Bloody Genius John Wiley & Sons

From the winner of the Nobel Prize in  
Literature and author of the Booker  
Prize-winning novel *The Remains of the  
Day* In the face of the misery in his  
hometown, the artist Masuji Ono was  
unwilling to devote his art solely to the  
celebration of physical beauty. Instead,  
he put his work in the service of the  
imperialist movement that led Japan into

World War II. Now, as the mature Ono struggles through the aftermath of that war, his memories of his youth and of the "floating world"—the nocturnal world of pleasure, entertainment, and drink—offer him both escape and redemption, even as they punish him for betraying his early promise. Indicted by society for its defeat and reviled for his past aesthetics, he relives the passage through his personal history that makes him both a hero and a coward but, above all, a human being.

*Can Jane Eyre Be Happy?* Think Smarter Critical Thinking to Improve Problem-Solving and Decision-Making Skills

Every year, 6 million companies and more than 100,000 products are launched. They all need an awesome name, but many (such as Xobni, Svbtle, and Doostang) look like the results of a drunken Scrabble game. In this

entertaining and engaging book, ace naming consultant Alexandra Watkins explains how anyone—even noncreative types—can create memorable and buzz-worthy brand names. No degree in linguistics required. The heart of the book is Watkins's proven SMILE and SCRATCH Test—two acronyms for what makes or breaks a name. She also provides up-to-date advice, like how to make sure that Siri spells your name correctly and how to nab an available domain name. And you'll see dozens of examples—the good, the bad, and the “so bad she gave them an award.” Alexandra Watkins is not afraid to name names.

**Beginners Guide for Problem Solving and Decision Making skills to become a better Critical Thinker, then Learn the art of reading people & Manipulation!** John Wiley & Sons

A beautiful and compulsively readable literary debut that introduces Owen Burr—an Olympian whose dreams of greatness are dashed and then

transformed by an epic journey—and his father, Professor Joseph Burr, who must travel the world to find his son. After his athletic career ends abruptly, Owen flees the country to become an artist. He lands in Berlin where he meets a group of art monsters living in the Teutonic equivalent of Warhol's Factory. After his son's abrupt disappearance, Burr dusts off his more speculative ideas in a last-ditch effort to command both Owen's and the world's attention. *A Brave Man Seven Storeys Tall* offers a persuasive vision of faith, ambition, art, family, and the myths we write for ourselves.

**A Novel** *One World*

A smart and funny book by a prominent Harvard psychologist, which uses groundbreaking research and (often hilarious) anecdotes to show us why

we're so lousy at predicting what will make us happy – and what we can do about it. Most of us spend our lives steering ourselves toward the best of all possible futures, only to find that tomorrow rarely turns out as we had expected. Why? As Harvard psychologist Daniel Gilbert explains, when people try to imagine what the future will hold, they make some basic and consistent mistakes. Just as memory plays tricks on us when we try to look backward in time, so does imagination play tricks when we try to look forward. Using cutting-edge research, much of it original, Gilbert shakes, cajoles, persuades, tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was. Among the unexpected questions he poses: Why are conjoined

twins no less happy than the general population? When you go out to eat, is it better to order your favourite dish every time, or to try something new? If Ingrid Bergman hadn't gotten on the plane at the end of Casablanca, would she and Bogey have been better off? Smart, witty, accessible and laugh-out-loud funny, *Stumbling on Happiness* brilliantly describes all that science has to tell us about the uniquely human ability to envision the future, and how likely we are to enjoy it when we get there.

**Professional** W. W. Norton & Company  
An urgent challenge to the prevailing moral order from one of the freshest, most compelling voices in radical politics today *Being Numerous* shatters the mainstream consensus on politics and

personhood, offering in its place a bracing analysis of a perilous world and how we should live in it. Beginning with an interrogation of what it means to fight fascism, Natasha Lennard explores the limits of individual rights, the criminalization of political dissent, the myths of radical sex, and the ghosts in our lives. At once politically committed and philosophically capacious, *Being Numerous* is a reevaluation of the idea that the personal is political, and situates as the central question of our time—How can we live a non-fascist life? "Deliriously wild, funny and imaginative. Cantero is an original voice." --Charles Yu, author of *How to Live in a Science Fictional Universe* With raucous humor and brilliantly orchestrated mayhem, *Meddling Kids* subverts teen detective archetypes like the Hardy Boys, the Famous Five, and Scooby-Doo, and delivers an exuberant and wickedly entertaining celebration of horror, love, friendship, and many-tentacled, interdimensional demon spawn.  
SUMMER 1977. The Blyton Summer Detective Club (of Blyton Hills, a small mining town in Oregon's Zoinx River Valley) solved their final mystery and unmasked the elusive Sleepy Lake monster—another low-life fortune hunter trying to get his dirty hands on the

