Love is worth more than the sum of its hearts... CPA Merrit Callahan learned early not to let passion unravel her orderly life. Back in college she fell hard for a football player, only to be devastated when she discovered he'd been duping her all along—dared by his teammates to score with his bookish tutor. Now, after her back-stabbing fiancé breaks off their engagement, Merrit flees to Baltimore to escape the fallout. After eight years in the pros, a series of concussions have forced Heath Gibson out of the NFL. The transition from player to coach for the Baltimore Blaze hasn't been smooth, but finding himself face-to-face with Merrit Callahan makes the ride even rockier. He's been filled with regret ever since a stupid team prank caused Merrit to run away from him a decade earlier. Merrit's stunned to reconnect with Heath. And despite the authenticity of his reignited feelings this time around, Merrit's got her mind set on payback. She'll give Heath a night

he won't forget and then walk away. But Heath's hold on her heart—and the rest of her body—is difficult to break... Includes a preview of the next Out of Bounds novel, *Risky Game*. Praise for Tracy Solheim "She's in the running for romance novelist rookie of the year."—Rhapsody Book Club Tracy Solheim is the author of international bestselling contemporary romance novels featuring hot football players and the women who love them. In addition to writing novels, she is a regular columnist for USA Today's Happily Ever After Blog. She lives in Georgia with her husband, two nearly adult children, a Labrador retriever who thinks she's a cat and a horse named after her first novel: *Game On*. When Tracy's not at the barn with her daughter or working out with friends—i.e. lifting heavy bottles of wine—she's writing. Except for when she's reading, but that's just research.

A Risky Game Wolves Chronicles

In the next sizzling sports romance from the author of *Foolish Games*, Brody is at the top of his game... until Shannon changes the rules. Baltimore Blaze tight end Brody Janik is a natural-born football star. At twenty-seven, his record-breaking athletic performance and his cover-boy good

looks have turned him into a household name. But Brody's hiding a major secret behind his charming public persona: a health condition that may cut his career short. PhD candidate Shannon "Shay" Everett works multiple jobs to put herself through school—including an unpaid internship with the Blaze training department. Strapped for cash, Shay answers the call of an NFL gossip blogger to uncover personal details about the Blaze players. Sneaking into the locker room one night, she gets entangled in Brody's secret...and swept up by his charm. Brody isn't sure what to make of the gawky girl with the whiskey eyes, especially when he discovers she was snooping. His first instinct is to turn her in as a snitch, but she could destroy him by sharing his secret. Instead, he decides to keep her close...perhaps closer than either of them originally intended...

Prior to the real-estate boom of the 1980s, Francis J. Greenburger risked it all to buy three older loft buildings at 50 West Street near the current 9/11 Memorial. He ultimately dreamed of one day erecting a magnificent skyscraper in their place. But disaster struck in 2008, just as his plans were coming together, and development came to a screeching halt. The global financial crisis had made the land practically worthless and it would be years before he could get back on track, but he refused to give up on his dream. Today, 50 West is a striking 780-foot skyscraper with curved glass windows that has become an iconic feature on the city skyline—but it took much more than a financial investment to get there. It required Greenburger to do what he does best—take huge risks at every turn. During his parallel careers, Francis J. Greenburger has made publishing and real-estate history. Whether risking the reputation of his agency for the super -star authors of tomorrow, such as James Patterson to Dan Brown, or pioneering the New York co-op market by taking "hopeless" properties and turning them into prized homes, he has successfully navigated the worlds of business, politics, and social change to become the quintessential American entrepreneur. A math and business prodigy who started working for his father at the age of 12. After a stop-and-start academic career, he voluntarily left one of the most elite and academically distinguished New York City high schools and started his adult life at 15. Greenburger has made it his life's work to find value where others never thought to look, and his keen instincts and innovative strategies have taken him from a high-school "dropout" to a well-educated self-made billionaire. Francis has mastered the "risk game." Now, with Rebecca Paley's gripping prose, he takes us behind the scenes in Risk Game and reveals firsthand how he has become a self-made force in the competitive world of New York real estate—and a champion for nonprofit organizations in the fields of art, education, and, most recently, social and criminal justice.

