"Vital Souls relates in an ethnographic fashion how the Bororo Indians of central Brazil understand their lives in terms of the bope, describing how they employ shamanism and symbolic thought to deal with illness and accident, sex and marriage, birth and death, and how they relate the human life cycle to natural processes. More central to the investigation, the author reveals how shamans of the aroe have disappeared from Bororo life. This is the first volume of the series, *The Anthropology of Form and Meaning*."--

Valla (1407-1457) was the most important theorist of the humanist movement. His most famous work is the present volume, an oration in which Valla uses new philological methods to attack the authenticity of the most important document justifying the papacy's claims to temporal rule.

Sustainable Entrepreneurship stands for a business driven concept of sustainability which focusses on increasing both social as well as business value - so called Shared Value. This book shows why and how this unique concept has the potential to become the most recognised strategic management approach in our times. It aims to point out the opportunities that arise from putting sustainable entrepreneurship into practice. At the same time, this book is a wake-up call for all those companies and decision makers who underestimated Sustainable Entrepreneurship before or who are simply not aware of its greater dimension. Well structured chapters from different academic and business perspectives clearly outline how Sustainable Entrepreneurship contributes to solving the world's most challenging problems, such as Climate Change, Finance Crisis and Political Uncertainty, as well as to ensuring business success. The book provides a framework of orientation where the journey might go: What can a successful concept of SE look like? What are the key drivers for its realisation? What is the role of business in shaping the future of our society? The book also presents best practices and provides unique learnings as well as business insights from the international Sustainable Entrepreneurship Award (www.se-award.org). The Sustainable Entrepreneurship Award (short SEA) is an award for companies today who are thinking about tomorrow by making sustainable business practices an integral part of their corporate culture. Companies that receive the SEA are being recognised for the vision they have shown in combining economic and sustainable responsibility.

Perhaps you remembered what the title of your book means from your previous experiences with Spanish. That is a great start! As you begin the equivalent of a second semester Spanish course with these materials, some of you might think about how long it has been since you studied Spanish while others may come to the class with some background knowledge. We want you to know this book has been designed with many types of learners

in mind. Our goals were to address the need for students to achieve the ability to communicate in written and spoken form. We sought to address a common statement by students that may have previous experiences, be they from secondary school or another college that say, "I have studied Spanish for years and don't know how to speak or write it." We also sought to present a reasonable alternative to the expensive textbooks and online packages that don't seem to be practical or relevant. We sought to enhance second language learning by creating our own materials that take a new approach, the flipped classroom model, to learning a second language based upon the skills that we deem most useful and that will enable our students to confidently express themselves in Spanish-tú puedes con Yo puedo 2.

