Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both

internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a

process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.

Olivia has waited years to take Shannon's crown as the unofficial queen of Buckhead. Finally, her moment has come. But to take her rightful place,

she will need to use every backstabbing, manipulative, underhand trick in the book ... Jenny owns Glow, the most exclusive salon in town. Jenny knows all her clients' secrets and darkest desires.
