The New York Times Bestselling guide for managers and executives. Introducing the new, realistic loyalty pact between employer and employee. The employer-employee relationship is broken, and managers face a seemingly impossible dilemma: the old model of guaranteed long-term employment no longer works in a business environment defined by continuous change, but neither does a system in which every employee acts like a free agent. The solution? Stop thinking of employees as either family or as free agents. Think of them instead as allies. As a manager you want your employees to help transform the company for the future. And your employees want the company to help transform their careers for the long term. But this win-win scenario will happen only if both sides trust each other enough to commit to mutual investment and mutual benefit. Sadly, trust in the business world is hovering at an all-time low. We can rebuild that lost trust with straight talk that recognizes the realities of the modern economy. So, paradoxically, the alliance begins with managers acknowledging that great employees might leave the company, and with employees being honest about their own career aspirations. By putting this new alliance at the heart of your talent management strategy, you'll not only bring back trust, you'll be able to recruit and retain the entrepreneurial individuals you need to adapt to a fast-changing world. These individuals, flexible, creative, and with a bias toward action, thrive when they're on a specific "tour of duty"—when they have a mission that's mutually beneficial to employee and company that can be completed in a realistic period of time. Coauthored by the founder of LinkedIn, this bold but practical guide for managers and executives will give you the tools you need to recruit, manage, and retain the kind of employees who will make your company thrive in today's world of constant innovation and fast-paced change.

For business investors in China, the legal handling of trade secrets is often crucial. However, initiatives are often complicated by a patchwork trade secrets protection system - pieced together haphazardly over the last two decades and drawing on disparate elements of competition law, contract law, employment law, and criminal law - that diverges in significant ways from global standards and corresponding regimes in other countries. Now at last interested parties can benefit richly from a thorough and practical approach to the subject. This detailed analysis of China's trade secrets law provides in-depth information and guidance on such important factors as the following: the current framework of China's trade secrets law, its past development and its ongoing trends; legal comparison of China's trade secrets law with various international, regional, and national schemes; what constitutes trade secrets infringement in China and what remedies are available; and the legal interaction in China between employment relations and trade secrets protection. The author pays close attention to judicial practice and precedent in the areas of civil remedies, criminal punishment, and administrative penalties. She also offers insightful proposals formulated to align China's trade secrets law more efficiently with prevailing global standards and generally improve the mechanisms for its implementation. Corporate counsel and international lawyers concerned with intellectual property rights or labour law in China will greatly appreciate the knowledgeable guidance this book affords. They will gain a deeply informed perspective that allows them to avoid infringement, to battle it effectively if occasion arises, and to plan dispute resolution strategies for contingencies involving trade secrets protection in China.
