The telecommunication network that allows any computers to exchange the data is known as computer network or data network. Cable media or wireless media helps to establish the physical connection between computing device network. Data Communication & Computer Networks (DCCN) Pdf Notes 6.263J / 16.37J focuses on the fundamentals of data communication networks. One goal is to give some insight into the rationale of why networks are structured the way they are today and to understand the issues facing the designers of next-generation data networks. Much of the course focuses on network algorithms and their performance. Data Communication Networks | Electrical Engineering and ...Data communication

refers to the exchange of data between a source and a receiver via form of transmission media such as a wire cable. Data communication is said to be local if communicating devices are in the same building or a similarly restricted geographical area. The meanings of source and receiver are very simple. What is Data Communication? - Computer Notes Data communications refers to the transmission of this digital data between two or more computers and a computer network or data network is a telecommunications network that allows computers to exchange data. The physical connection between networked computing devices is established using either cable media or wireless media. Networking and Communication Network security is used on a variety of computer networks, both public and private, to secure daily transactions and communications among businesses, government agencies and individuals. Network surveillance. Network surveillance is the monitoring of data being transferred over computer networks such as the Internet. The monitoring is often ...Computer network - Wikipedia Computer network is a

telecommunication channel using which we can share data with other computers or devices, connected to the same network. It is also called Data Network. The best example of computer network is Internet. Computer network does not mean a system with one Control Unit connected to multiple other systems as its slave.

It is an older internet utility that lets us log on to remote computer system. It also facilitates for terminal emulation purpose. Terminal emulation means using a pc like a mainframe computer through networking. Wireless/Mobile Computing
