### OBRIEN VALERIE

#### Proceedings of the 8th British Wind Energy Association Conference, Cambridge, 19-21 March 1986

Amer Society of Mechanical  
 Contains the proceedings of the British Wind Energy Association's 15th annual conference, with over 60 papers, including the workshop on Windfarm Optimisation.

#### Wind Energy Conversion 1996

Wiley-Blackwell  
 An exploration of wind energy technology today and tomorrow Wind energy Conversion 1996 offers a comprehensive overview of the latest developments in the field. Presented by the British Wind Energy Association, this book delves into the research and development projects being carried out by industry, academic institutions, government institutions, and private investors from around the world. As wind energy gains momentum as a serious alternative to fossil fuels, more and more attention — and funding — is being devoted to the optimization of existing technology and the development of new, more efficient devices. This book describes where we are now, and

where the technology is projected to go in the near future.

Wind Energy Conversion

4th Biennial Conference and Workshop, Washington, Oct. 1979, Proceedings Cambridge University Press

Canadian wind energy projects; Performance and size estimating for wind systems; A wake interaction model for calculating cluster efficiencies.

Proceedings of the 18th British Wind Energy Association Conference, Exeter University, UK, 25-27 September 1996 Wiley

Wind Energy 2000 - Building the 10% looks at the role wind power will play in meeting the Governments 2010 target on electricity generation from renewable sources. New projects, both on and off shore, are expected to contribute almost half of the target, recognising the maturity of the technology. Wind Energy 2000 - Building the 10% includes a special report from the development team of the landmark Blyth Offshore project on the challenges experienced in commissioning the

UK's first offshore wind turbines. Changes in both the UK electricity system and the Government's programme of support for renewable energy suggested that the focus of this year's conference should be the new policies. Sessions were accordingly convened as forums with subsequent discussion groups. Papers presented include contributions from the Department of Trade and Industry, the Crown Estate, and the Countryside Agency, including such topics as: The percentage obligation and the new electricity trading arrangements The further development of the offshore wind energy industry Regional and sustainable development within the planning system. Proceedings of the Fifth BWEA Wind Energy Conference Wiley  
 Separate abstracts are included for 38 papers presented concerning large scale wind systems, small scale wind systems, regional and economic analysis, wind characteristics research, environmental and institutional considerations, and international activities. Four papers were previously input into the energy data base. Proceedings of Cambridge University Press  
 These are the proceedings of the 17th British Wind Energy Association Conference, held in Warwick in July 1995.

*Proceedings of the 12th British Wind Energy Association Conference, Norwich 27-30 March 1990*  
 Wind Energy 2000 Building the 10%

Separate abstracts are included for papers presented concerning research and development requirements and utility interface and institutional issues for small-scale systems; design requirements and research and development requirements for large-scale systems; economic and operational requirements of large-scale wind systems; wind characteristics and wind energy siting; international activities; wind energy applications in agriculture; federal commercialization and

decentralization plans; and wind energy innovative systems.
