Boeing 737-300 CBT #01 Electrical System - Overview Boeing 737 Electrical System Maintenance There are three golden rules of 737 electrics: 1. There is no paralleling of AC power. 2. The source of AC power being connected to a generator bus takes priority and automatically disconnects the existing source. 3. A source of AC power does not enter the system automatically (when it reaches proper voltage & freq). 737 Electrics - The Boeing 737 Technical Site Installed on the CFM56-7 engines of 737-600, 737-700, 737-800, and 737-900 airplanes, this new type of PCS is designed for maximum engine performance, optimum engine operability, and effective integration with other airplane systems. 737-600-700-800-900 Propulsion Control System - boeing.com Boeing has developed a self-paced, 737 based Future Air Navigation System (FANS) course.
