 Programming Erlang: Software for a Concurrent World ...
 This is the definitive book on Erlang, written by Joe Armstrong, the creator of the Erlang language. The book is clearly written, with lots of small examples, and paced for the beginning Erlang programmer. Erlang takes a little getting used to. It is a functional language, meaning that functions in general are unable to cause side-effects.
 Programming Erlang by Joe Armstrong - Goodreads
 Joseph Leslie Armstrong (27 December 1950 – 20 April 2019) was a

computer scientist working in the area of fault-tolerant distributed systems. He is best known as one of the co-designers of the Erlang programming language .
 Joe Armstrong (programmer) - Wikipedia
 Erlang was created by Armstrong, Robert Virding and Mike Williams at the Ericsson telecom company in 1986 and became open source 12 years later. It is known for functional programming, immutable data, code hot-swapping and systems that require insanely high levels of availability.
 Erlang Creator Joe Armstrong Has Died - Slashdot
 Joe Armstrong is the inventor of the Erlang programming language. He has a PhD in computer science from the KTH Royal Institute of Technology in Stockholm.
 How we program multicores - Joe Armstrong
 In this interview Erlang creator Joe Armstrong, took some time to tell Computerworld about Erlang's development over the past 20 years, and what's in store for the language in the future.
 The A-Z of Programming Languages: Erlang | Computerworld
 Joe Armstrong is one of the inventors of Erlang. When at the Ericsson computer science lab in 1986, he was part of the team who designed and implemented the first version of Erlang.
 "The Mess We're In" by Joe Armstrong
 Erlang is a new programming language which was designed for programming concurrent, real-time, distributed fault-tolerant systems. Programming techniques for programming concurrent real-time systems have, for many years, lagged behind those techniques used for programming sequential applications.
 Note

to readers: Concurrent programming in Erlang
 Joe Armstrong, co-inventor of Erlang, summarized the principles of processes in his PhD thesis: Everything is a process. Processes are strongly isolated. Process creation and destruction is a lightweight operation. Message passing is the only way for processes to interact. Processes have unique names.
 Erlang (programming language) - Wikipedia
 The Erlang programming language. Erlang was co-created by Joe Armstrong alongside Robert Virding and Mike Williams in the 1980s at the Ericsson Computer Science Labs. While working there, Dr. Armstrong and his colleagues were looking for an approach to developing fault-tolerant and scalable systems. This resulted in the Erlang-style concurrency.
