Philosophy after Darwin Oxford
University Press

The most widely read anthology for the study of modern philosophy, this volume provides key works of philosophers and other leading thinkers of the period, chosen to enhance the reader's understanding of modern philosophy and its relationship to the natural sciences of the time. The third edition incorporates important contributions of women and minority thinkers into the canon of the modern period, while retaining all of the material of the previous edition. Included are works by Princess Elisabeth, Margaret Cavendish Duchess of Newcastle, Lady Anne Conway, Anton Wilhelm Amo, Lady Damaris Masham, Lady Mary Shepherd, and Emilie Marquise Du Châtelet. The 3rd edition of this masterfully edited anthology incorporates important contributions of women and minority thinkers into the canon of the modern period, while retaining all of the material of the previous edition. Included are works by Princess Elisabeth, Margaret Cavendish Duchess of Newcastle, Lady Anne Conway, Anton Wilhelm Amo, Lady Damaris Masham, Lady Mary Shepherd, and Emilie Marquise Du Châtelet.

This anthology demonstrates the richness and diversity of the American intellectual heritage. In it we see how Jonathan Edwards grapples with the problem of how to reconcile freedom and responsibility with Calvinist religious beliefs; how Franklin and Jefferson exemplified American enlightenment thought; and how the Transcendentalists, Ralph Waldo Emerson and Henry David Thoreau, formulated their particular romantic idealist beliefs. A second and significant portion of the anthology is devoted to Pragmatism. Substantive excerpts from Peirce, James and Dewey, as well as Royce, are collected here. A third part is devoted to other Twentieth-Century American philosophies. No other collection of writings in this field includes the breadth of coverage that this one does. Among the chapters in this third part of the book are those on early Process Philosophy, Phenomenology, Positivism, and Language Philosophies. Selections from such philosophers as Whitehead, Weiss, Buchler, Gurwitsch, Sellars, Quine, Davidson, and Rawls, along with many others are included in this part. A final chapter is devoted to twentieth-century American Moral Philosophy. The book is specifically designed to be used as a text for courses in American philosophy. A substantive introduction that emphasizes the historical setting as well as major interests and ideas of the philosophers accompanies each chapter. Extensive bibliographies and study guide questions follow each chapter. The selections include more than any one course will cover, but in their completeness also allow individual teachers and readers to

select what they want.

The Essential Writings Routledge

Philosophy of Science: An Anthology assembles some of the finest papers in the philosophy of science since 1945, showcasing enduring classics alongside important and innovative recent work. Introductions by the editor highlight connections between selections, and contextualize the articles Nine sections address topics at the heart of philosophy of science, including realism and the character of scientific theories, scientific explanations and laws of nature, singular causation, and the metaphysical implications of modern physics Provides an authoritative and accessible overview of the field

The Actual and the Possible Wiley-Blackwell

Interest in emergence amongst philosophers and scientists has grown in recent years, yet the concept continues to be viewed with skepticism by many. In this book, Paul Humphreys argues that many of the problems arise from a long philosophical tradition that is overly committed to synchronic reduction and has been overly focused on problems in philosophy of mind. He develops a novel account of diachronic ontological emergence called transformational emergence, shows that it is free of the problems raised against synchronic accounts, shows that there are plausible examples of transformational emergence within physics and chemistry, and argues that the central ideas fit into a well established historical tradition of emergence that includes John Stuart Mill, G.E. Moore, and C.D. Broad. The book

also provides a comprehensive assessment of current theories of emergence and so can be used as a way into what is by now a very large literature on the topic. It places theories of emergence within a plausible classification, provides criteria for emergence, and argues that there is no single unifying account of emergence. Reevaluations of related topics in metaphysics are provided, including fundamentality, physicalism, holism, methodological individualism, and multiple realizability, among others. The relations between scientific and philosophical conceptions of emergence are assessed, with examples such as self-organization, ferromagnetism, cellular automata, and nonlinear systems being discussed. Although the book is written for professional philosophers, simple and intuitively accessible examples are used to illustrate the new concepts.

 In *Ethics: The Essential Writings*, philosopher Gordon Marino skillfully presents an accessible, provocative anthology of both ancient and modern classics on matters moral. The philosophers represent 2,500 years of thought—from Plato, Kant, and Nietzsche to Alasdair MacIntyre, Susan Wolf, and Peter Singer—and cover a broad range of topics, from the timeless questions of justice, morality, and faith to the hot-button concerns of today, such as animal rights, our duties to the environment, and gender issues. Featuring an illuminating preamble, concise introductory essays on the giants of ethical theory, and incisive chapter headnotes to the modern offerings, this Modern Library edition is a perfect single-volume reference for students, teachers, and anyone eager to engage in

reflection on ethical questions, including “What is the basis for our ethical views and judgments?” Gordon Marino is professor of philosophy and director of the Hong Kierkegaard Library at St. Olaf College in Northfield, Minnesota. A recipient of the Richard J. Davis Ethics Award for excellence in writing on ethics and the law, he is the author of *Kierkegaard in the Present Age*, co-editor of *The Cambridge Companion to Kierkegaard*, and editor of the *Modern Library’s Basic Writings of Existentialism*. His essays have appeared in *The New York Times*.

This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's A Comedy of Errors. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on The Comedy of Errors that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

The philosophy and patterns of thought of the civilization contain the historical experiences, life wisdom, and cultural ideals accumulated by people over a long period of time. In this sense, the wisdom and ideals that are reflected in the civilization's philosophy speak a great deal of its particular cultural

identity. This volume is a compilation of previously published articles in the field of Korean philosophy that have been carefully selected for their high scholarly value. Continuously struggling to preserve its identity, traditional Korean philosophy was finally

Selections for Beginners from the Writings of the Greatest Philosophers from 1500 to 1900, with Biographical Sketches, Analyses, Diagrams and Questions for Discussion Wiley-Blackwell

The Actual and the Possible presents new essays by leading specialists on modality and the metaphysics of modality in the history of modern philosophy from the seventeenth to the twentieth centuries. It revisits key moments in the history of modern modal doctrines, and illuminates lesser-known moments of that history. The ultimate purpose of this historical approach is to contextualise and even to offer some alternatives to dominant positions within the contemporary philosophy of modality. Hence the volume contains not only new scholarship on the early-modern doctrines of Baruch Spinoza, G. W. F. Leibniz, Christian Wolff and Immanuel Kant, but also work relating to less familiar nineteenth-century thinkers

such as Alexius Meinong and Jan Lukasiewicz, together with essays on celebrated nineteenth- and twentieth-century thinkers such as G. W. F. Hegel, Martin Heidegger and Bertrand Russell, whose modal doctrines have not previously garnered the attention they deserve. The volume thus covers a variety of traditions, and its historical range extends to the end of the twentieth century, addressing the legacy of W. V. Quine's critique of modality within recent analytic philosophy.

A New History of Western Philosophy

University of Toronto Press

An anthology of works covering the radical philosophical movement dating from Descartes to Leibniz. As much as possible, texts are presented whole, with associated texts by Bacon, Galileo, Pascal, Hobbes, Malebranche, and Newton rounding out the view of major works including Descartes's *Meditations*, Spinoza's *Ethics*, and Leibniz's *Monadology*. Suitable for a one-semester or quarter course covering the Rationalists, the readings are mostly drawn from the first third of the author's anthology *Modern Philosophy: An Anthology of Primary Sources*.
