Education is the heart of a successful nation. A learning nation is a successful nation. The nation that fails to educate its citizens faces numerous challenges such as social problems, financial problems, and rebellion. But for the success of education there should be enough and good teachers to teach students. In many countries, the number of good teachers is diminishing as the teaching career is becoming less attractive to a number of students because of the problems that are associated to teaching. It is imperative for the governments to come up with measures to increase the number of teachers in schools. It is unchallenged that teachers are one of the vital elements of education system. Therefore they need to be motivated and retained. Furthermore, the education system can be effective if the students are prepared to learn. It is very difficult for the teachers to impart knowledge to students that have barriers of education such as poor behavior. Therefore, parents have an important role to play to ensure that students come to school prepared to learn and without any barriers to education. It is the responsibility of the government and organizations to retain and motivate teachers. Systems of education will be successful if they are supported by the government, organizations, communities, parents, learners, and teachers. There should be good structures in the education system to produce more teachers who will be responsible in educating the nation. The death of a good system of education would drive the nation back to a time of ignorance where uneducated people will become leaders of nations.

Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate - from advantages to complications - in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.
