MONROE LANE

The FGF23-Klotho axis: endocrine regulation of phosphate

homeostasis Bone

Fibrous

Osteodystrophy

Appropriate levels of

phosphate in the body

are maintained by the

coordinated regulation

of the bone-derived

growth factor FGF23

and the membrane-

bound protein Klotho.

The endocrine actions

of ...The FGF23-Klotho axis: endocrine regulation of

phosphate

homeostasis

Other disease causes were

rabies, squamous cell

carcinoma, fibrous

osteodystrophy,

fractures and

traumatism,

hypovolemic shock,

and feline lower

urinary tract disease.

Conclusions

In conclusion, the

...Causes of Death of

Domestic Cats in a

Veterinary Hospital of

Minas Gerais State,

Brazil: A Retrospective Study Signs include profound polydypsia, polyuria, failure to grow, anemia, renal osteodystrophy and other typical findings ... poor visualization with a intravenous pyelogram, and small fibrous kidneys ...
