This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to

evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care.

Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in

AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Learn to start open, productive talks about money with your parents as they age As your parents age, you may find that you want or need to broach the often-difficult subject of finances. In *Mom and Dad, We Need to Talk: How to Have Essential Conversations with Your Parents About Their Finances*, you'll learn the best ways to approach this issue, along with a wealth of financial and legal information that will help you help your parents into and through their golden years. Sometimes parents are reluctant to address money matters with their adult children, and topics such as long-term care, retirement savings (or lack thereof), and end-of-life planning can be particularly touchy. In this book, you'll hear from others in your position who have successfully had "the talk" with their parents, and you'll read about a variety of conversation strategies that can make talking finances more comfortable and more productive. Learn conversation starters and strategies to

open the lines of communication about your parents' finances Discover the essential financial and legal information you should gather from your parents to be prepared for the future Gain insight from others' stories of successfully talking money with aging parents Gather the courage, hope, and motivation you need to broach difficult subjects such as care facilities and end-of-life plans For children of Baby Boomers and others looking to assist aging parents with their finances, *Mom and Dad, We Need to Talk* is a welcome and comforting read. Although talking money with your parents can be hard, you aren't alone, and this book will guide you through the process of having fruitful financial conversations that lead to meaningful action.

Gain the skills you need to master the role of the veterinary technician in large animal care! Large Animal Clinical Procedures for Veterinary Technicians, 4th Edition teaches you how to set up, assist, and follow through on medical procedures and treatment regimens for large domestic animals. A comprehensive guide, this text not only defines the veterinary technician's responsibilities in daily livestock care and hospital management, but includes separate sections on horses, cattle, sheep and goats, pigs, and llamas and alpacas - covering husbandry, clinical procedures, surgical procedures, and common diseases for each. This new edition includes information on safety and handling, livestock nutrition, vaccine scheduling, and diagnostic imaging, plus four new chapters with detailed care of poultry. Written by noted veterinary technician educator Kristin Holtgrew-

Bohling, it is the ideal text for preparing for certification exams and everyday practice! The most comprehensive large animal book specifically written for veterinary technician students. A practical approach makes this text useful in classes and in clinical situations, so veterinary technicians, acting under instructions of veterinarians, can plan and follow through on procedures and treatment regimens for large animals. A focus on the veterinary technician's responsibilities explains why and how a procedure is performed, and the roles that vet techs fill in preparing for, assisting in, and following up the procedure. Coverage of the essential large animal-related tasks in the CVTEA Manual of Accreditation for Veterinary Technology Programs addresses AVMA accreditation and prepares you to pass the Veterinary Technology National Exam. Full-color photographs and line drawings show step-by-step procedures in areas such as restraint, bandaging, physical examination techniques, and diagnostic procedures. Coverage of husbandry and breeds demonstrates how day-to-day housing and feeding affect the care of many large animal diseases, and helps you learn to

provide quality client education. A section on the livestock industry provides comprehensive coverage of safety and handling, reproduction, and nutrition, so you can better understand the practices, procedures, and decisions in large animal veterinary medicine. A section on llamas and alpacas helps you to understand the health and maintenance of these increasingly popular domestic animals — in the U.S., there are more than 12,000 alpaca herds and 25,000 llama owners. Proper medical terminology is included in a comprehensive glossary, facilitating effective communication with clients and with other professionals. Learning features enhance your critical thinking and decision making with case studies, clinical applications, key terms, chapter outlines, learning objectives, and Technician Notes. NEW! Tables on Temperature, Pulse, Respiration (TPR) data and vaccine schedules provide a quick, at-a-glance reference for important information. NEW! Expanded regulatory information for livestock provides details on OCV vaccination, Health Certificate forms, Brucellosis and Tuberculosis testing, and Scrapies tags. NEW! Four new chapters on

Poultry provide detailed coverage of the breed.
