Laos Internet and E-Commerce Investment and Business Guide Volume 1 Strategic Information and Regulations
Lulu.com
This timely book provides the first systematic analysis of global public procurement regulation and policy during and beyond the COVID-19

pandemic. Through both thematic chapters and national case studies, this book: - explores the adequacy of traditional legal frameworks for emergency procurement; - examines how governments and international organisations have responded specifically to the pandemic; and - considers how the

experience of the pandemic and the political impetus for reform might be leveraged to improve public procurement more broadly. Public procurement has been critical in delivering vital frontline public services both in the health sector and elsewhere, with procurement of ventilators, protective equipment

and new hospitals all hitting the headlines. At the same time, procurers have faced the challenge of adjusting existing contracts to a new reality where, for example, some contracted services can no longer operate. Further, efficient and effective procurement will be an essential, and not a luxury, in the economic recovery. With case studies on Italy, the

UK, the USA, India, Singapore, Africa, Latin America and China, the book brings together the world's leading academics and practitioners from across Europe, the Americas, Asia and Africa to examine these issues, providing an essential resource for policy makers, legislators, international organisations and academics. Bhutan Business Law Handbook Volume 1

Strategic Information and Basic Laws World Bank Publications
The current universal concerns about global energy security, competitiveness, and environmental protection make energy efficiency more important than ever. However, realizing large-scale savings has proven a significant challenge due to many barriers. 'Public Procurement

of Energy Efficiency Services' looks at a largely untapped energy efficiency market the public sector. While the efficiency potential in this sector is substantial, the implementation of energy savings programs has been complicated by a number of factors, such as insufficient incentives to lower energy costs, rigid budgeting and procurement procedures, and limited access to financing. The book looks at energy savings performance contracts (ESPCs) as a means of overcoming some of these barriers. Because public facilities can outsource the full project cycle to a commercial service provider, ESPCs can enable public agencies to solicit technical solutions, mobilize commercial financing, and assign performance risk to third parties, allowing the agency to pay from a project's actual energy savings. The recommendations in this book stem from case studies that identified approaches, models, and specific solutions to ESPC procurement, including budgeting, energy audits, and bid evaluation. Such an approach also offers enormous potential to bundle, finance, and

implement energy efficiency projects on a larger scale in the public sector, which can yield further economies of scale. ESPCs can also serve as an attractive element for fiscal stimulus packages and efforts by governments to 'green' their infrastructure, which can create local jobs, reduce future operating costs, and mitigate their carbon footprint. Lower energy bills, in turn,

help to create fiscal space in future years to meet other critical investment priorities. Bundled public sector energy efficiency projects can help stimulate local markets for energy efficiency goods and services and 'lead by example', demonstrating good practices and providing models to the private sector. **Public Procurement and Human Rights** Bloomsbury Publishing Энэхүү журам нь

 This timely work reflects on the role and obligations of the state as a buyer of goods and services, from the dual

disciplinary perspectives of public procurement and human rights. Through theoretical and doctrinal analyses, and practice-focused case studies, it interrogates the evolving character of public procurement as an interface for multiple normative regimes and competing policies. Challenging the prevailing paradigm which subordinates human rights to narrowly-

defined economic goals, insightful contributions advance a compelling case for greater inter-disciplinarity and policy coherence as crucial to realising international policies such as those embodied in the UN Guiding Principles on Business and Human Rights and 2030 Sustainable Development Goals.

The Law and Governance of the Asian Infrastructure Investment

Bank Kluwer Law International B.V. This publication displays the menu for choice of available methods to evaluate the impact of Free Trade Agreements (FTAs). It caters mainly to policy makers from developing countries and aims to equip them with some economic knowledge and techniques that will enable them to conduct their own

economic evaluation studies on existing or future FTAs, or to critically re-examine the results of impact assessment studies conducted by others, at the very least.

Asian Development Bank Sustainability Report 2020

Asian Development Bank After centuries of neglect, the land transport corridors connecting Asia and Europe are on the brink of a rebirth. From practically

nothing, a revived network of these land corridors is likely to lead to a considerable share of the freight revenues being generated by the increased trade between Asia and Europe. That is why there is fierce competition among the major players for control in shaping the Asia-Europe railway transport corridors. However, there are also new and exciting

possibilities for cooperation among the various players. We will extensively examine and evaluate the transport corridors linking Asia and Europe. The Baku-Tbilisi-Kars railway project will be assessed from the perspectives of the three countries involved: Azerbaijan, Georgia and Turkey. It has been shown that the railroad will economically strengthen the

region and better integrate the three host countries into international transport corridors. The Baku-Tbilisi-Kars railroad will certainly play a key role in helping to revive the Silk Road connection, thereby creating common interests and facilitating the transformation of the region. The BTK transport corridor will not only stimulate the economies of the countries involved but help wean

them their off oil-dependence and restore their rightful place as major commercial hubs along the once-legendary Silk Road. The attraction of direct foreign investment and establishment of partnerships between the public and private sectors are key issues that will be explored in-depth in this book. By 2025, the region is expected to become a prosperous

financial sector and transit area; a comprehensive strategy to that end which incorporates the principles of sustainable growth is being formulated by the countries involved.

