There are many who aspire to buy their own dump truck. This question is the number two question that I am always asked. I decided to put it in writing so the many who want to start their own dump truck business will have adequate information when preparing to make such a significant and important purchase. My prayer is that you will invest in this work as I know it will be a tremendous

blessing in breaking down what is needed in the proper dump truck. Dr. Perry D. Jones Jr.

The demand for high-performance submarine power cables is increasing as more and more offshore wind parks are installed, and the national electric grids are interconnected. Submarine power cables are installed for the highest voltages and power to transport electric energy under the sea between islands, countries and even continents. The installation and operation of submarine power cables is much different from land cables. Still, in most textbooks on electrical power systems, information on submarine cables is scarce. This book is closing the gap. Different

species of submarine power cables and their application are explained. Students and electric engineers learn on the electric and mechanic properties of submarine cables. Project developers and utility managers will gain useful information on the necessary marine activities such as pre-laying survey, cable lay vessels, guard boats etc., for the submarine cable installation and repair. Investors and decision makers will find an overview on environmental aspects of submarine power cables. A comprehensive reference list is given for those who want further reading.

For anyone who ever stood in awe of a three-story-high dump truck or marveled at the engineering revolution propelling mechanical vehicles into the robotic age, Ultra Haulers presents the past, present, and future of the world's greatest haul trucks. From early rigid trucks and articulated dump trucks to tire technology and scraper tractors, Ultra Haulers details the innovations, evolutions, and revolutions in large-scale earthmoving equipment. Author Mike Woof, former

editor-in-chief of World Mining Equipment magazine and current international editor for E&MJ and Coal Age, is a leading authority on mining equipment, including the largest, most sophisticated factory-made equipment produced. The book incorporates original analysis, primary data, and firsthand commentary, putting an ear to the ground and a finger to the pulse of this dynamic and exciting field. Both knowledgeable hobbyists and industry veterans will enjoy Woof's sweeping overview, which is beholden to no one manufacturer, no one type of machine, and no one era, but to the entire field. With expert, prescient commentary, Woof's understanding of these machines and enthusiasm for the engineering triumphs they represent comes through on every page.

In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts

and tables. This is a print on demand report.
