Listening BPB Publications
 Tips and techniques to build interactive learning into lecture classes Have you ever looked out across your students only to find them staring at their computers or smartphones rather than listening attentively to you? Have you ever wondered what you could do to encourage students to resist distractions and focus on the information you are presenting? Have you ever wished you

could help students become active learners as they listen to you lecture? Interactive Lecturing is designed to help faculty members more effectively lecture. This practical resource addresses such pertinent questions as, “How can lecture presentations be more engaging?” “How can we help students learn actively during lecture instead of just sitting and passively listening the entire time?” Renowned authors Elizabeth F. Barkley and Claire H. Major provide practical

tips on creating and delivering engaging lectures as well as concrete techniques to help teachers ensure students are active and fully engaged participants in the learning process before, during, and after lecture presentations. Research shows that most college faculty still rely predominantly on traditional lectures as their preferred teaching technique. However, research also underscores the fact that more students fail lecture-based courses than

classes with active learning components. Interactive Lecturing combines engaging presentation tips with active learning techniques specifically chosen to help students learn as they listen to a lecture. It is a proven teaching and learning strategy that can be readily incorporated into every teacher’s methods. In addition to providing a synthesis of relevant, contemporary research and theory on lecturing as it relates to teaching and learning, this book features 53 tips

on how to deliver engaging presentations and 32 techniques you can assign students to do to support their learning during your lecture. The tips and techniques can be used across instructional methods and academic disciplines both onsite (including small lectures and large lecture halls) as well as in online courses. This book is a focused, up-to-date resource that draws on collective wisdom from scholarship and practice. It will become a well-used and welcome addition for

everyone dedicated to effective teaching in higher education.

This imaginative and practical book contains a collection of ideas and games that should provide you with lots of new resources without spending a fortune. Some of the games and activities address particular communication themes, such as: listening techniques; speech sounds; vocabulary building; and friendship skills, while others cover

several areas simultaneously. The book is organised into chapters according to the major skill area being addressed, with suggestion for linked items in other chapters. To add to well-established and structured programmes of therapy that SLTs use, there are two principles that can make for better therapeutic outcomes, and on which the book is based: clients often respond more effectively if they feel that they "own" their therapy by

being involved in making the materials that they will use; and therapy is improved when it is good fun, and preferably humorous. You don't need to be a great artist or craftsman to create these games and activities, or huge quantities of spare time to make most of the items, especially if you can get organised with equipment all in one go. There is a basic shopping list to help you get started. It is a must have for all Speech and Language Therapists. It is presented in A4 wire-o-

bound.

[Teaching the Bible Creatively](#) Zondervan Rise Above is a detailed description of one man's journey of conquering adversity. What do you do when you need to express the meaning of a word that you don't know in a foreign language? How do you start and close a conversation, and how do you keep it going? What can you do if you are not sure about what to say in an unfamiliar situation? Communication strategies is a book about the ways and means that users of a second or foreign language can employ when they have

to face problems due to gaps in their linguistic, communicative or intercultural competence. Strategies also enable them to deal with uncertainty in personal and intercultural contacts and to increase their

autonomy in using languages. Communication strategies is both a handbook for teachers, teacher trainers and educators, providing them with a sound methodological background, and a collection of 30 practice

activities, games and tasks for language learners and users. Photocopiable worksheets are provided, as well as freely downloadable recordings of native and non-native speakers of English.
