Goldie Roth is a trained thief and a skilled liar. Along with her friend Toadspit, she's supposed to be one of the Keepers of the mysterious Museum of Dunt. But although she desperately wants to be a Keeper, she will not leave her sick parents to do so. But when Toadspit's sister Bonnie is stolen, he and Goldie are forced to follow the child-stealers to the neighboring city of Spoke. Along the way, Toadspit too is captured, and Goldie is caught up in the Festival of Lies, where every word she says means something else and no one can be trusted. There, Goldie discovers some dangerous secrets—secrets that the child-stealers will kill to protect. She will need all her skills as a thief and a liar if she is to survive and save her friends.

Having discovered a monstrous conspiracy to overthrow the pharaoh, Ramses the Great, Judge Pazair has been deported for a crime he did not commit and sentenced to die in a prison camp. But the conspirators have reckoned without the love of Neferet, the young woman doctor Pazair has

just married, and the courage of Suti, his friend with the hot head and the generous heart. Together, Neferet and Suti attempt to rescue Pazair so that he can resume his investigation. For there are many questions yet to be answered. Who murdered the veteran guards of the Great Sphinx? Who violated the Great Pyramid and stole the Testament of the Gods, which guarantees Pharaoh's legitimacy? Who killed Pazair's spiritual master?

Things Wilf is worried about before: 1. Lion dentists. 2. Creepy crawlies wearing wigs. 3. Marmite. Things Wilf is worried about now: 4. The most evil man in the world. 5. Actually, anyone named Alan. 6. Alan deciding to become a pirate and destroy the world. Alan is Wilf's self-styled evil lunatic next-door-neighbor. He has a grumpy robot sidekick and a silent, right-hand-dog, Kevin Phillips. All in all, he is kind of ridiculous. But when Alan decides that pirating is an excellent way to destroy the world, Wilf knows he will have to overcome his fear of parrots and walking the plank to stop him . . .

Approximately 500,000 bridges in the National Bridge Inventory (NBI) are built over streams. A large proportion of these bridges span alluvial streams that are continually adjusting their beds and banks. Many, especially those on more active streams, will experience problems with aggradation, degradation, bank erosion, and lateral channel shift during their useful life. The purpose of this document is to provide guidelines for identifying stream instability problems at highway stream crossings. Techniques for stream channel classification and reconnaissance, as well as rapid assessment methods for channel instability are summarized. Qualitative and quantitative geomorphic and engineering techniques useful in stream channel stability analysis are presented. This publication is an update of the third edition published in 2001. The HEC-20 manual covers geomorphic and hydraulic factors that affect stream stability and provides a step-by-step analysis procedure for evaluation of stream stability problems. Stream channel classification, stream reconnaissance techniques, and rapid assessment methods for channel stability are covered in detail. Quantitative techniques for channel stability analysis, including degradation analysis, are provided, and channel restoration concepts are introduced. Significant new material in this edition includes chapters on sediment transport concepts and channel stability in gravel bed streams, as well as expanded coverage of channel restoration concepts.

THE CLASSIC WORK OF ARCHIMEDES The Sand-Reckoner Dimensio Circuli of Archimedes Translated by Thomas L. Heath (Original publication: Cambridge University Press, 1897). The Sand Reckoner is a work by Archimedes in which he set out to determine an upper bound for the number of grains of sand that fit into the universe. In order to do this, he had to estimate the size of the universe according to the contemporary model, and invent a way to talk about extremely large numbers. The work, also known in Latin as Archimedis Syracusani Arenarius and Dimensio Circuli, which is about 8 pages long in translation, is addressed to the Syracusan king Gelo II (son of Hiero II), and is probably the most accessible work of Archimedes; in some sense, it is the first research-expository paper. Archimedes died during the Siege of Syracuse when he was killed by a Roman soldier despite orders that he should not be harmed. Cicero describes visiting the tomb of Archimedes, which was surmounted by a sphere and a cylinder, which Archimedes had requested to be placed on his tomb, representing his mathematical discoveries. Unlike his inventions, the mathematical writings of Archimedes were little known in antiquity. Mathematicians from Alexandria read and quoted him, but the first comprehensive compilation was not made until c. 530 AD by Isidore of Miletus in Byzantine Constantinople, while commentaries on the works of Archimedes written by Eutocius in the sixth century AD opened them to wider readership for the first time. The relatively few copies of Archimedes' written work that survived through the Middle Ages were an influential source of ideas for scientists during the Renaissance, while the discovery in 1906 of previously unknown works by Archimedes in the Archimedes Palimpsest has provided new insights into how he obtained mathematical results.

