Nobody Knows What They're Doing Jaico Publishing House Is your life path lit by your inner candle flame, or are you stumbling along in the dark? In Dr. Wayne Dyer's new book, he reminds us of what so many people easily forget in the day-to-day grind of life, that material success is not what we are ultimately trying to achieve, and therefore it shouldn't be our driving force. Within each of us lies success and inner peace, which can be found once we understand that a deeper, richer life experience is characterized by a burning desire, or as Dr. Dyer describes it, an "inner candle flame." In this thought-provoking book, Dr. Dyer offers simple ways to change your life-and your outlook on life. The ten principles presented here apply to people who are just beginning their journey of discovery, as well as those who have already embarked on life's winding path. Dr. Dyer urges us to listen with an open heart, and to apply the secrets that resonate with them and discard the rest. By doing so, we'll learn to feel the peace of God that truly defines success.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the

expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

In 2001, Dr. Wayne Dyer wrote a book called *10 Secrets for Success and Inner Peace*, based on the most important principles

he wanted his children to live by. Serena Dyer, one of those children, has contemplated these ideas throughout her life. "Don't die with your music still in you" has been the most important principle for Serena: to her, it means that you don't allow yourself to live any life other than the one you were born to live. In this book, Serena sets out to explain what it was like to grow up with spiritual parents. She touches upon all ten of her dad's original secrets, imparting her own experiences with them and detailing how they have affected the way she approaches various situations in life. She shares stories, struggles, and triumphs—and Wayne, in turn, contributes his own perspective. This unique father-daughter collaboration will warm the hearts of all parents . . . and inspire anyone who is looking to find the "music" inside themselves.
