### **Lecture Notes on Cardiology** Wiley-Blackwell

Lecture Notes on Cardiology, fourth edition, is a comprehensive introduction to one of the most rapidly changing specialities in clinical medicine. The completely new author team has produced an informative and highly accessible book, presenting clinical cardiology in a way that relates disease to underlying pathophysiological mechanisms, and linking this directly to the patient, their disease and its management. This new edition has been produced in response to the exciting new developments in all areas of cardiology. It has been completely revised and rewritten, with an emphasis on recent major clinical trials relating to cardiology and the huge advances made in cardiac imaging techniques. These concepts are fully illustrated and a colour plate section has been added to show emergent techniques, including Doppler imaging and MRI. The succinct and topical content of this book means that it will not only appeal to the undergraduate medical student, but also to the junior doctor studying for higher examinations.

### **Lecture Notes on Cardiology** Wiley-Blackwell

Commended in the Cardiology category at the British Medical Association Book Awards 2008 Lecture Notes: Cardiology is a comprehensive introduction to one of the most rapidly changing specialities in

clinical medicine. This informative and highly accessible book presents clinical cardiology in a way that relates disease to underlying pathophysiological mechanisms, and links this directly to the patient, their disease and its management. This fifth edition of Lecture Notes: Cardiology has been thoroughly revised and updated and remains a firm favourite with students for its: Strong focus on the clinical approach Full-colour illustrations throughout including Doppler images, clinical photographs, ECG traces and flow charts More comprehensive coverage of congenital heart disease Thorough coverage of the cardiology curricula. The succinct and topical content of this book means that it will appeal to medical students, as well as junior doctors on foundation programmes and studying for higher examinations.

### Lecture Notes on Cardiology Wiley-Blackwell

This book provides a concise and physiological account of the principles of modern cardiology. Each cardiac condition is described sequentially from anatomy to haemodynamic disturbances to interpretation of symptoms and physical signs. The prognosis and complications of the lesion lead to a description of medical treatment, indications for surgical treatment, the surgery and its results. The third edition of this book has two new authors and has been completely rewritten and expanded slightly
