Systems in Arid and Semi-arid Areas 1. MetaMeta Research Hertogenbosch The Netherlands. 2. Ministry of Water Resources and Electricity The Hydraulic Research Centre Khartoum Sudan. 3. Institute of Water and Environment Mekelle University Mekelle Ethiopia. The Promise of Flood-Based Farming Systems in Arid and ...Flood based farming systems in Africa. 6 Regarding flood rise farming, rice is sown when the rainy season starts. When the rice has reached 12 cm, it can resist floods and water logging conditions. Therefore farmers protect their plots with bunds to prevent harmful early floods. [spate-irrigation.org](http://spate-irrigation.org) Flood-based farming systems (FBFS) are the only option to transform such seasonal floods from forces of destruction to sources of livelihood for the most vulnerable ASAL community. FBFS are for multiple uses: crop, rangeland and agro-forest production, domestic and livestock water supply, Integrated Watershed Management and Flood-based Farming ...Project Overview IWMI is coordinating a project to investigate flood-based farming systems in Myanmar, as part of an international program on Flood Based Farming Systems (FBFS) funded by the International Fund for Agricultural Development (IFAD). Project Overview - Supporting Flood-Based Farming Systems ...Flood-based farming systems accounts for over 30 and 15 million hectares across the world and Sub-Saharan Africa respectively. It also supports around 75 million most vulnerable segments of society across the world. Flood based farming practices is found in the Middle East, North Africa, West Asia, East Africa and parts of Latin America. Potential Bright Spots for Flood-based Farming Systems in ...flood-based irrigation design in Tigray, Ethiopia 2002 and before Closed conduit gate (1 m); 900 •Design capacity: 400 ha •Actual capacity: 0 ha 2005

Closed rectangular gate (1 m); 900 •Design Capacity: 400 ha  
 •Actual capacity: 0 ha 2008 to 2010 Open gate (3m ); 1200  
 •Design capacity: 500 •Actual capacity : 300 Now (2014) Open gate (5m)  
 Design Guidelines for Flood-Based Farming Systems Promoting Flood Based farming Systems for Improved Food Security in Malawi Macpherson Nthara, Ministry of Agriculture, Irrigation and Water Development Faidess Mwale (PhD) University of Malawi Promoting Flood Based farming Systems for Improved Food ...Flood-based farming systems use either the direct diversion of floods from nearby mountains or the residual moisture of seasonally flooded lands when the floods recede. The area that could be irrigated by such kinds of practices varies from year to year depending on the availability of Potential Assessment of Flood Based Farming on lower Omo ...Flood-based farming is among the potential options in ensuring access to water for crop and livestock production for small-scale farmers in the arid and semiarid lowlands of sub-Saharan Africa, and Ethiopia in particular. Flood-based irrigation while inexpensive is rooted in Flood-based Farming for Food Security and in particular and flood-based farming in general constitute the process of utilizing excess runoff (floods) in areas where no other options are possible (Mehari et al. 2005a). Spate Irrigation in Tigray: The Challenges and Suggested ...Modelling Risk and Uncertainty in Flood-based Farming Systems in East Africa. FBFS are extensive in East Africa, particularly in Kenya and Ethiopia, where they provide food to millions of people, along with many other agro-ecosystems services. Scientists have developed many crop models as important tools for agricultural development, ...Modelling Risk and Uncertainty in Flood-based

Farming ...Flood-based farming systems (FBFS) rely on seasonal floods that provide beneficial water and nutrients, but also pose many risks and uncertainties for agricultural production. FBFS are extensive in East Africa, particularly in Kenya and Ethiopia, Modelling Risk and Uncertainty in Flood-based Farming ...managing flood-based farming systems in arid lowlands of Ethiopia. We take immense pleasure in thanking our young professionals, Mr. Kbrom Ambachew Gebrehiwot and Mr. Birhanu Kindishih Hishe. They have been a source of energy and innovation; they have worked tirelessly to ensure proper documentation of even the very minor details discussed during Flood-Based Farming for Livelihoods in Ethiopia Lowlands Flood based farming systems • Contributes to a wider, international program to build capacity in Flood Based Farming Systems (FBFS) • Support government to exploit floods in the Ayeyarwady Delta to meet development goals sustainably and inclusively • Support dialog around managing multi-functional landscapes Suite of activities assessing flood-based farming systems in Myanmar, as part of an international program on Flood Based Farming Systems Characterizing flood based farming systems in the ...Flood-based irrigation while inexpensive is rooted in tradition in many rural communities which is in contrast to many other irrigation types which are unavailable (in terms of water source, technology or capacity) or are costly to develop. Constraints to the Development, Operation and Maintenance ...The Spate Irrigation Network Foundation (SpNF) is promoting Flood-based Farming Systems (FBFS) for multiple use including crop production, agro-forestry, domestic and livestock water supply, groundwater recharge and climate mitigation. IWRM

FROM CONCEPT TO PRACTICE: USEFULLNESS AND LIMITATIONS ...In order to reduce vulnerability, this study provides five policy options for government and nongovernmental organization interventions, including the need to transform rural economies beyond the traditional rainfed and flood-based farming systems. Systems Analysis of Vulnerability to Hydrometeorological ...Types of flood-based farming systems. Four main types of flood-based farming systems have been identified: Floodplain agriculture, which is the most common type of flood-based farming in sub-Saharan Africa, and where either receding or rising floodwaters provide water for crop cultivation. wle.cgiar.org Flood-based farming systems (FBFS) rely on seasonal floods that provide beneficial water and nutrients, but also pose many risks and uncertainties for agricultural production. FBFS are extensive in East Africa, particularly in Kenya and Ethiopia, where they provide food to millions of people, along with many other agro-ecosystems services. managing flood-based farming systems in arid lowlands of Ethiopia. We take immense pleasure in thanking our young professionals, Mr. Kbrom Ambachew Gebrehiwot and Mr. Birhanu Kindishih Hishe. They have been a source of energy and innovation; they have worked tirelessly to ensure proper documentation of even the very minor details discussed during Flood-Based Farming for Livelihoods in Ethiopia Lowlands Flood-based farming systems (FBFS) rely on seasonal floods that provide beneficial water and nutrients, but also pose many risks and uncertainties for agricultural production. FBFS are extensive in East Africa, particularly in Kenya and Ethiopia, where they provide food to millions of people, along with many other agro-

ecosystems services.

Design Guidelines for Flood-Based Farming Systems

Project Overview IWMI is coordinating a project to investigate flood-based farming systems in Myanmar, as part of an international program on Flood Based Farming Systems (FBFS) funded by the International Fund for Agricultural Development (IFAD).

Potential Assessment of Flood Based Farming on lower Omo ...

Flood-based irrigation while inexpensive is rooted in tradition in many rural communities which is in contrast to many other irrigation types which are unavailable (in terms of water source, technology or capacity) or are costly to develop.

Modelling Risk and Uncertainty in Flood-based Farming ...

Modelling Risk and Uncertainty in Flood-based Farming Systems in East Africa. FBFS are extensive in East Africa, particularly in Kenya and Ethiopia, where they provide food to millions of people, along with many other agro-ecosystems services. Scientists have developed many crop models as important tools for agricultural development,...
