These exciting new TreeTops Myths and Legends are guaranteed to appeal to all your junior readers - whatever their cultural background, gender or enthusiasms. These are the oldest and most enduring stories in the world, retold by leading contemporary children's authors to bring out all of the action, drama, humour and depth of the original stories in a way that makes them as exciting and meaningful today as ever. The strand is comprised of 24 books,

telling a total of around 65 traditional stories from around the world. All of the stories are fully illustrated with stunning, vibrant images. The stories are carefully levelled, making them accessible to the average 7-11 year old reader. A thought-provoking letter from the author explains something about the background of the stories and the process of writing or retelling them. The letter also encourages the reader to make links between stories in a collection - prompting a fascinating investigation of the similarities and differences between stories that have evolved from different cultures around the world. Free teaching notes with each pack offer suggestions on how to develop higher order comprehension and writing skills. They also provide short

introductions to many of the stories and discussion points to promote meaningful speaking and listening, and reflective reading. The stories are ideal for making strong links to other areas of curriculum. *Collins International Primary Maths – Problem Solving and Reasoning Student Book 3* Cambridge University Press IB Higher Mathematics for the Diploma Programme provides everything you need for the Core IB Diploma Programme in Higher Maths. It is packed with carefully levelled exercises and exam practise along with advice. In addition, there is background material to help students connect maths to the real world. Included is a CD with a PDF of the entire book with preparation and extra practise material. *Higher Level (core)* Cambridge University

The newest novel from the critically-acclaimed author of WITCHBORN ...

Fourteen-year-old Cadmus has been scholar Tullus's slave since he was a baby - his master is the only family he knows. But when Tullus disappears and a taciturn slave called Tog - daughter of a British chieftain - arrives with a secret message, Cadmus's life is turned upside down. The pair follow a trail that leads to Emperor Nero himself, and his crazed determination to possess the Golden Fleece of Greek mythology. This quest will push Cadmus to the edge of the Roman Empire - and reveal unexpected truths about his past ...

A new series of Exam Preparation guides for the IB Diploma Mathematics HL and SL and Mathematical Studies. This exam preparation guide for the core content of the IB Diploma Mathematics Higher Level course breaks the course down into chapters that summarise material and present revision questions by exam question type, so that revision can be highly focused to make best use of students' time. Students can stretch themselves to achieve their best with 'going for the top' questions for those who want to achieve the highest results. Worked solutions for all the mixed and 'going for the top' questions are included, plus exam hints throughout. Guides for Mathematics Standard Level and Mathematical Studies are also available. *Mathematical Studies (SL)* OUP Oxford
Shining a Light: 50 Years of the Australian Film Institute, traces the progress of the film and television industries in Australia - as well as screen culture within Australia over the past half century - through the lens of one key organisation, the Australian Film Institute (AFI). Shining a Light offers a timely and significant contribution to scholarship on Australian cinema, published at a critical time in Australian film history. The authors, Lisa French and Mark Poole, offer an insider's view through 27 interviews with key players on the local scene. The book also includes a listing of every AFI Award that has been given since 1958, including the

nominees and winners of each award category. This is the first time that such an exhaustive list of AFI nominees and winners has been published.

Linking Standards, Fluency, and Comprehension. 2-3 Heinemann Educational Books

This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated book covers topic 8 of the IB Diploma Higher Level Mathematics syllabus, the optional topic Sets, Relations and Groups. It is also for use with the further mathematics course. Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for mixed examination practice; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes throughout of exam hints and tips.

Cambridge Igcse and O Level Accounting Revision Guide Pearson Education Ltd

A radical look at Jane Austen as you've never seen her - as a lover of farce, comic theatre and juvenilia. The Genius of Jane Austen celebrates Britain's favourite novelist 200 years after her death and explores why her books make such awesome movies, time after time. Jane Austen loved the theatre. She learned much of her art from a long tradition of English comic drama and took joyous participation in amateur theatricals. Her juvenilia, then *Sense and Sensibility*, *Pride and Prejudice*, *Mansfield Park* and *Emma* were shaped by the arts of theatrical comedy. Her admiration for drama's dialogue, characterisation, plotting, exits and entrances is why she has been dramatised so successfully on screen in the last twenty years - and these versions are at the centre of her continuing fame, culminating in her celebration on 10 note. Austen expert and author of *The Real Jane Austen*, Paula Byrne looks at stage adaptations of Austen's novels (including one called *Miss Elizabeth Bennet* by A. A. Milne) to modern classics, including the BBC *Pride and Prejudice* and *Persuasion*, Emma Thompson's *Sense and Sensibility*, and the phenomenally brilliant and successful *Clueless*. *The Genius of Jane Austen* presents an Austen not of prim manners and genteel calm, but filled with wild comedy and outrageous behaviour.

Treetops Graphic Novels Chicken House
This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated coursebook, available in both print and e-book formats,

has been written to specifically cover the new IB Higher Level syllabus. Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for combined exercises; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes of hints and tips. The print book includes a CD-ROM providing a complete e-version of the book, all the options chapters, extension worksheets, prior learning sheets, calculator skills sheets and fill-in proofs. These additional materials are also included in the e-book version.

Cambridge University Press

Understanding hydraulics and pump operations doesn't have to be difficult, and it is of key importance to the science of fire engineering. Putting all the pieces together correctly so that the right stream is brought to the fire is essential to effective fireground operations. In the second edition of Fire Service Hydraulics and Pump Operations, author Paul Spurgeon, engineer/pump operator with the Denver Fire Department, breaks down the sometimes difficult-to-understand formulas of hydraulics and pumps into easily learned steps, taking care to explain the hows and whys of each formula discussed. Using an in-the-street, practical approach, Spurgeon teaches readers how to develop proper fire streams as well as how they relate to overall fireground strategies. He covers hydraulics and pumps extensively—from the properties of water to its supply to pumping to sprinkler systems and foams. So readers can put what they've learned into practice, Spurgeon provides both end-of-chapter tests and practice sets at the end of the book, complete with answers so that readers can check their knowledge. The second edition includes numerous updates and additions, including the Rule of Thumb chapter that illustrates how to perform these complex calculations while under stress on the fireground. This text meets the learning objectives for FESHE Fire Protection Hydraulics and Water Supply course work. Features and Benefits: •

Summary of chapter formulas • End-of-chapter tests with answers • Practice sets with answers to further test your understanding

THE SUNDAY TIMES BESTSELLER 'Where

do you come from? It's one of the most

basic human questions of all. But there is

another question, which might sound a

wee bit similar but is actually very

different: What do you come from? And,

let me tell you, that question can take you

all sorts of strange places...' In Made in

Scotland, legendary comic and national

treasure Billy Connolly returns to his roots,

reflecting on his life, his homeland and

what it means – then and now – to be

Scottish. Full of Billy's distinctive humour,

Made in Scotland is a hilarious and

heartfelt love letter to the place and the

people that made him.