legendary riches hidden in Deboën Mansion. And he would have gotten away with it too, if it weren't for those meddling kids. 1990. The former detectives have grown up and apart, each haunted by disturbing memories of their final night in the old haunted house. There are too many strange, half-remembered encounters and events that cannot be dismissed or explained away by a guy in a mask. And Andy, the once intrepid tomboy now wanted in two states, is tired of running from her demons. She needs answers. To find them she will need Kerri, the one-time kid genius and budding biologist, now drinking her ghosts away in New York with Tim, an excitable Weimaraner descended from the original canine member of the club. They will also have

to get Nate, the horror nerd currently residing in an asylum in Arkham, Massachusetts. Luckily Nate has not lost contact with Peter, the handsome jock turned movie star who was once their team leader . . . which is remarkable, considering Peter has been dead for years. The time has come to get the team back together, face their fears, and find out what actually happened all those years ago at Sleepy Lake. It's their only chance to end the nightmares and, perhaps, save the world. A nostalgic and subversive trip rife with sly nods to H. P. Lovecraft and pop culture, Edgar Cantero's *Meddling Kids* is a strikingly original and dazzling reminder of the fun and adventure we can discover at the heart of our favorite stories, no matter how old we get.

*Blindsight* is the Hugo Award-nominated novel by Peter Watts, "a hard science fiction writer through and through and one of the very best alive" (The Globe and Mail). Two months have past since a

myriad of alien objects clenched about the Earth, screaming as they burned. The heavens have been silent since—until a derelict space probe hears whispers from a distant comet. Something talks out there: but not to us. Who should we send to meet the alien, when the alien doesn't want to meet? Send a linguist with multiple-personality disorder and a biologist so spliced with machinery that he can't feel his own flesh. Send a pacifist warrior and a vampire recalled from the grave by the voodoo of paleogenetics. Send a man with half his mind gone since childhood. Send them to the edge of the solar system, praying you can trust such freaks and monsters with the fate of a world. You fear they may be more alien than the thing they've been sent to

find—but you'd give anything for that to be true, if you knew what was waiting for them. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**What Racism Costs Everyone and How We Can Prosper Together** Crown  
A darkly comic and ambitious sequel to the American classic *Catch-22*. In *Closing Time*, Joseph Heller returns to the characters of *Catch-22*, now coming to the end of their lives and the century, as is the entire generation that fought in World War II: Yossarian and Milo Minderbinder, the chaplain, and such newcomers as little Sammy Singer and giant Lew, all linked, in an uneasy peace and old age, fighting not the Germans this time, but *The End*. *Closing Time* deftly satirizes the realities and the

myths of America in the half century since WWII: the absurdity of our politics, the decline of our society and our great cities, the greed and hypocrisy of our business and culture -- with the same ferocious humor as *Catch-22*. Closing Time is outrageously funny and totally serious, and as brilliant and successful as *Catch-22* itself, a fun-house mirror that captures, at once grotesquely and accurately, the truth about ourselves.

Kendi, #1 New York Times bestselling  
author of *How to Be an Antiracist*  
Heather McGhee’s specialty is the  
American economy—and the mystery of  
why it so often fails the American public.  
From the financial crisis of 2008 to rising  
student debt to collapsing public  
infrastructure, she found a root problem:  
racism in our politics and policymaking.  
But not just in the most obvious  
indignities for people of color. Racism  
has costs for white people, too. It is the

common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become

private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world's advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can't do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.

Gregor the Overlander Vintage  
NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE ECONOMIST “The most important book on decision making since Daniel

Kahneman's *Thinking, Fast and Slow*.”—Jason Zweig, *The Wall Street Journal* Everyone would benefit from seeing further into the future, whether buying stocks, crafting policy, launching a new product, or simply planning the week’s meals. Unfortunately, people tend to be terrible forecasters. As Wharton professor Philip Tetlock showed in a landmark 2005 study, even experts’ predictions are only slightly better than chance. However, an important and underreported conclusion of that study was that some experts do have real foresight, and Tetlock has spent the past decade trying to figure out why. What makes some people so good? And can this talent be taught? In *Superforecasting*, Tetlock and coauthor Dan Gardner offer a masterwork on

prediction, drawing on decades of research and the results of a massive, government-funded forecasting tournament. The Good Judgment Project involves tens of thousands of ordinary people—including a Brooklyn filmmaker, a retired pipe installer, and a former ballroom dancer—who set out to forecast global events. Some of the volunteers have turned out to be astonishingly good. They’ve beaten other benchmarks, competitors, and prediction markets. They’ve even beaten the collective judgment of intelligence analysts with access to classified information. They are “superforecasters.” In this groundbreaking and accessible book, Tetlock and Gardner show us how we can learn from this elite group. Weaving together stories of forecasting successes

(the raid on Osama bin Laden's compound) and failures (the Bay of Pigs) and interviews with a range of high-level decision makers, from David Petraeus to Robert Rubin, they show that good forecasting doesn't require powerful computers or arcane methods. It involves gathering evidence from a variety of sources, thinking

probabilistically, working in teams, keeping score, and being willing to admit error and change course.

Superforecasting offers the first demonstrably effective way to improve our ability to predict the future—whether in business, finance, politics, international affairs, or daily life—and is destined to become a modern classic.
