Good requirements do not come from a tool, or from a customer interview. They come from a repeatable set of processes that take a project from the early idea stage through to the creation of an agreed-upon project and product scope between the customer and the developer. From enterprise analysis and planning requirements gathering to documentation, Determining Project Requirements, Second Edition: Mastering the BABOK® and the CBAP® Exam covers the entire business analysis cycle as well as modeling techniques. Aligned with the International Institute of Business Analysis' (IIBA) Business Analysis Body of Knowledge 2.0® (BABOK® Guide 2.0), the second edition of this popular reference provides readers with a complete and up-to-date resource for preparing to take the Certified Business Analysis Professional (CBAP®) examination. It also: Presents helpful techniques, tools, best practices, and templates to help readers improve the requirements gathering processes within their organization Contains exercises, sample solutions, and a case study that illustrate how to deal with the various situations that might be encountered in the requirements gathering process Supplies a broad overview of a multitude of business analysis issues Includes two sample business requirements documents—one is a comprehensive template, provided courtesy of ESI International, the second is a simpler template suitable for smaller projects The book covers all of the BABOK® knowledge areas and features new preparatory sections for the CBAP® exam that include 300 questions. It examines data modeling, requirements modeling techniques, process modeling, and hybrid techniques. With its many examples, use cases, and business requirements document templates, this book is the ideal self-study guide for practitioners. The combination of theory, activities, exercises, solutions, case study, and exam questions also makes it suitable for business analysis students.

From the Author Glad to present the latest edition of this BA interview questions and answers book, which is much bigger than the previous edition and has more questions with improved answers and illustrations (wherever needed). This book is written to enable business analysts to succeed in the job interviews. This book covers general, business analysis core skills and situational interview questions with suggested answers. In my professional career, I have interviewed 100s of IT professionals at different levels. I came across several professionals, who could not answer questions as effectively as I would have liked. Even though, I can make out that they knew the answers but could not structure them well. I wanted to create a self-help book which would enable business analysts doing well in the interviews and getting their dream jobs. This book has four sections as describes below. Section I deals with general questions. These questions give the interviewer(s) the first impression about your confidence, composure, and basic communication skills. This section includes General questions about you and your profile as well as General BA questions about the role and the projects. Second II - Business Analysis core skills has questions relating to Requirements elicitation, techniques, UML modelling, Requirements specifications documentation (Business Analysis core skills). It covers various aspects of requirements, Use cases, process diagrams, SRS and its elements, prioritization, elicitation, verification, and validation etc. It is also the longest section of the book. Section III deals with Agile, SCRUM and user stories. There are advance questions relating to personas and application usability as well. Section IV includes some additional questions on Business analysis. Section V deals with the situation / scenario-based questions. These questions are asked in the BA interviews regularly. I have tried to cover 20+ situations questions to provide a wide coverage. Each of the answers have been provided with the context and suggested answers. Contributors I must thank my colleagues Rashmi Srivastava and

Neha for the sincere and diligent contributions to help me with inputs and feedbacks. Abhishek Srivastava