The RUMBOS program provides robust support to help students 'fill in the gaps' that might be left from their first year of Spanish study, including review activities, indices of first year grammar and vocabulary, and student annotations. At the same time, RUMBOS carefully leads students to higher levels of communicative competence through the combination of functional and contextualized vocabulary presentations, targeted practice of more advanced and often problematic grammatical structures, and process-oriented reading and writing sections with integrated skill-building strategies. Finally, RUMBOS prepares students for advanced language study by involving them in authentic literary readings and academic writing tasks and by weaving in communicative activities geared to oral presentations. The RUMBOS program also provides plentiful instructor support through its transparent and flexible chapter structure, teacher annotations, and ancillary materials. Instructors using RUMBOS will find crafting creative, stimulating, and fun lesson plans effortless. This book provides a comprehensive overview of acute and chronic critical limb ischemia (CLI). Loss of an extremity, or a portion thereof, is not necessarily a life-ending process, but it is a debilitating experience whether involvement is of the upper or lower extremity. It reviews the epidemiology, pathophysiology, etiology, physical examination, imaging modalities, diagnosis, and treatment of limb ischemia. It investigates the most frequent as well as the more unusual etiological processes that may lead to the most dreaded concern of patients and families: amputation. The therapeutics of CLI has been significantly advanced through the multidisciplinary approach to the patient and disease, a focus that is explored in detail throughout the book. Surgical and endovascular treatment guidelines as well as medical therapy, wound healing, and long-term care are discussed. Featuring an extensive illustration program, *Critical Limb Ischemia: Acute and Chronic*, is a valuable resource for vascular and endovascular surgeons, vascular medicine specialists, interventional radiologists, and cardiologists.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. In this classic introduction to educational and psychological measurement, Thorndike and Thorndike-Christ provide all of the pertinent information future professionals need to know in order to develop the skills to use test information wisely. Incorporating standard measurement concepts as they apply to both educational and psychological assessments, the new eighth edition continues to provide a technically rigorous treatment of the core issues in measurement in an easy-to-read, easy-to-understand presentation. In preparing students to become independent users of test information, it describes problems in measurement, explains how these problems are approached and solved, surveys a broad range of sources, and provides guidance in how to find, evaluate, and use information about specific tests. The new eighth edition of *Measurement and Evaluation in Psychology and Education* includes increased coverage of No Child Left Behind, extended coverage of the role of ethics in tests, and a new chapter on advanced topics in testing. Part Two of the book has been reorganized to clarify concepts and the book as a whole has been streamlined and updated to include the most current research and testing information. Intended for use in undergraduate or graduate level introductory courses in psychological and educational measurement, *Measurement and Evaluation in Psychology and Education* focuses on basic issues in measurement provides a general overview that is not overly specialized.

The Era of the Generalist Milne Open Textbooks

: This classic Family Therapy text continues to provide a new and more comprehensive way to think about human development and the life cycle, reflecting changes in society away from orientation toward the nuclear family, toward a more diverse and inclusive definition of family. This expanded view of the family includes the impact of issues at multiple levels of the human system: the individual, family households, the extended family, the community, the cultural group, and the larger society. The text features a ground-breaking integration of individual male and female development in systemic context; our increasing racial, ethnic, and cultural diversity; the emergence of men's movements and issues; the growing visibility of lesbian and gay families; and the neglected area of social class

Explorations of the History of Science in the Iberian World Koala Books

This collection of essays explores two traditions of interpreting and manipulating nature in the early-modern and nineteenth-century Iberian world: one instrumental and imperial, the other patriotic and national. Imperial representations laid the ground for the epistemological transformations of the so-called Scientific Revolutions. The patriotic narratives lie at the core of the first modern representations of the racialized body, Humboldtian theories of biodistribution, and views of the landscape as a historical text representing different layers of historical memory.

Around the globe, contemporary protest movements are contesting the oligarchic appropriation of natural resources, public services, and shared networks of knowledge and communication. These struggles raise the same fundamental demand and rest on the same irreducible principle: the common. In this exhaustive account, Pierre Dardot and Christian Laval show how the common has become the defining principle of alternative political movements in the 21st century. In societies deeply shaped by neoliberal rationality, the common is increasingly invoked as the operative concept of practical struggles creating new forms of democratic governance. In a feat of analytic clarity, Dardot and Laval dissect and synthesize a vast repository on the concept of the commons, from the fields of philosophy, political theory, economics, legal theory, history, theology, and sociology. Instead of conceptualizing the common as an essence of man or as inherent in nature, the thread developed by Dardot and Laval traces the active lives of human beings: only a practical activity of commoning can decide what will be shared in common and what rules will govern the common's citizen-subjects. This re-articulation of the common calls for nothing less than the institutional transformation of society by society: it calls for a revolution.