"Breathtaking in its scope and wonderfully illuminating. . . . one of the most powerfully convincing characters in recent historical fiction." —Alberto Manguel, *The Guardian* Gossip was rife in the capital about the poetess of Qazvin. Some claimed she had been arrested for masterminding the murder of the grand Mullah, her uncle. Others echoed her words, and passed her poems from hand to hand. Everyone spoke of her beauty, and her dazzling intelligence. But most alarming to the Shah and the court was how the poetess could read. As her warnings and predictions became prophecies fulfilled, about the assassination of the Shah, the hanging of the Mayor, and the murder of the Grand Vazir, many wondered whether she was not only reading history but writing it as well. Was she herself guilty of the crimes she was foretelling? Set in the world of the Qajar monarchs, mayors, ministers, and mullahs, this book explores the dangerous yet luminous legacy left by a remarkable person. Bahiyiyh Nakhjavani offers a gripping tale that is at once a compelling history of a pioneering woman, a story of nineteenth century Iran told from the street level up, and a work that is universally relevant to our times. "Mordant and seethingly intelligent." —Sam Sacks, *Wall Street Journal* "An engrossing story." —Gayatri Devi, *World Literature Today* "Haunting . . . reminds us all that whether Tudor, Qajar, or Clinton, behind every throne is a queen mother, wife, and sister who runs the show." —Davar Ardalan, *Washington Independent Review* "Nakhjavani offers a philosophically complex yet lyrically wrought examination of the eternal struggle for women's rights." —Carol Haggas, *Booklist* "Nakhjavani deftly transforms an incomplete history into legend. . . . An expertly crafted epic." —Kirkus Reviews

Recently widowed, Rebecca Parcell is too busy struggling to maintain her farm in Morristown to give a fig who wins the War for Independence. But rumors are spreading in the winter of 1780 that she's a Loyalist sympathizer who betrayed her husband to the British—quite a tidy way to end her disastrous marriage, the village gossips whisper. Everyone knows that her husband was a Patriot, a hero who died aboard a British prison ship moored in New York Harbor. But "everyone" is wrong. Parcell was a British spy, and General Washington—who spent that winter in Morristown—can prove it. He swears he'll safeguard Becca's farm if she unravels her husband's secrets. With a mob ready to exile her or worse, it's an offer she can't refuse. Escaped British prisoner of war Daniel Alloway was the last person to see Becca's husband alive, and Washington throws this unlikely couple together on an espionage mission to British-occupied New York City. Moving from glittering balls to an underworld of brothels and prisons, Becca and Daniel uncover a plot that threatens the new country's future. But will they move quickly enough to warn General Washington? And can Becca, who's lost almost everyone she loves, fight her growing attraction to Daniel, a man who always moves on?

AVAILABLE FOR THE FIRST TIME IN eBook! In 1955, Garcia Marquez was working for El Espectador, a newspaper in Bogota, when in February of that year eight crew members of the Caldas, a Colombian destroyer, were washed overboard and disappeared. Ten days later one of them turned up, barely alive, on a deserted beach in northern Colombia. This book, which originally appeared as a series of newspaper articles, is Garcia Marquez's account of that sailor's ordeal. Translated by Randolph Hogan.

The Celts

An ambitious tale of feminine friendship, madness, a radically changing city, and the vulnerability that makes us divulge our most shameful secrets. It begins as Elisa transcribes the chaotic testimony of her roommate Susana, acting as part-therapist, part-confessor as Susana reveals the gripping account of her strange sexual urges and the one man who can satisfy them. But is Susana telling the truth? And what to make of the story that follows, where Elisa considers her own life failures, blending her literary ambitions with her deep need for catharsis? And then, one last surprise makes us question everything we have just read.