Realizing the Potential of Public-Private Partnerships to Advance Asia's Infrastructure Development
WorldFish Project economic analysis is a tool used by the Asian Development Bank (ADB) to ensure that

ADB operations comply with its Charter. The guidelines in this publication are a revised version of the 1997 edition. The revision responds to the changing development context and ADB operational priorities, and aims to address the recommendations of the ADB Quality-at-Entry Assessments for more methodological work on project economic analysis. The revised

<p>guidelines provide general principles for the conduct of project economic analysis, and should be read together with handbooks, technical reports, and other reference materials published by ADB dealing with sector-specific project economic analysis in detail.</p> <p><i>Baku-Tbilisi-Kars Railroad: Future Opportunities and Prospects</i> Edward Elgar Publishing</p>	<p>How do international organizations procure goods, services and works to carry out their institutional mission? How does this procurement activity affect individuals? Does the procurement relationship between international organizations and private subjects bring an even distribution of rights and duties? Are international organizations accountable to private subjects and states when</p>	<p>allocating their resources through procurement? The book explores the complex phenomenon of procurement by international organizations from the point of view of the relationship between international organizations and private subjects. national and public interest, with scant regard for the 'rule of law', and hollow dictates by international agencies, on governance, transparency and level playing field. President Chandrika Bandaranaike Kumaratunga, in a Memorandum to Cabinet Ministers opposed this privatization. Prime Minister Ranil Wickremesinghe disregarding the President had pushed the deal, with his Advisor, former Secretary, Ministry of Finance, R. Paskaralingam ; approved by Economic Sub-Committee of Cabinet, including Finance Minister, K.N. Choksy, PC. It reveals condoning of fraud and corruption by confidantes of those at helm in a country; with governments and society uninhibitedly bestowing upon corrupt miscreants, even more recognition and position, without arraigining them, as warranted, before the law; President Mahinda Rajapakse re-appoints, P.B. Jayasundera, Secretary, Finance Ministry / Secretary Treasury. Susantha Ratnayake, continues as Chairman, John Keells, and helms Ceylon Chamber of Commerce; appointed Chairman, Sri Lanka Tea Board, by Government New Chief Justice, J.A.N. de Silva and other

Supreme Court Judges act to accommodate necessity of President Mahinda Rajapakse, when P.B. Jayasundera is permitted to be re-appointed to same powerful position. A sole woman, Justice Shiranee Tilakawardena courageously dissents, upholding principles of moral turpitude and democracy to keep organs of State within the law - `anyone would balk at such re-

appointment'; 2 pages of Judgment suppressed from media.

Guide to Performance -Based Road Maintenance Contracts

Asian Development Bank
The Asian Infrastructure Investment Bank (AIIB), which began operations in 2016 and now has an approved membership of eighty-four worldwide, has quickly become perhaps one of the world's most promising agents of

global economic development. With its firm commitments to the twenty-first century imperatives of cost-effectiveness, zero tolerance for corruption and active promotion of environmental sustainability, its clearly stated aims and requirements echo the goal of reform that other multilateral institutions are undertaking. This book is among the first to offer an incisive introduction to

the AIIB's law and governance, which are now essentially in place. From a perspective of Chinese multilateralism, which parts ways from the dominant twentieth-century Bretton Woods arrangements, the author provides in great depth the details of such elements of the Bank's Articles of Agreement as the following:

- non-resident board system;
- procurement;
- role of trust funds;
- state-owned enterprises as private entities;
- immunity;
- dispute settlement;
- accountability for involuntary resettlement and human rights violations;
- policy on prohibited practices.

Throughout, the author provides deeply informed comparisons with such existing multilateral development banks as the World Bank, the African Development Bank, the Asian Development Bank, the European Bank for Reconstruction and Development and the Inter-American Development Bank, as well as with the World Trade Organization. He shows how the AIIB not only emulates but also innovates while continuing to collaborate closely with these institutions. He suggests what should be done to optimize governance, standards and operations of the AIIB

together with these peer institutions in a mutually emulating manner. Lawyers and policymakers involved in international economic law and related fields will welcome this nuanced and in-depth description and analysis of the AIIB. Its concomitant analysis of political economy and global governance issues will be of interest to bankers, businesses, government officials and others looking

for an overall understanding of multilateral development banking and China's approach toward global governance in particular. International Convergence of Capital Measurement and Capital Standards Asian Development Bank This publication provides a snapshot of the overall public-private partnership (PPP) landscape in Indonesia. It includes more than 500 qualitative

and quantitative indicators to profile the national PPP environment, the sector-specific PPP landscape (for eight identified infrastructure sectors), and the PPP landscape for local government projects. This downloadable guide also captures the critical macroeconomic and infrastructure sector indicators (including the Ease of Doing Business scores) from globally

accepted sources. Through Presidential Regulation 38/2015, the cornerstone of the country's robust PPP enabling framework, Indonesia expects PPPs to continue playing a pivotal role to achieve its infrastructure investment target of \$429 billion for 2020-2024 and mobilize 59% of this value from the private sector. Public-Private Partnership Monitor Asian Development Bank Innovation in

public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy. To achieve that potential, both the promises and the perils of innovation must be investigated, including the risks and opportunities of joint procurement across borders in the European Union and the United States. This in-depth research investigates innovation in public procurement

from three different perspectives. First, leading academics and practitioners assess the purchase of innovation, with a particular focus on urban public contracting in smart cities involving meta-infrastructures, public-private partnership arrangements and smart contracts. A second line of inquiry looks for ways to encourage innovative suppliers. Here, the

collected authors draw on emerging lessons from the US and Europe, to explore both the costs and the benefits of spurring innovation through procurement. A third perspective looks to various innovations in the procurement process itself, with a focus on the effects of joint and cross-border procurement in the EU and US landscapes.

The chapters review new technologies and platforms, the increasingly automated means of selecting suppliers, and the related efficiencies that “big data” can bring to public procurement. Expanding on research in the editors’ prior volume, Integrity and Efficiency in Sustainable Public Contracts: Balancing Corruption Concerns in

Public Procurement Internationally (Bruylant 2014), this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic, institutional and practical perspectives, and to point the way to future research on the contractual models that are emerging from new procurement technologies.
