GRIFFIN CRISTOPHER

Communism: A Very Short

Introduction Oxford University Press - Children

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war."

Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries. *Modern Albania* Oxford University Press

A central question in Christian ethics is the relationship between the moral principles we should follow within the Christian community and the ethics followed in the secular societies in which we live. Our dilemma is that we have received a revelation of God's moral will in the Bible and in creation which must shape the identity of believers over against unbelieving cultures, while our neighbors follow the ethics of other world views which concern us deeply. Remember the Holocaust, where the ethics of a secular ideology wreaked destruction in an entire society. How should we, as Christians whom God has called to a distinct identity, participate in the moral considerations that will shape our cultures and communicate some of our convictions in a way that brings moral light into our worlds? Johnson offers the insight gained by 20 years of teaching ethics in secular universities in Europe and North America. First he addresses questions of sex, marriage, and family; then questions of work and economics; and finally theological and philosophical foundations.

Digenis Akritis is Byzantium's only epic poem, telling of the exploits of a heroic warrior of 'double descent' on the frontiers between Byzantine and Arab territory in Asia Minor in the ninth and tenth centuries. It survives in six versions, of which the two oldest, dating from the thirteenth and fifteenth centuries, are presented here in an edited version. The manuscripts are preserved in the Grottaferrata monastery near Rome and the Escorial Library in Spain. Behind these two versions lies a twelfth-century poem that can now be glimpsed at but not reconstructed. This edition and translation aims at highlighting the nature of the lost poem, and at providing a guide through the maze of recent discussions about the epic and its background.

Masterful in its simplicity, *Chronicle in Stone* is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

From the late 1920s onwards, forced collectivisation, state-directed industrialisation, mass purging and the party's control of culture, refashioned Russia and gave birth to a new type of society. The 'second revolution' and its aftermath remodelled the Soviet State and the Bolshevik party, restructured all institutions and reconstituted all social relationships. Millions found their lives changed forever. Nothing was untouched and no one was unaffected. Presiding

over these momentous changes was Joseph Stalin, one of the twentieth century's most disturbing figures. "The Stalinist Dictatorship" looks at the regime from three different perspectives.

Section one focuses on interpretations of Stalin's character and attempts to explain the everlasting puzzle of the relationship between events and personality. Section two looks at Stalin's role within the Soviet Union, and sees him as only one part (albeit an important one) of a complex culture of politics and administration. The final section examines the ways in which the Soviet people handled socialism, and how Stalinism functioned on the ground. The vicissitudes in Stalin's reputation reflect the vicissitudes of the history of the twentieth century itself. Stalin became a symbol of a new system, a 'socialist' alternative to the capitalist path.

This book builds a new vision of the development of Russian revolutionary culture, bringing together fiction, criticism, utopian projects, manifestos, performance and film theory, religious philosophy, and the imaginary space of communism centered around the Mummy of Lenin. Revolution and modernization are two main issues of the book. The author argues that in Modernism the work of art was conceived as a miniature of the world to come; thus, art was meant to make projects, not master-pieces. He analyzes the genre of the manifesto as a special rhetorical device of modernist discourse and shows how projects of biological and social engineering elaborate a vision of a future human type apt to exist under unprecedented conditions. Red Square, Black Square traces the process of totalitarian reduction of the modernist impulse into a rigid party doctrine. It follows the turbulent development of Russian Modernism through its categorical arrest under the official doctrine of "socialist realism." Moscow's Red Square is examined as a primal communist space that manifests the symbolism of power. Viewing communism as an aesthetically, not economically, motivated society, the book enacts "political aesthetics" as a discipline that provides the fundamental

tool for an adequate and thorough understanding of communism. Todorov concludes by discussing the rise of nationalism in Eastern Europe as a post-communist condition, and the new mission of the intellectuals.
