of ICT investment and the role of ICT-using and ICT-producing sectors in overall economic performance; and contains nine case studies on the effects of ICT in individual countries, using detailed firm-level data. The report highlights the impact of ICT on the success of individual firms, in particular when it is combined with investment in skills, organisational change and innovation. It also examines why there is a gap in ICT impact between performance of individual firms and aggregate performance and growth levels at the sectoral or economy-wide level.

Declaration and regulations World Health Organization

Cat and Fish, the most unlikely of friends, introduce each other to their very different worlds, which leads to trouble and forces them to find a way to celebrate their differences and remain friends.

A Perinatal Perspective Springer Nature

Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas,

government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

Plant Biotechnology for Health Lexington Books

"African Development Indicators 2005 provides the most detailed collection of data on Africa available in one volume. It contains more than 500 macroeconomic, sectoral, and social indicators, covering over 50 African countries with data from 1965-2003. The book is grouped into 17 chapters: background data; national accounts; prices and exchange rates; money and banking; external sector; external debt and related flows; government finance; agriculture; power, communications, and transportation; doing business; labor force and employment; aid flows; social indicators; environmental indicators; HIPC debt initiative; household welfare; and public enterprises. Each chapter begins with a brief introduction on the nature of the data and their limitations, followed by a set of statistical tables, charts, and technical notes that define the indicators and identify their specific source. Included are tables on HIV/AIDS, Communications and Transportation, and the HIPC Debt Initiative. Designed to provide all those interested in Africa with a focused and convenient set of data to monitor development programs and aid flows in the region, this is an invaluable reference tools for analysts and policymakers who want a better understanding of the economic and social developments occurring in Africa."

Progress and Challenges in Latin America and the Caribbean Routledge

Technology and globalization are threatening manufacturing's traditional ability to deliver both productivity and jobs at a large scale for unskilled workers. Concerns about widening inequality within and across countries are raising questions about whether interventions are needed and how effective they could be. Trouble in the Making? The Future of Manufacturing-Led Development addresses three questions: - How has the global manufacturing landscape changed and why does this matter for development opportunities? - How are emerging trends in technology and globalization likely to shape the feasibility and desirability of manufacturing-led development in the future? - If low wages are going to be less important in defining competitiveness, how can less industrialized countries make the most of new opportunities that shifting technologies and globalization patterns may bring? The book examines the impacts of new technologies (i.e., the Internet of Things, 3-D printing, and advanced robotics), rising international competition, and increased servicification on manufacturing productivity and employment. The aim is to inform policy choices for countries currently producing and for those seeking to enter new manufacturing markets. Increased polarization is a risk, but the book analyzes ways to go beyond focusing on potential disruptions to position workers, firms, and locations for new opportunities.

Net Neutrality Compendium Independently Published

Through the voice of Mee Ali, readers experience the rhythms and rituals of life in rural Namibia in interconnected stories. In Oshaantu, a place where women are the backbone of the home but are expected to submit to patriarchal dominance, Mee Ali is happily married. Her friend, Kauna, however, suffers at the hands of an abusive husband. When he is found dead at home, many of the

villagers suspect her of poisoning him. Backtracking from that time, the novel, with its universal appeal, reveals the value of friendships, some of which are based on tradition while others grow out of strength of character, respect, and love.

The Economic Impact of ICT Arms & Armour

This volume examines the record of Latin American adjustment efforts and assesses the challenges that lie ahead. It examines the Washington consensus on how ten major policy instruments - including fiscal deficits, tax reform, exchange rates, and deregulation - should be used to address Latin America's current problems. Ten country studies and accompanying commentaries assess public attitudes in each country toward these reforms, the progress made since 1982 in implementing them, and the impact of policy changes on economic performance.

Trouble in the Making? SAGE

Despite centuries of sustained attacks against their collective existence, Indigenous peoples represent over 5,000 languages and cultures in more than 70 nations on six continents. Most have retained social, cultural, economic, and political characteristics distinct from other segments of national populations. Yet recognition of their humanity and rights has been a struggle to achieve. Based on personal experience, James (Sa'ke'j) Youngblood Henderson documents the generation-long struggle that led ultimately to the adoption of the Declaration of the Rights of Indigenous Peoples by the United Nations General Assembly. Henderson puts the Declaration and the struggles of Indigenous peoples in a wider context, outlining the rise of international law and how it was shaped by European ideas, the rise of the United Nations, and post-World War II agreements focusing on human rights. Henderson analyzes the provisions of the Declaration and comments on the impact of other international agreements on Indigenous peoples. He concludes with his view of what must be done to give the Declaration its full force for Indigenous peoples around the world, and what it means for Canada. The full text of the Declaration and selected excerpts of other key international agreements are included.

Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue, perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.

Measurement, Evidence and Implications Univ of California Press

Cybercrime is a complex and ever-changing phenomenon. This book offers a clear and engaging introduction to this fascinating subject by situating it in the wider context of social, political, cultural and economic change. Taking into account recent developments in social networking and mobile communications, this new edition tackles a range of themes spanning criminology, sociology, law, politics and cultural studies, including: - computer hacking - cyber-terrorism - piracy and intellectual property theft - financial fraud and identity theft - hate speech - internet pornography - online stalking - policing the internet - surveillance and censorship Complete with useful recommendations for further reading, incisive discussion questions and an updated glossary of key terms, *Cybercrime and Society* is an essential resource for all students and academics interested in cybercrime and the future of the Internet.

Fundamentals of Clinical Ophthalmology United Nations Publications

The aim of this book is to offer information about the Pharmacological Properties of Native Plants from Argentina to students, researchers and graduates interested in the fields of Ethnobotany, Pharmacognosy, Phytochemistry, Pharmacy, and Medicine. The book includes summary information about the native plants from Argentina with medical activity comprising their botanical characteristics, distribution, characteristics of the regions where they grow, ethnobotanical information, chemical data, biological activity, establishment of in vitro cultures, toxicity, and legal status.
