The
introductory
book [Sha00]
is formal in

tone, and covers the material in a clear fashion. COMMUTATIONAL COMMUTATIVE ALGEBRA NOTES Jacob Lurie taught a course (Math 221) on commutative algebra at Harvard in Fall 2010. These are my "live-TeXed" notes from the course. Conventions are as follows: Each lecture gets its own "chapter," and appears in the table of contents with the date. Some lectures are marked "section,"

which means that they were taken at a recitation session. commutative algebra - Department of Mathematics A commutative ring with 1 is called a field if $1 \neq 0$ and for all $0 \neq x \in A$ there exists an element $x^{-1} \in A$ such that $xx^{-1} = x^{-1}x = 1$. In other words, every non-zero element of A is a unit. Clearly, every field is an integral domain, but not conversely (e.g. \mathbb{Z}). Note that if x is a unit, then $(x)^{-1} = A^{-1}(1)$. Also

note that if x is nilpotent, then $1 - x$ is a unit. COMMUTATIVE ALGEBRA, LECTURE NOTES Disclaimer These are my notes from Nick Shepherd-Barron's Part III course on commutative algebra, given at Cambridge University in Michaelmas term, 2012. I have made them public in the hope that they might be useful to others, but these are not official notes in any way. A course in Commutative Algebra - MIT

<p>MathematicsI. Commutative algebra is a necessary and/or useful prerequisite for the study of other fields of mathematics in which we are interested. II. We find commutative algebra to be intrinsically interesting and we want to learn more. Perhaps we even wish to discover new results in this area. Most beginning students of commutative algebra can ...COMMUTATIVE ALGEBRA Contents - Department of</p>	<p>MathematicsLectures on Commutative Algebra Sudhir R.  Pete L. Clark's Expositions - Department of Mathematics
 Commutative algebra is the branch of algebra that studies commutative rings, their ideals, and modules over such rings.

Both algebraic geometry and algebraic number theory build on commutative algebra.
 Commutative algebra - Wikipedia
 The Mathematics Department (D-MATH) is responsible for Mathematics instruction in all programs of study at the ETHZ. For students concentrating in Mathematics, the Department offers a rich and carefully coordinated program of courses and seminars in a

broad range of fields of pure and applied mathematics. The curriculum is designed to acquaint students with fundamental mathematical concepts ...ETH :: D-MATH :: Commutative Algebra commutative algebra. In particular, we show that for Cherednik algebras of type A_{n-1} , the whole representation space is smooth and coincides with the spectrum of the center.
