What's next? is a question we all have to ask and answer more frequently in an economy where the average job tenure is only four years, roles change constantly even within that time, and smart, motivated people find themselves hitting professional plateaus. But how do you evaluate options and move forward without getting stuck? Jenny Blake--a former training and career development specialist at Google who now runs her own company as a career and business consultant and speaker--has a solution: the pivot. Pivoting is a crucial strategy for Silicon Valley tech companies and

startups but it can also be a successful strategy for individuals looking to make changes in their work lives. This book will introduce you to the Pivot Method and show you how to take small, smart steps to move in a new direction--now and throughout your entire career. No matter your age, industry, or bank account balance, Jenny's advice will help you move forward with confidence. Pivot also includes valuable insight for leaders who want to have more frequent career conversations with their teams to help talented people move and grow within their roles and the broader organization. If change is the only constant, let's get better at it. Your career success and satisfaction depends on your ability to navigate change well and this book can help you do so.

One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions. . . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, Wall Street Journal "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna Smith, The Atlantic Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.
