**In Perspective** Routledge  
Bringing together leading scholars from  
Russia and outside experts on Russia,  
this book looks at the difference  
between the image Russia has of itself  
and the way it is viewed in the West. It  
discusses the historical, cultural and  
political foundations that these images  
are built upon, and goes on to analyse  
how contested these images are, and  
their impact on Russian identity. The  
book questions whether differing images

explain fractiousness in Western-Russian relations in the new century, or whether distinct 'imaginary solitudes' offer a better platform from which to negotiate differences. Providing an innovative comparative study of contemporary images of the country and their impact, the book is a significant contribution to studies of globalisation and international relations.

Russians and Non-Russians in the North Caucasus Taylor & Francis

The effectiveness of property rights - and the rule of law more broadly - is often depicted as depending primarily on rulers' 'supply' of legal institutions. Yet the crucial importance of private sector 'demand' for law is frequently overlooked. This book develops a novel framework that unpacks the demand for

law in Russia, building on an original enterprise survey as well as extensive interviews with lawyers, firms, and private security agencies. By tracing the evolution of firms' reliance on violence, corruption, and law over the two decades following the Soviet Union's collapse, the book clarifies why firms in various contexts may turn to law for property rights protection, even if legal institutions remain ineffective or corrupt. The author's detailed demand-side analysis of property rights draws attention to the extensive role that law plays in the Russian business world, contrary to frequent depictions of Russia as lawless.

This book examines Russian influence operations globally, in Europe, and in Russia's neighboring countries, and provides a comprehensive overview of the latest technologies and forms of strategic communication employed in hybrid warfare. Given the growing

importance of comprehensive information warfare as a new and rapidly advancing type of international conflict in which knowledge is a primary target, the book examines Russia's role in Global Knowledge Warfare. The content is divided into three parts, the first of which addresses conceptual issues such as the logic of information warfare, the role of synthetic media, and Russia's foreign policy concepts, including the impact of the COVID-19 pandemic on influence operations. The second part analyzes technological, legal and strategic challenges in modern hybrid warfare, while the third focuses on textual, cultural and historical patterns in information warfare, also from various regional (e.g. the Western Balkans, Romania, Ukraine, and the Baltic)

perspectives. The book is primarily intended for scholars in the fields of international relations, security and the military sciences who are interested in Russian foreign policy and influence operations, but also their impact on the global security environment.

While the collapse of communism in Russia was relatively peaceful, ethnic relations have been deteriorating since then. This deterioration poses a threat to the functioning of the Russian state and is a major obstacle to its future development. Analysing ethnic relations in the North Caucasus, this book demonstrates how a myriad of processes that characterised post-Soviet transition, including demographic change, economic upheaval, geopolitical instability, and political re-structuring, have affected daily life for citizens. It raises important questions about ethnicity, identity, nationalism, sovereignty, and territoriality in the post-

Soviet space.

Reading Russian Sources is an accessible and comprehensive guide that introduces students to the wide range of sources that can be used to engage with Russian history from the early medieval to the late Soviet periods. Divided into two parts, the book begins by considering approaches that can be taken towards the study of Russian history using primary sources. It then moves on to assess both textual and visual sources, including memoirs, autobiographies, journals, newspapers, art, maps, film and TV, enabling the reader to engage with and make sense of the burgeoning number of different sources and the ways they are used.

Contributors illuminate key issues in the study of different areas of Russia's history through their analysis of source materials, exploring some of the major issues in using different source types and reflecting recent discoveries that are changing the field. In so doing, the book orientates students within the broader methodological and conceptual debates that are defining the field and shaping the way Russian history is studied. Chronologically wide-ranging and supported by further reading, along with suggestions to help students guide their own enquiries, Reading Russian Sources is the ideal resource for any student undertaking research on Russian history. As shopping has been transformed from a chore into a major source of hedonistic pleasure, a specifically Russian consumer culture has begun to emerge that is unlike any other. This book examines the many different facets of consumption in today's Russia, including retailing, advertising and social networking. Throughout, emphasis is placed on the inherently visual - not to say spectacular - nature both of consumption generally, and of Russian consumer culture in particular. Particular attention is paid to the ways in which brands, both Russian and foreign, construct categories of identity in order to claim legitimacy for themselves. What emerges is a fascinating picture of how

consumer culture is being reinvented in Russia today, in a society which has one, nostalgic eye turned towards the past, and the other, utopian eye, set firmly on the future. Borrowing concepts from both marketing and cultural studies, the approach throughout is interdisciplinary, and will be of considerable interest, to researchers, students and practitioners wishing to gain invaluable insights into one of the most lucrative, and exciting, of today's emerging markets.

European States in the Interwar Years  
(1918–1939)* Springer Nature

This book provides an in-depth analysis of how mobilization and legitimation for war are made possible, with a focus on Russia's conflict with Chechnya. Through which processes do leaders and their

publics come to define and accept certain conflicts as difficult to engage in, and others as logical, even necessary? Drawing on a detailed study of changes in Russia's approach to Chechnya, this book argues that 're-phrasing' Chechnya as a terrorist threat in 1999 was essential to making the use of violence acceptable to the Russian public. The book refutes popular explanations that see Russian war-making as determined and grounded in a sole, authoritarian leader. Close study of the statements and texts of Duma representatives, experts and journalists before and during the war demonstrates how the Second Chechen War was made a 'legitimate' undertaking through the efforts of many. A post-structuralist reinterpretation of securitization theory

guides and structures the book, with discourse theory and method employed as a means to uncover the social processes that make war acceptable. More generally, the book provides a framework for understanding the broad social processes that underpin legitimized war-making. This book will be of much interest to students of Russian politics, critical terrorism studies, security studies and international relations.

This study assesses Moscow's special bilateral relations with Cyprus since the mid-1950s, with particular emphasis on the post-Cold War years. Melakopides develops the theory of 'pragmatic idealism' when describing the way in which Moscow's Cyprus policies were meant to satisfy not only mutual interests but also international legal and

ethical principles and norms. The book recalls Cyprus's dramatic vicissitudes since the 1950s and revisits the controversial 'political realist' policies of Washington, Ankara and London against the interests and needs of the Greek-Cypriot majority. Melakopides then goes on to analyse the regional geopolitical context; Turkey's hegemonic ambitions and its ongoing aggressiveness against Cyprus; Nicosia's current efforts to pursue a multidimensional foreign policy that also engages Greece, Israel and Egypt; the strong Russian-Cypriot diplomatic and political relations as well as their relations in trade, banking, energy, tourism, culture, energy and

defence; and the origins of Russia's historical, religious and 'spiritual' sentiments and bonds towards Hellenism and Cyprus.
