“And I tell you, if you

have the desire for knowledge and the power to give it physical expression, go out and explore,” wrote Apsley Cherry-Garrard in the opening chapters of his now classic exploration narrative, *The Worst Journey in the World*. The incredible tale that he tells is of the fated last voyage of Captain Robert Scott and his crew to the outermost reaches of the South Pole on the Terra Nova. Chronicling the journey of the Terra Nova from England in 1910 to New Zealand in 1913, *The Worst Journey in the World* vividly describes the entirety of Scott’s harrowing and tragic final expedition. Driven by a lust to investigate the untold scientific knowledge contained within the South Pole,

these courageous pioneers embarked on a journey into previously unexplored territory, subjecting themselves to the ultimate physical and mental limits as they traveled the massive expanses of the icy tundra. Cherry-Garrard was a key member of the Terra Nova crew that, in addition to the desire to uncover scientific data, desperately sought to be the first Europeans to reach the South Pole. But the expedition was thwarted at every turn by punishing weather, extreme bad luck, and the intense physical and mental decline of the crew on the final stages of their journey. Confronted by the shattering knowledge that rival explorer Roald Amundsen had

reached the South Pole only a few weeks before them, Scott's team then had to negotiate the last stage of their voyage, a doomed attempt which has no equal in peril, disaster, and tragedy. • In this extraordinary

book, the world's most extraordinary distance swimmer writes about her emotional and spiritual need to swim and about the almost mystical act of swimming itself. Lynne Cox trained hard from age nine, working with an Olympic coach, swimming five to twelve miles each day in the Pacific. At age eleven, she swam even when hail made the water "like cold tapioca pudding" and was told she would one day swim the English Channel. Four years later—not yet out of high school—she broke the men's and women's world records for the Channel swim. In 1987, she swam the Bering Strait from America to the Soviet Union—a feat that, according to Gorbachev, helped

diminish tensions between Russia and the United States. Lynne Cox's relationship with the water is almost mystical: she describes swimming as flying, and remembers swimming at night through flocks of flying fish the size of mockingbirds, remembers being escorted by a pod of dolphins that came to her off New Zealand. She has a photographic memory of her swims. She tells us how she conceived of, planned, and trained for each, and re-creates for us the experience of swimming (almost) unswimmable bodies of water, including her most recent astonishing one-mile swim to Antarctica in thirty-two-degree water without a wet

suit. She tells us how, through training and by taking advantage of her naturally plump physique, she is able to create more heat in the water than she loses. Lynne Cox has swum the Mediterranean, the three-mile Strait of Messina, under the ancient bridges of Kunning Lake, below the old summer palace of the emperor of China in Beijing. Breaking records no longer interests her. She writes about the ways in which these swims instead became vehicles for personal goals, how she sees herself as the lone swimmer among the waves, pitting her courage against the odds, drawn to dangerous places and treacherous waters that, since ancient

times, have challenged sailors in ships.