Nothing else damages the earth's environment more than our cities. As the world's population has grown, our cities have burgeoned, and their impact on the environment worsened. Meanwhile, from the isolated, gated communities within Houston and Los Angeles, to the millions of residents of Bombay living in squalor, the city has failed to serve its ideal function—as the cradle of civilization, the engine of culture, and the inspiration for community and citizenship. In *Cities for a Small Planet*, Sir Richard Rogers, one of the world's leading architects and the designer of the Pompidou Center in Paris, demonstrates how future cities could provide the springboard for restoring humanity's harmony with its environment. Rogers outlines the disastrous impact cities have had and will continue to have on our world, from waste-saturated Tokyo Bay, to the massive plumes of pollution caused by London's traffic, to the depleted water resources of Mexico City. He traces these problems to the underlying social and cultural values that create them—unchecked commercial zeal, selfish individualism, and a lack of community. Bringing to bear concepts such as that of “open-minded” space—places within cities that serve multiple functions such as markets, parks, and sidewalk cafes—he explains how urban design can be used to give citizens a sense of shared experience. The city built with comfortable and safe public space can bring diverse groups together and breed a sense of tolerance, awareness, identity, and mutual respect. He calls for a new theoretical shift in the way cities do business and interact with the environment, arguing that many products come to market and are sold without figuring their social or environmental cost. Rogers goes on to describe the city of the future: one that is sustainable within its own environment; that can make a positive impact on its surroundings; that encourages communication among its citizens; that is compact and focused around neighborhoods; and that is beautiful, a city whose buildings and spaces spark the creative potential of its inhabitants. As our population grows larger, our planet grows smaller. *Cities for a Small Planet* is a passionate and eloquent blueprint for the cities we must create in response, cities that provide for the needs of both their residents and the earth on which they live.

A meditative picture book about the power of reading and how one child can change the world, from #1 bestselling author Andrea Beaty *One Girl*. One spark. Faint and fading in the dark. Flicker . . . Flicker . . . Flicker . . . Glow. Tiny ember. Burning low. Inspired by the global movement to empower girls through education, this lyrical story tells of one small girl who reads a book that lights a spark. She shares what she learns with her class, and the spark grows. The girl is then moved to write her own story, which she shares with girls around the globe, and it ignites a spark in them, lighting up the whole world. This heartwarming and moving narrative shows how books and education can inspire change and how one child can make a huge difference.

“Allende can spin a yarn with the grace of a poet.”—Entertainment Weekly AN INSTANT NEW YORK TIMES BESTSELLER, NOW WITH A NEW DEAR READER LETTER From the New York Times bestselling author of *A Long Petal of the Sea* and *The House of the Spirits*, an enthralling and suspenseful coming-of-age story about a teenage girl who must unravel the mysteries of her past in order to save herself. Nineteen-year-old Maya Vidal grew up in a rambling old house in Berkeley with her grandmother Nini—a force of nature whose formidable strength helped her build a new life after she emigrated from Chile in 1973—and Popo, an African-American astronomer and professor whose solid, comforting presence helps calm the turbulence of Maya's adolescence. When Popo dies of cancer, Maya comes undone and turns to drugs, alcohol, and petty crime. When she becomes lost in the dangerous underworld of Las Vegas, Maya becomes caught in the crosshairs of deadly warring forces. Her one chance for survival is Nini, who helps her escape to a remote island off the coast of Chile. Here, Maya tries to make sense of the past to discover the truth about her life and her family, and embarks on her greatest adventure: a journey of self-discovery and forgiveness.

This book presents the foundations for the future of tourism in a structured and detailed format. The who-is-who of tourism intelligence has collaborated to present a definitive blueprint for tourism reflecting the role of science, market institutions, and governance in its innovation and sustainability. The book adopts a comprehensive approach, exploring recent research and the latest developments in practice to inform the reader about instruments and actions that can shape a successful future for tourism. Broad in scope, the book incorporates the perspectives of leading tourism academics, as well as the views of tourism entrepreneurs, destination managers, government officials, and civil leaders. The book is divided into three parts, the first of which addresses the scientific facets of innovation, analyzing the challenges and opportunities that technology provides for organic and disruptive developments in tourism, which will shape its future. In turn, the second part examines socio-cultural paradigms – with a

view to dismantling traditional barriers to innovation. It also explores the role of heritage and the ethics of inclusiveness as drivers for sustainable tourism. The third part investigates new ways and means in governance and policy making for tourism. It introduces advances such as strategic

positioning, symbiotic partnerships, and innovative management, and closes by presenting governance frameworks for an inclusive and sustainable future of tourism.
