introduction to the chemistry of  
heterocyclic compounds ...A heterocyclic  
compound or ring structure is a cyclic  
compound that has atoms of at least two  
different elements as members of its ring.  
Heterocyclic chemistry is the branch of  
organic chemistry dealing with the  
synthesis, properties, and applications of  
these heterocycles. Examples of  
heterocyclic compounds include all of the  
nucleic acids, the majority of drugs, most  
biomass, and many natural and synthetic  
dyes. More than half of known compounds  
are heterocycles. 59% of US FDA-approved  
drugs cHeterocyclic compound -
