Written jointly by practitioners and academics, the book provides the theoretical underpinnings behind organizational development and practical insights based on real case studies. The first section of the book brings together a review of current thinking in 2003. The middle section comprises a diverse selection of case histories which examine the role of the change agent, both in successes and failures. The final section of the book draws things together by highlighting where generalized insights appear to have emerged from the practice of the contributors, and gives some pointers for moving practice forward into the 21st century. Throughout, the benefit of reflective practice is encouraged and the commentary accompanying each case history demonstrates what can be learned from this. Change Management and the Human Factor Routledge

Contemporary organisation development (OD) in practice draws on sophisticated theory and tools to advance organisational change, using a range of concepts and techniques including positive psychology, appreciation, and active engagement with the workforce. OD is considered to be humanistic and, as a result, progressive. Mark Cole's original and thought-provoking treatise points at a hole at the heart of OD practice: it fails to consider the role of power in the workplace - and the result is disempowering. Drawing from critical theory as a radical means to redefine practice, Mark Cole exposes this paradox and reveals the significant limitations and negative impacts of current OD practice. We need to replace the idea of the organisation with a focus on active human organising to enable individuals within systems to effect change from the grassroots up: this concept is Radical OD. Essential reading for students, practitioners, and academics of OD; the wider HR community, and all with an interest in developing their understanding of organisational life, this ground-breaking manifesto offers unique and challenging insight into the corporate presence of OD - and challenges the willing reader to reimagine the focus and intent of this work.