Dangerous Games Penguin

A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In *Seven Games*, Oliver Roeder charts their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against “modern rationalism”; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, *Seven Games* is a story of obsession, psychology, history, and how play makes us human.

This is a profound look at learning, language, and literacy. It is also about brains and bodies. And it is about talk, texts, media, and society. These topics, though usually studied in different narrow academic silos, are all part of one highly interactive process—human development. Gee argues that children will need to be resilient, imaginative, hopeful, and deliberate learners to survive the deeply complex and unpredictable world in which they live. In a world beset by conflicting ideologies that give rise to hatred, violence, and war, Gee urges us to look to a broader set of ideas from seemingly unrelated disciplines for a viable vision of education. This book proposes a framework of principles that can be used to reconceptualize education, specifically literacy education, to better prepare students to be collaborators toward peace and sustainability. Book Features: Offers a new set of ideas about literacy, learning, and human development in a risk-laden, digitally driven modern world. Uses recent breakthroughs in research on brains, bodies, society, identity, and teaching and learning in and out of school. Stresses the importance of human growth and development to a more peaceful and equitable world.

Dangerous Games Montlake Romance

"The Medieval Risk-Reward Society" offers a study of adventure and love in the European Middle Ages focused on the poetry of authors such as Marie de France, Chretien de Troyes, Wolfram von Eschenbach, and Gottfried von Strassburg-showing how a society based on sacrifice becomes one of wagers and investments. Will Hasty's sociological approach to medieval courtly literature, informed by the analytic tools of game theory, reveals the blossoming of a worldview in which outcomes are uncertain, such that the very self (of a character or an authorial persona) is contingent on success or failure in possessing the things it desires-and upon which its social identity and personal happiness depend. Drawing on a diverse selection of contrasting canonical

works ranging from the "Iliad" to the biblical book of Joshua to High Medieval German political texts to the writings of Leibniz and Mark Twain, Hasty enables an appreciation of the distinctive contributions made in antiquity and the Middle Ages to the medieval emergence of a European society based on risks and rewards. "The Medieval Risk-Reward Society: Courts, Adventure, and Love in the European Middle Ages" takes a descriptive approach to the competitions in religion, politics, and poetry that are constitutive of medieval culture. Culture is considered always to be "happening, " and to be happening on the cultural cutting edge as competitions for rewards involving the element of chance. This study finds adventure and love--the principal concerns of medieval European romance poetry--to be cultural game changers, and thereby endeavors to make a humanist contribution to the development of a cultural game theory. Will Hasty is Professor of German and Medieval and Early Modern Studies at the University of Florida, Gainesville."

Acclaimed historian Margaret MacMillan explores here the many ways in which history affects us all. She shows how a deeper engagement with history, both as individuals and in the sphere of public debate, can help us understand ourselves and the world better. But she also warns that history can be misused and lead to misunderstanding. History is used to justify religious movements and political campaigns alike. Dictators may suppress history because it undermines their ideas, agendas, or claims to absolute authority. Nationalists may tell false, one-sided, or misleading stories about the past. Political leaders might mobilize their people by telling lies. It is imperative that we have an understanding of the past and avoid these and other common traps in thinking to which many fall prey. This brilliantly reasoned work, alive with incident and figures both great and infamous, will compel us to examine history anew—and skillfully illuminates why it is important to treat the past with care.

From the untimely deaths of young athletes to chronic disease among retired players, roiling debates over tackle football have profound implications for more than one million American boys—some as young as five years old—who play the sport every year. In this book, Kathleen Bachynski offers the first history of youth tackle football and debates over its safety. In the postwar United States, high school football was celebrated as a "moral" sport for young boys, one that promised and celebrated the creation of the honorable male citizen. Even so, Bachynski shows that throughout the twentieth century, coaches, sports equipment manufacturers, and even doctors were more concerned with "saving the game" than young boys' safety—even though injuries ranged from concussions and broken bones to paralysis and death. By exploring sport, masculinity, and citizenship, Bachynski uncovers the cultural priorities other than child health that made a collision sport the most popular high school game for American boys. These deep-rooted beliefs continue to shape the safety debate and the possible future of youth tackle football.
