Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their

teaching and revolutionize their classrooms.

Featuring analysis of healthcare issues and first-person stories, Policy & Politics in Nursing and Health Care helps you develop skills in influencing policy in today's changing health care environment. Approximately 150 expert contributors present a wide range of topics in policies and politics, providing a more complete background than can be found in any other policy textbook on the market. Discussions include the latest updates on conflict management, health economics, lobbying, the use of media, and working with communities for change. With these insights and strategies, you'll be prepared to play a leadership role in the four spheres in which nurses are politically active: the workplace, government, professional organizations, and the community.
Comprehensive coverage of healthcare policies and politics provides a broader

understanding of nursing leadership and political activism, as well as complex business and financial issues. Expert authors make up a virtual Nursing Who's Who in healthcare policy, sharing information and personal perspectives gained in the crafting of healthcare policy. Taking Action essays include personal accounts of how nurses have participated in politics and what they have accomplished. Winner of several American Journal of Nursing "Book of the Year" awards! 18 new chapters ensure that you have knowledge of the most up-to-date information on policy and politics. The latest information and perspectives are provided by nursing leaders who influenced health care reform with the Patient Protection and Affordable Care Act of 2010.

how to write your nursing dissertation How to Write Your Nursing Dissertation provides nursing and healthcare students with authoritative information on developing, writing, and presenting an evidence-based practice healthcare dissertation, project or evidence-informed decision-making assignment. Written by experienced healthcare professionals, this comprehensive textbook offers clear and straightforward guidance on sourcing, accessing, and critically appraising evidence, helping students develop their

clinical research and writing skills. The authors address the common difficulties encountered throughout the process of writing a dissertation, project or evidence-informed decision-making assignment, and offer expert tips and practical advice for managing time, developing study skills, interpreting statistics, publishing aspects of the work in a journal or at a conference, and more. Now in its second edition, this bestselling guide presents relatable and engaging scenarios to illustrate the setting of standards, explore legal and ethical frameworks, examine auditing and benchmarking, and demonstrate how evidence is applied to real-world problems. Covering the entire dissertation, project or evidence-informed decision-making assignment process from a nursing and healthcare perspective, this innovative textbook: Helps students develop and appropriately answer a clear dissertation, project or evidence-informed decision-making assignment Addresses the fundamental aspects of evidence-based practice in an accessible and readable style Features

new and updated content on mini dissertations, final assessments, and evidence-informed decision-making projects that many healthcare institutions now require. Presents up-to-date information that meets the needs of new healthcare roles, such as the Nursing Associate and Healthcare Assistant. Includes access to a companion website containing downloadable information, an unabridged dissertation sample, and links to additional resources. How to Write Your Nursing Dissertation is a must-have guide for nursing and healthcare students, trainees, other healthcare students required to complete an evidence-based practice project, and anyone looking to strengthen their critical appraisal and assignment writing skills.

There are a lot of important skills needed for a career in engineering. As well as academic skills, future engineers need to be able to present data, work in project teams, carry out experiments, problem solve and write reports. This book emphasises the importance of these core

skills, and supports engineering students as they successfully navigate their courses and move forward into a career of ongoing development. Written in a friendly and encouraging style, Skills for engineering and built environment students: - Provides guidance on both the study and the professional practice of engineering. - Addresses common worries and pitfalls, debunking myths and demystifying jargon. - Helps with milestones such as group projects, presentations, work placements and job interviews. Supported by interviews with students, lecturers, young engineers and employers, Skills for Engineering and Built Environment Students guides students and early-career professionals through an important transition stage, thoroughly preparing them for the world of work.

'Stats Means Business' is an introductory textbook aimed at Business Studies students who require guidance in the area of statistics. It minimizes technical language, provides clear definition of key terms, and gives emphasis to interpretation

rather than technique. 'Stats Means Business' enables readers to: * appreciate the importance of statistical analysis in business * understand statistical techniques * develop judgment in the selection of appropriate statistical techniques * interpret the results of statistical analysis. There is an overwhelming need for successful managers to be able to deal competently with numerical information and this text is developed with this in mind by providing worked examples and review questions which are rooted in viable business contexts. Each chapter includes guidance on using Excel and Minitab to produce the analysis described and explained in the chapter. The start of every chapter identifies aims and summarizes content and each is written in an accessible style. Model solutions are provided for three problems in each chapter and further solutions are available on a web site to accompany the book. The book is suitable for first year undergraduate courses, MBA Programmes and anyone who needs support and guidance in the area of statistics.

This text uses a case study approach to show how life-skills can be developed in a range of higher education subject areas. It also looks at the changes which can be made to the curriculum to facilitate this sort of learning. The case studies are set against a more theoretical background.

As a final year supervisor for twelve years on the degree, masters, and PhD, I have noticed time and time again students approached their thesis confused and unsure what is expected from them; and rightly so. What is involved in the write up of the final year thesis is not something students are introduced to during their studies. The structure, content, and format of a thesis are only understood by seeing good examples. A thesis is the largest assignment a student will ever likely

to do and will resemble nothing they have done before. A final year thesis has to demonstrate academic structure, content, and integrity, something that is not always presented clearly by supervisors. As a supervisor, I designed a handout to help and guide my students. This handout became very popular as students shared it with their friends. After many years of editing and improving my notes, I have decided to publish it as a book. The second edition of the book comes with more examples. Taking away the fear of the writing up and having the confidence that a great thesis is achievable has helped my students focus instead on finding creative, challenging, and inspiring projects.

'Stats to go' is an ideal companion to hospitality, leisure and tourism studies as the breadth of coverage supports all taught numerical aspects of these types of course. Examples from hospitality, leisure and tourism organizations: * licensed premises * fast food outlets * hotels * theme parks and their environments are used to illustrate key issues of the text. The area of quantitative methods is one which many students find unapproachable or daunting. Ninety percent of any Computing Science academic staff are involved with project work at some stage of their working life. Often they have no previous experience of how to handle it, and there are

no written guidelines or reference books at the moment. Knowledge and practical experiences are often only disseminated from one institution to another when staff change jobs. This book is the first reference work to fill that gap in the market. It will be of use to lecturers and course designers who want to improve their handling of project work in specific courses, and to department heads and deans who want to learn about overall strategic issues and experiences from other institutions.
