Supervision is increasingly required for a coach's and a mentor's professional development, and engaging in reflective practice with peers can be a valuable way of meeting these needs. Peer supervision brings unique challenges though, including the possibility of collusion or stagnating at a shared developmental level. This book is written by practicing professional supervisors who engage in peer supervision themselves and train communities of coaches and mentors. It guides practitioners to develop and integrate their range of individual and group reflective practice activities alongside professional supervision. It draws upon essential theory and methodology, explores challenges and ethical dilemmas faced within peer supervision, and provides concrete guidance, useful techniques and helpful templates. This practical guide will be vital reading for individual coaching and mentoring practitioners and peer learning groups including within communities, universities and/or training programs. It will also support professional supervisors and organizations developing coaching cultures.

Learning through dialogue brings a powerful opportunity to navigate professional demands and meet the challenges of a turbulent world. Written for

all who mentor or coach in universities, this book addresses a critical question: how can mentoring and coaching be an effective and accessible way to support researcher and academic development?

Coaching, counseling, and mentoring can dramatically improve employee productivity and satisfaction. But there's a big difference between continuously encouraging employees to do their jobs well (coaching), attempting to fix poor performance (counseling), and helping top performers excel (mentoring). Unfortunately, most managers don't truly understand how and when to do each. Coaching, Counseling & Mentoring provides helpful tools like self-assessments and real-life scenarios, and gives managers specific, practical guidance on using these techniques to improve the performance of all their people. This updated and revised second edition includes useful scripts for talking to employees about sensitive issues, and new material on topics including working with off-site employees, what to say when an employee denies a problem exists, whether or not to coach temps and part-timers, how to draw the line between the mentoring and supervisory role, and what to do when counseling fails. This is an essential guide for managers who want to build their confidence and skill in getting the most from their people.

The coaching/mentoring approach is probably the most effective way of helping others to achieve optimum performance in the workplace. Dr MacLennan's book covers the entire subject from basic skills to designing and implementing a tailor-made coaching and mentoring system. He starts by explaining the nature of achievement and the factors that determine it, and then introduces a seven-stage model that will enable managers and

supervisors to encourage their people to develop their skills. He examines the problems commonly encountered and shows how to overcome them or, in some cases, turn them to positive account. The book is interactive throughout, using cartoons, humour, self-assessment questions, case studies and illustrations to reinforce the text. A particularly valuable feature is a set of checklists that together summarize the key elements involved. Coaching and Mentoring is, quite simply, a comprehensive manual of the best methods known today of helping people to succeed.
