TV Go Home began life in the late 1990s as an outrageously funny website by Charlie Brooker which parodied the Radio Times, and was turned into a book in 2001 when Brooker was still a relative unknown. It was a brutal and surreal satire of the world of TV, media and celebrity, written with Brooker's trademark savage wit.

Unavailable for some years, we are republishing it to reach his many thousands of new fans. In TV Go Home, visit a parallel world where reality TV and 'new media' have got completely out of control. Shows include Daily Mail Island, where inhabitants of a small island are force-fed the newspaper and become ever more outraged, an eternal version of Watchdog where viewers are invited to 'phone in and complain about every single facet of every single object, product and service in the world' and various extremely rude shows featuring Mick Hucknall's testicles. Star of the book is Brooker's famous creation Nathan Barley, pretentious Hoxton new-media type 'whose very existence indelibly tarnishes the world's already questionable track record'. Not for the faint-hearted, TV Go Home is a gloriously funny, filthy and spectacularly angry book.

The Fabulous Fifties were America's "Happy Days." The

Eisenhower Years produced amazing contributions to our American culture -- and to other cultures around the world. In so many ways, Americans innovated, and the world imitated -- from Elvis Presley and rock 'n' roll to the Salk anti-polio vaccine. America's contributions to the world included motion pictures and the Broadway stage; radio and television; amateur and professional sports; jazz, the "blues," country-and-Western music, traditional ballads and popular songs, and rock 'n' roll; domestic and international business and trade; public and private educational opportunities; and a rich and varied literature. While Americans did not invent all these categories, they nevertheless took each to new heights during the Eisenhower Years, and shared their bounty with the world. The Eisenhower Years, generally speaking, were happier, more stable, more prosperous, more optimistic, and simpler times than the preceding decades of the 1930's and '40's and the increasingly turbulent 1960's and '70's that followed. In fact, America's exuberance in so many areas of the arts and everyday life was omnipresent. As for political and military achievements, President Eisenhower kept us safely out of war, and was wise enough to stay out of the way of America's artists and entrepreneurs. As a result, the Eisenhower Years should forever be remembered as those "Happy Days."

The Eisenhower Years Taylor & Francis

The book's journey into the future of television begins with "You Are Here," delving into "The Great Convergence" of television and Internet and the vortex of change we all inhabit now. Then, glancing back, we explore "The Old World" of broadcast television to understand how we got to this moment of transition. Next, traveling "Between Worlds," we visit cable television and see how the boundaries between network, cable, and Internet are mutating. After that, we enter "The New World" that ranges from empires like Netflix and Amazon down to Kickstarter-funded web series, and all the creative expressions that abound. Finally, we look ahead to the "Far Frontier" of interactivity and transmedia and a distant, fantastic future. All these experiences are focused on how a writer, producer, director, or entrepreneur can use the emerging possibilities to create original television now and in the coming decade.
