 art of the BP Process Safety Series, this book increases the awareness of operators within the chemical and process industries to the hazards of steam.

The Power of Digital Policy Samuel French, Inc.
 Pablo, a high-powered lawyer, and doctoral candidate Tania, his very pregnant wife, are realizing the American dream when they purchase a house next door to community stalwarts Virginia and Frank. But a disagreement over a long-standing fence line soon spirals into an all-out war of taste, class, privilege, and entitlement. The hilarious results guarantee no one comes out smelling like a rose.

 Ten explorers. Four boats. One Grand Canyon. MEN ON BOATS is the true(ish) history of an 1869 expedition, when a one-armed captain and a crew of insane yet loyal volunteers set out to chart the course of the Colorado River.

Warm Beer, Lousy Food U of Nebraska Press
 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

 Adopting a truly global perspective and a practical approach to diabetes—including pathophysiology, genetics, regional peculiarities, management, prevention and best

practices—this book is an excellent resource for clinicians and policy-makers working with patients in more austere settings. The global prevalence of diabetes is estimated to increase from 422 million in 2014 to 592 million in 2035. Sadly, low- and middle-economy countries are projected to experience the steepest increase, but even in developed economies, vulnerable demographic subgroups manifest disparities in diabetes prevalence, quality of care, and outcomes. This book extends coverage to those underserved and minority communities in the developed world. In a consistent chapter format, it discusses classification, pathophysiology, genomics, diagnosis, prevention and management of diabetes in economically challenged regions as well as underserved populations in affluent nations. Suggestions regarding future directions in the organization of diabetes care delivery, prevention and research priorities are also provided. The detailed identification of barriers to optimal care and the practical approach to the management and prevention of diabetes make Diabetes Mellitus in Developing Countries and Underserved Communities a valuable resource for clinicians, researchers and health policy leaders.

Posing Modernity Audio Amateur Incorporated

An ambitious and revelatory investigation of the black female figure in modern art, tracing the legacy of Manet through to contemporary art This revelatory study investigates how changing modes of representing the black female figure were foundational to the development of modern art. Posing Modernity examines the legacy of Édouard Manet's Olympia (1863), arguing that this radical painting marked a fitfully evolving shift toward modernist portrayals of the black figure as an active participant in everyday life rather than as an exotic "other." Denise Murrell explores the little-known interfaces between the avant-gardists of nineteenth-century Paris and the post-abolition community of free black Parisians. She traces the impact of Manet's reconsideration of the black model into the twentieth century and across the Atlantic, where Henri Matisse visited Harlem jazz clubs and later produced transformative portraits of black dancers as icons of modern beauty. These and other works by the artist are set in dialogue with the urbane "New Negro" portraiture style with which Harlem Renaissance artists including Charles Alston and Laura Wheeler Waring defied racial stereotypes. The book concludes with a look at how Manet's and Matisse's depictions influenced Romare Bearden and continue to reverberate in the work of such global contemporary artists as Faith Ringgold, Aimé Mpane, Maud Sulter, and Mickalene Thomas, who draw on art history to explore its multiple voices. Featuring over 175 illustrations and profiles of several models, Posing Modernity illuminates long-observed figures and proposes that a history of modernism cannot be complete until it examines the vital role of the black female muse within it.

Lamentations is a novel about the first group of families crossing west to Oregon in 1842, from the perspective of the dozen women on the trip. Although none of these women left a written record of her journey, the company clerk's daily notations provided documentation of historical events.

Based on these records and the author's own decades of work as a historian, Carol Kammen provides an interpretation of the women's thoughts and feelings as events played out in and around the wagons heading west. In this novel the men are in the background--and we hear the women ponder the land, their right to be passing through, their lives and how they are changing, the other people in the company, the Native Americans they encounter, and their changing roles. Lamentations is about women's reality as wives or unmarried sojourners, as literate or illiterate observers, and as explorers of the land. Kammen gives voice to these women as they consider a strange new land and the people who inhabit it, mulling over what they, as women of their time, could not say aloud. We see the mental and emotional impact of events such as the naming of peoples and lands, of a husband's suicide, of giving birth, and of ongoing and uncertain interactions with Native peoples from the Missouri River crossing all the way to Oregon. They face the difficulties of the road, the slow trust that builds between some of them, and the oddities of the men with whom they travel. These women move from silent witnesses within a constrained gender sphere to articulate observers of a complicated world they ultimately helped to shape.
